Resolution No. 65, s. 2022	▪ OP ▪ Board Secretary ▪ Finance Division ▪ Budget Office ▪ OSAS ▪ All concerned
A resolution approving the inclusion of the Student Regent as regular member of the BOR Academic Committee and BOR Administrative Committee, pursuant to BOR Resolution Nos. 20 and 21, s. 2014, and subject to compliance with applicable rules and laws.	

The proposal "**Establishing a GIS Laboratory for Environmental Studies in Partido State University – Tinambac Campus**" was deferred for further study. The revised proposal may again be submitted to the Board for appropriate action.

Furthermore, the Board requested for information regarding the funded research projects of Partido State University for the past 5 years up to the present (2017 – 2022). The information should contain the status of the projects, the outputs / outcomes, and other accomplishments. If the projects were not successfully completed, the reasons and interventions made by the administration should also be included in the report. The report may be presented in matrix form and should be submitted in the next Board meeting by the VP for Research, Extension and Knowledge Management (VPREKM).

The Board Secretary will directly coordinate to the proponents for the detailed comments of the Board. Excerpt of the minutes will be issued for this purpose.

Everyone is expected to cooperate with the persons or offices concerned for the implementation of the approved resolutions.

For widest dissemination and strict compliance.

RAUL G. BRADECINA, Ph.D.
SUC President III

By the authority of the University President:

ERLINDA M. BASILLA, Ph.D.

ARTICLE 1. POLICY STATEMENT

University Vision

The leading University in geology, bio-resource science and environmental management in the Bicol Region

University Mission

To provide quality instruction in the arts, philosophy, sciences, technology and other relevant courses and create a competitive advantage in research, extension and production services for the socio-economic upliftment of the Bicolanos.

Core Values

P – Passion for Excellence
S – Service for Client Satisfaction
U – Unity for Stability

ISO Quality Policy

The Partido State University commits to provide quality instruction, responsive research and need-based extension services for global competitiveness and satisfaction of its clients, stakeholders, regulatory bodies and other service providers through the continual improvement of the quality management system.

PSU commits and ensures that all IP generated during the performance of the four-fold function: instruction, research, extension, and production be protected through the creation of this IP Policy for the benefit of the institution, IP creators, students, and other stakeholders.

This IP Policy seeks to provide guidelines in accordance with the IP Laws of the country for the protection of all IP generated, facilitate technology transfer and commercialization, and provide solutions to any issues that may arise during the generation of IP and transfer of technology.

ARTICLE 2. POLICY PURPOSE

This IP Policy of PSU sets forth the following purposes:

2.1. To encourage and pursue innovations, inventions, discovery, and other IP creations in PSU;

2.2. To ensure that all IP generated by IP creators and students are protected prior to presentation, publication, or any form of public disclosure;

2.3. To provide an appropriate incentive to the creative intellectual effort of IP creators, students, and stakeholders of PSU;

2.4. To establish principles for determining the interests of PSU, creators, students, clients, and stakeholders with regard to innovations and/or inventions;

2.5. To develop procedures by which the significance of innovations, inventions, and/or discoveries of PSU may be determined and brought to the point of commercialization and utilization;

2.6. To provide the means for placing in the public realm the research results, while safeguarding the interests of the PSU, creators, students, and stakeholders; and

2.7. To recognize the right of the creator to financial benefits from the innovation, invention, discovery, and other IP creation.

ARTICLE 3. DEFINITION OF TERMS

3.1. **"Background IP"** refers to the intellectual property or proprietary information owned by PSU or by its officers and employees which they may bring along to a collaborative undertaking entered into with another party, company, or organization whether local or international. The use of such IP may be allowed subject to terms and conditions specified in the agreement.

3.2. **"Claimant"** refers to the creator who qualifies for claiming incentives.

3.3. **"Collaborative Research"** refers to any research project undertaken together with an external party such as an individual or organization whether local or international, government, non-government, or multi-lateral body.

3.4. **"Creator"** refers to any PSU personnel or service provider who created any intellectual property.

3.5. **"Commercialization"** refers to any form of exploitation of IP, including assignment, licensing, and commercialization through a spinoff venture for which the IP owner receives payments or revenues in the form of royalty fees or other means in exchange for the use of such IP subject to terms and conditions in an agreement.

3.6. **"Confidential Information"** refers to any information which is being kept by PSU at the moment, including oral or visual form; recorded in writing or any other medium or method, and other information and data which PSU is under obligation to keep secret or confidential over an agreed period of time.

3.7. **"Claims"** refers to the extent of protection conferred to a patent or an application.

3.8. **"Due Diligence"** refers to an audit, examination, or review performed by PSU pertaining to IP. This includes examination and review of IP applications to make sure that there is no IP violation, and any investigations conducted before entering into a commercialization agreement.

3.9. **"Enabler"** refers to any PSU personnel who have indirectly contributed to the creation of IP by the creators mainly through the execution of standard tasks or following through on specific instructions but who may not be recognized themselves as the creator of the IP.

3.10. **"Enabling Disclosure"** refers to a disclosure that allows a person skilled in the field in question to work around the invention.

3.11. **"External Party"** refers to any individual or organization whether local or international, government, non-government, or multi-lateral body with which PSU enters into an agreement.

3.12 "**Fairness Opinion**" refers to a summary of an analysis prepared by an independent third party, which indicates whether certain financial elements in a commercialized IP, such as price, are fair from a financial point of view.

3.13 "**Fairness Opinion Board**" refers to a group of experts from public and private sector tasked to review and evaluate the proposed technology transfer.

3.14. **"Foreground IP"** refers to any IP generated pursuant to, or as contemplated in a collaborative undertaking or research agreement entered into by PSU with another party, company, or organization whether local or international. Generally, such IP shall be owned by PSU except if otherwise categorically stated in the collaborative agreement.

3.15. **"Genetic Resources"** refers to any biological material which contains genes and/or metabolic material that may be derived from genes. It includes microorganisms, plant varieties, animal breeds, genetic sequences, nucleotide, and amino acid sequence information, traits, molecular events, plasmids, and vectors.

3.16. **"Government Funding Agency" or "GFA"** refers to any government agency or instrumentality, or government-owned and/or –a