MINUTES OF THE 1st QUARTER UNIVERSITY RESEARCH, EXTENSION AND KNOWLEDGE MANAGEMENT COUNCIL (UREKMC) VIRTUAL MEETING HELD ON MARCH 17, 2022, IT BUILDING, PARTIDO STATE UNIVERSITY, GOA, CAMARINES SUR- 9:30 A.M.
(12th Regular Meeting – Via Zoom)

I. PRELIMINARIES

A. CALL TO ORDER

VP Candelaria welcomes everyone to the 1st Quarter 2022 regular UREKMC meeting.
The meeting was called to order at 9:30 A.M by the Chair-VP Patricia M. Candelaria.

B. OPENING CEREMONIES

A recorded prayer was played, followed by the recitation of the vision, mission and quality policy after which was the singing of the PSU hymn.

C. ROLL CALL / DETERMINATION OF QUORUM

The council secretary determined the quorum. At the time of the determination of the quorum, there were 50 registered participants present via zoom, what we need is only 41 to have a quorum. Hence a meeting can now be started. Thank you.

D. READING AND APPROVAL OF THE PROPOSED AGENDA, MINUTES OF THE PREVIOUS MEETING AND MATTERS ARISING THERETO

The chair, VP Candelaria requested the council secretary, Ms. Luisa M. Lanciso to read the minutes then for approval of the council members.

The council secretary screen share the minutes, page by page and asked for the members' comments if there is any. Since no one is objecting on the contents of the minutes during its presentation, still the chairman, reminded everyone that if in case there are comments they can send it to the council chair within 5 days to accommodate its correction.

The chair calls for the approval of the proposed agenda. Dr. C. Lim moved for the approval of the proposed agenda; it was seconded by Dr. Myrna C. Bigueja.

E. PRESIDENT'S UPDATES AND DIRECTIONS

The Presidents extended his greetings and thanks to the presence of everyone in the meeting and highlight the following points and insights,

- Informing the body of the new direction called future's thinking initiative but worry that since discussion of this might take a longer time. Instead, he suggested of another day to schedule for him to explain it and for everyone to be able to understand the concept well.
- Futures' Thinking is planning/doing an action which we do not have yet in mind, what will happened in the future. "paggigibo kang aksyon pero mayo ka pa lamang ning nahihiling kung ano ang kamugtakan kumbaga nababasa mo pa sana sa utak mo".
- The 2 million given to us will supplement this in our university. Each one of us should have this advocacy. Our actions should be leading to the future we are thinking of. For some, their actions are different for what we call future's thinking. Futures' thinking is sense making I invited Dr. Gerona, Dr. Clores, Engr. Sadol, Charlie and Earl to concretize the direction of Futures' thinking. I made a framework to be used as basis for allocating funds and activities for this direction.

- To those who are interested about this concept, you can read papers uploaded in the internet about futures' thinking framework.
- . We can allocate one day to discuss this; we need to disseminate this so that in our university we can contribute and participate to have it mobilize and embed it in our university's life and culture. One advantage is to have an aligned mindset for this futures' thinking
- Second; We have SEAMEO biotroph projects endorsed by Comm. Darilag. I tasked Dr. Clores to attend to these proposals. Dr. Clores is one of those very busy deans. He entered into conceptualization, implementation, innovation and creativity in our university. In his short stay in the University, he contributed a lot; publication, international collaboration, . I hope that many of us will demonstrate the same, because that is the mark of scholarship, competitiveness culture in academe. Standardizing the methodologies is a must so we can fit in the requirements of SEAMEO. Members of these are Universities, that propose cutting-edge science research projects. We need to do something to at least live to their expectations, remember our vision is global competitiveness, meaning we must develop curriculum that will give our students' a quality of instruction at PAR to the standards of other nation. We are given funds by the government because they want us to achieve and sustain this vision thru research not research as stressor. We have to understand that the boost word for economic development and progress context of the nation is creativity and innovation. It is always mentioned in the report of world bank, in science and technology fora. They hope that thru this, we will improve or economy and lessen poverty. The mother of creativity and innovation is RESEARCH. Creativity is generation of new knowledge of information to support policy or to support society from out of nothing. To generate something to create. Innovation means using your creativity to generate value.
- Without research, we cannot translate data to technology, and without technology and science, no development. I even told Dr. Esplana that for criminology, the focus should not be on how to trigger guns only, the battle now is on programming, can read digital maps; in other words, computing science. like what is applied now in the battle between Ukraine and Russia.
- Let us focus our research on science and technology being the playground now.
- It is so sad that we do not have entry to BCAARRD symposium. We need to participate in this kind of symposium. Symposiums, presentations, conferences are venues for us demonstrate our accomplishments, that the university exists as an academic institution.
- As man / woman of science and technology that supports the advocacy of changing the society tom improve thru innovation and creativity "research". So next time, let us try our best to participate because this is what we commit as university, the reason for being of the university as a research institution.
- Third; there are two more consortia in Bicol, the BCHRD and the BCIEERD. I want you to contribute by presenting papers in these symposia. I myself, presented papers in symposium like this. Let us make it as advocacy not a responsibility. Each one should contribute to build the reputation of this university. As one institution in Bicol, we already command respect from our other colleagues in the region, so let us sustain it.
- Another, upscale our proposal. Make it robust and competitive. We have to return the value for money of our government. 1. Must be publishable (must be true, must be new, must be important). Methodology – build from existing knowledge; robust; level up the methodologies that will provide in-dept analysis, eliminate the simply computing mean, median and mode. 2. New- do not duplicate existing information, it is just a waste of time and money, (we allocate de-loading, supplies, travels and yet we generate information wherein the existing information/ literature are more robust and truthful. That's waste of money. We cannot even use it as reference material to guide in crafting policy or ordinances in one LGU or even adapt a policy by the department of education or even findings cited in the papers of other scholars. 3. Important- must contribute to new knowledge, it should fill the gap in the existing literature, READ, READ and READ more. Know the millennium sustainable development goals. NHERA, DOST agenda. It is now your responsibility as an academician to grow, cultivate your own competency. Find your

relevance, your needs to establish your niche in the university as a researcher/scientist/academician. Our proposals must be quality. Each of our proposals must be assessed, to its potential to contribute to education theory, knowledge, policy and practice.

- A range of methodologies must be relevant to educational research. Their selection will depend on the purpose of the research and the nature of the research questions. These include the methods you are using, the robustness of the methodology. Quantitative data that can allow generalization, prediction and the testing of hypotheses, prediction regression in equation, structural equations modelling and testing of hypotheses. Qualitative data that can provide interpretation of meaning, complex phenomena and dynamic processes, and which can serve exploratory purposes and provide deep knowledge.
- The 2 main criteria used for assessing the quality of research proposal. Robustness requires adequate consideration of relevant methodological, conceptual and theoretical issues. A well-constructed design can provide confidence in the research findings. The research proposal should include clear statements which address the following criteria:
    - Research goals which are feasible, focused, clearly stated and clearly linked to the theoretical and physical context of the research and to its intended contribution;
    - A research proposal which shows awareness and understanding of the builds on, what is already known;
    - The specific way(s) in which the research will contribute to existing knowledge on the issue;
    - Relevant current national and international should be adequately cited; and
    - Limitations of the research should be identified, and unwarranted generalization avoided.
- DOST provides access to Scopus index journals, they provided code, I do not know if we have faculty researchers that take this opportunity to their advantage because it is being paid by DOST. Let me ask Ms. Charmaine and Luisa. Thank you very much.

F. REPORT OF STANDING COMMITTEES

VP Candelaria thanked the President for his updates and direction specifically on research proposals methodologies instructions., she called for the reports from the different committees. Professor Rosemarie Tabardillo the committee secretary followed by the research and extensionist welfare committee, Dr. Bernadette Gumba chair.

- Dir. R. Tabardillo, reported that they convene last February 24, 8:00 to 12:00 o'clock. Two proposals were presented; the proposed PSU IP Policy and the proposed tools for monitoring approved RDE projects programs by the RDE monitoring team. Another, Last March there were additional 2 proposals presented; the request for second extension for the CHED NCCA funded project on usipon suanoy ning tawong lipod asin lihi kang agta sa Partido and the CHED GIA R&D Proposal assessment of mangrove ecosystem services and estimation of stakeholders' willingness to pay in San Miguel Bay. In all, 4 proposals were reviewed and for endorsement to this august body. Thank you and good morning to everyone.

- Dr. B. Gumba: Good morning, Pres Raul Bradecina and VP P. Candelaria and to the esteemed members of the UREKMC. The committee on researchers and extensionist welfare did not meet for this quarter because there is no proposal submitted to the committee. Thank you and good morning.

- VP P. Candelaria: Thank you Dr. Gumba. The research review and evaluation committee and extension review and evaluation committee will give their report under the announcement and matters for information.

- The matters for approval and endorsement are the proposed IP Policy to be presented by Director Michael Barbecho, the IP Director of the University.

G. MATTERS FOR APPROVAL / ENDORSEMENT

1. PSU Intellectual Property (IP) Policy

Presenter: Mr. Michael Barbecho

Mr. M. Barbecho presented the proposal.

VP. P. Candelaria: Thank you Mr. Barbecho, any comment?

Queries, Comments, Suggestions

- Dr. M. Bigueja: what will be the requirement(s) for us to say that the registered UM is already commercialized/utilized?
- Mr. M. Barbecho: It is utilized when it has a description and utilization report. The format for the report is included here. Other documentation as proof were identified in letter c.
- Dr. M. Bigueja: If you have a MOA with the industry, what will be the sharing scheme between the owner of the UM and the industry?
- Mr. M. Barbecho: It will depend on the agreement. There are also agreements on licensing. The Ownership belongs to the SUC., The creator is the researcher, (8.2)
- Dr. M. Bigueja: All UMs generated by PSU personnel will be owned by PSU?
- Mr. M. Barbecho: Yes. If reverse then that is the time that acknowledgement of creatorship/inventorship. Ownership and creatorship are two different things. These are based on IP Code of the Philippines and RA 10055. Actually, it was already critiqued by the IPOPHil Personnel.
- VP P. Candelaria: From the Chat Box: Is copyright included?
- Mr. M. Barbecho: Yes, reflected in the IP creation.
- Dir. R. Tabardillo: The question is actually, incentives for copyrighted materials.
- Mr. M. Barbecho: It only covers the Techno Award related incentives. Seeking for copyright is easy once you submitted the draft of your works, a copyright will be issued. As per IPOPHIL advice, it should not be considered for incentives, otherwise, budget will be depleted.
- Dr. R. Atole: Can we add, “PSU and College shares in the income derived from commercialization shall constitute fiduciary fund that may only be disbursed for purposes relevant to IP and Technology Transfer of the university and the college, respectively”. (2.) Concerned on the requirements for the IPTTD organizational structure proposed particularly on the officials listed as there seem to be no items / positions available that will fit the Salary Grades stated. Are these items generic in nature like Administrative Officer, or special and specific to IPTTD? Without these items would it be acceptable to the proponents if academic rank holders are designated to the offices mentioned? and (3.) why is there proposed reductions in the incentives from that approved by BOR in 2019? Congrats Engr. Mike and proponents! We really need this policy po and I know this proposal have been through a lot of evaluation and critiquing processes. Thanks to your effort.
- Mr. M. Barbecho: Ok, we will discuss that with the members. As regards to no. 2, may be VP P. Candelaria has an answer.
- VP. P. Candelaria: Actually, during the training, the ones invited are the Pres, V Pres, IP Officers of the University. These are the designations given.

- Mr. M. Barbecho: In the proposal there is an increase in the incentives for invention and will have an additional amount will be awarded if another criterion is fulfilled. However, for UD , it was deleted because, in UM, design is already there. Design per see cannot be utilized. It has no actual output.
- VP P. Candelaria: For invention, an award of 80K will be granted and additional amount will be enjoyed if utilized or commercialized. If all are complied, a total of 116 K will be given to the researcher.
- Mr. M. Barbecho: This proposal is more advantageous to the researcher.
- Dir. R. Tabardillo: Why is commercialization and utilization of books learning materials has no incentives but can be given an IP?
- Mr. M. Barbecho: In here, what is covers is techno award not a copyright.
- Dir. L. Lanciso: The IM may be can proposed a policy for that purpose.
- Dr. M. Bigueja: Copyright is not techno award; it is for instructional materials.
- VP P. Candelaria: This issue is a concern now of IM committee.
- Dr. R. Atole: I suggest that to avoid ambiguity in the implementation once this is approved, to include that awarding for patented works does not disqualify the awardee to claim another award.
- Mr. M. Barbecho: Actually sir, it is included in the proposal under guidelines.
- Ms. J. Cledera: From chatbox- Is new methods included in the IP policy?
- Mr. M. Barbecho: Yes, just like what Dr. Bigueja's work provided it is technology related. This will be evaluated if patentable or not. That is why we are establishing the policy and at the same time the IP office at PSU.
- VP P. Candelaria: If there are no more questions, we can now move for the endorsement of this proposal?

The proposal on the proposed IP PSU Policy was endorsed by Dr. M. Estrella provided that the few comments and suggestions be considered in the revision by the proponents and it was seconded by Dir. R. Tabardillo.

ACTION TAKEN: The Proposal on "IP PSU Policy" was approved for endorsement to BOR by the UREKMC.

2. Proposed Tools for Monitoring Approved RDE Projects/Programs by the RDE Monitoring Team

Presenter: Dr. Michael Clores

Dr. M. Clores presented the proposal.

Queries, Comments, Suggestions

- Dr. M. Bigueja: Is it included in the timeline the approval of PPMP, PR and procurement of the needed materials because it is one of the causes of the delay in completing the research project?
- Dr. M. Clores: We can capture it mam on the qualitative part and we'll consider during the monitoring if what is really the cause of delay.

- Dr. M. Bigueja: Granting that you were able to determine the cause of delay, what is your plan of action?
- Dr. M. Clores: The action will be, to recommend to the VPREKM and to the R&D like for example; is there a need to terminate the project, or what help can be extended to researchers based on the challenges they encounter while implementing the project. The RDE monitoring team will be recommendatory to the Leadership Support Team compose of VP and the Director. We are just on the support side.
- Dr. M. Bigueja: Ok. Thank you. What is the frequency of monitoring? Is it monthly upon approval of the research proposal?
- Dr. M. Clores: Based on our office order, it is monthly. In fact there are projects that we identify that need intensive monitoring.
- Dr. M. Bigueja: I think this proposal is very good since this will monitor all the researches that were approved for implementation.
- VP P. Candelaria: Anymore comments or motion from this body?

Hearing none, Dr. M. Bigueja moved for the approval of the proposal on the tools for monitoring RDE projects/programs by the monitoring team and duly seconded by Dr. A. Millesca.

ACTION TAKEN: The Proposal on "Proposed Tools for Monitoring Approved RDE Projects/Programs by the RDE Monitoring Team " was approved for implementation by the UREKMC.

The chair asked if the body wish to declare a recess or continue with the discussion of the remaining proposal, Dr. M. Bigueja suggested to continue and make it a working lunch break since the meeting is virtual. The body agreed to continue the presentation.

3. Request for the Project second extension and budget realignment and endorsement for the BOR approval

Presenter: Dir. R. Tabardillo on behalf of the proponent Ms. J. Penino, who is not a member of the council
Dir. R. Tabardillo presented the letter of request proposal.

Queries, Comments, Suggestions

- VP P. Candelaria: Any comments?
- Dr. M. Bigueja: Why is the project delayed? It was not affected by pandemic since it started way back 2018?
- Dir. R. Tabardillo: May I ask request resource speaker to answer the question of Dr. Bigueja.
- Ms. J. Penino (Resource Speaker): Let me give the background of the project in addition to what was presented awhile ago. The project had an approved implementation of 1 year period that's april 26, 2018 until april 26, 2019 so it is supposed to be finished by april 26, 2019. However, we requested for the first extension for a period of 6 months so that's from April 27 until October 26, 2019 and in October 29, 2019 we already presented our accomplishments before the panel wherein they provided recommendations in which this recommendations also require funding for us to deliver and to accomplish and together with the expiration of the second extension is also the expiration of the services of the people whom we contracted to help us in delivering the outputs and also during our presentation with the panel October 29, 2019 they inform us to speed up the submission of our liquidation report since the release of the

second tranche fund will not be possible without the liquidation report and so we coordinated with the accounting office and they help us to submit the liquidation report in December 2019 electronically and it was confirmed thru email by CHEd. During the first quarter of 2020 the NCCA was communicating through email and asking us to submit printed outputs since we only submitted electronic copy and we only submitted those that we declared as finished but they are asking for a printed copy a hard bound. So in 2021, CHED called for a meeting of all SUCs with funded research asking to submit an original receipt and then also the liquidation report so this only suggest that the liquidation report that we submitted in December 2019 via email was not honored so with this we connected with the cashier about the receipt but they said that it was release already and can no longer retrieved, instead what was submitted is an authenticated receipt which CHED also approved. In December 2021 we submitted the original receipt together with the printed liquidation report. Now we are requesting this proposal for the project extension and budget alignment so that we can continue with the unfinished activities as presented because we need budget.

- Dr. A. Millesca: Have you consulted the budget for realignment with the budget office?
- Ms. J. Penino: We have not coordinated with Mam Amy yet.
- Dr. A. Millesca: Ok, actually the form we used for realigning the budget is from CHED, they provided us the form.
- Dr. A. Millesca: Are we allowed for the second extension? Are we authorized to allow somebody for another project extension? I don't know if the RDE has a policy on this matter because if it is allowed, then there is first, second, third or fourth realignment.
- VP P. Candelaria: We also allowed extension.
- Dr. A. Millesca: So that is included in our policy regarding extension?
- VP P. Candelaria: We do not have, only for university. But since it is a necessity to continue the project, that is why we allowed.
- Dir. R. Tabardillo: This is an externally funded project.
- Dr. A. Millesca: Is the budget downloaded to PSU or not? Even it is externally funded, once downloaded to PSU, so PSU also has say as regards to realignment. If R&D has no policy, I don't know what will be its consequence. I think it is high time that we have a policy for this extension, up to how many request will be granted.
- VP P. Candelaria: As recipient of externally funded projects, if not completed on the time frame, a request for extension is done.
- Dr. A. Millesca: That is the reason why I suggested to have a policy so that we will be guided as to how many times is allowed to extend to avoid blaming or whatever because the policy is intact. It has also effect on the funding institution and our university too. My point is for the next project implementation. I think VPAF is raising his hand.
- VP P. Candelaria: Ok Sir Arnel.
- VP A. Zarcedo: My concern is the validity of the budget because I heard from the proponent that the project started 2018. The maximum given to us to utilized the budget is 2 years. If we extend, is the budget still available? If we grant extension and the budget already lapsed, so we need to coordinated really with the budget office. I agree to what Dr. Millesca query as regards to budget realignment.

- VP P. Candelaria: Thank you VP Arnel. Yes Pres?

- Pres. R. Bradecina: First of all, may I know what extension is being asked by Ms. Senia on the project for it to be completed. Second; to extend the project for it to be considered by the funding agency / CHED NCA; Third; extend the project since funds is not exhausted / utilized yet. If what Senia wants is to extend the project since it is not yet completed and need to be completed and budget is needed, then the answer is to do a request address to CHED. CHED requires approval of the BOR, BOR requires request approved by the Council. That is the reason why we need to request for extension so that we can request CHED to approve the extension of the project for it to be completed. The Project as what VP Arnel said has validity period. It has to be spent, CHED granted extension but with colatilla , provided there is no additional funding. That is the technicalities of the government, though the project is good. We are asking this extension for our own purpose only, if you will approve, this means you are recognizing the importance of the project. I will allocate support money for that for it to be started. The deliverables enumerated are all good. I think there is a need to prepare again a proposal for the university to approve and allocate money. Like for printing the materials, we can utilize our printing press. On presentation, we can support that and the activities integrated to it. Honorarium, foods, promotion, travel. The critical there is if we need to extend and for CHED to consider funding it again, then we need to ask CHED. What is not good here is, 1. BOR might get angry because the project is aging, 2. CHED NCAA is no longer active because of very limited projects on culture based on what I heard, So the project of Raymond Estrada must be completed too. They are partnership, they have COA too. CHED will not allow us not to clear our obligations / deliverables to them as stipulated in the partnership. Please do tell Raymund to complete the study no matter what the obstacles are. I we need to support, we will, provided that there is a process for that, present a proposal as basis for budget allocation. I would like to listen from Senia, correct me so that I can set a better solution. If CHED approves the extension, then a fund will be granted again, if not then ok. Thank you.

- Ms. J. Penino (Resource Speaker): Actually option 1 is requested. I am requesting this to be recommended for BOR endorsement, because CHED will definitely ask for BOR endorsement if request will be sent to CHED. I already inquire at NCCA about this but they have no reply yet. I ask from a person insider at CHED, the possibility of the request to be granted, and the reply was it will depend because it will be deliberated by the commission en banc. So approval will depend on them. If this will not be approved, then may be we will grab the option 2, for the university to fund the continuation of the project.

- Pres. R. Bradecina: I will campaign for this. I will ask for the approval of this council for this request to reach the BOR. You BOR does not treat request for extension in a nice manner. They always castigate me, but I will gamble because this is part of work I committed as your President. So Senia prepare your justification. I know that what you did about this is substantial and I can defend that. As regards to permission of IP, we have been there with Dean Marit, and they are ok now as compared to before. We will go there again to ask their permission. Since it is oral history / social memory of one civilization of a society, I think we need to ask permission on this. For me, I will support you. I will campaign to this body to approve this and present it to BOR. Thank you.

- Ms. J. Penino (Resource Speaker): Regarding on ownership during the conference and disclosure, if to publish , there is a need to have a meeting on the matter.

- VP P. Candelaria: Any more comment or motion?

The proposal was moved for endorsement to BOR and seconded by Dir. R. Tabardillo.

ACTION TAKEN: The Proposal on "Request for the Project second extension and budget realignment and endorsement for the BOR approval " was approved.

4. CHED GIA R&D Proposal: assessment of mangrove ecosystem services and estimation of the stakeholders willingness to pay in San Miguel

Presenter: Dir. R. Tabardillo then it was continued by Pres R. Bradecina

Queries, Comments, Suggestions

VP P. Candelaria: Any comment?

Pres. R. Bradecina discussed the importance of Mangrove in our ecosystem and the needs to capture this in our curriculum.

Dir. R. Tabardillo moved for the endorsement of CHED GIA R&D proposal entitled assessment of mangrove ecosystem services and estimation of the stakeholders willingness to pay in San Miguel to the BOR and seconded by Dir. L. Lanciso.

ACTION TAKEN: The Proposal on "PCHED GIA R&D Proposal: assessment of mangrove ecosystem services and estimation of the stakeholders willingness to pay in San Miguel " was approved for endorsement to the BOR.

H. Announcement/Matters for Information

1. Dir. L. M. Lanciso presented the status of the approved proposals for 2022 by college and campus.
2. Dir. R. A. Tabardillo presented the Accomplishment and activities for extension
3. The next council meeting is June 2022, VP P. Candelaria extended her thanks to all members who attended, to the ICTMO for their assistance and to the RDE family.

I. ADJOURNMENT

Having no others matters to discussed, the meeting was adjourned at 1:30 A.M.

I hereby certify to the authenticity and correctness of the abovementioned proceedings as far as I heard and understood.

SGD. LUISA M. LANCISO
UREKMC, Secretary

ATTESTED:

SGD. PATRICIA M. CANDELARIA
VPREEA/ UREKMC, Vice Chairman
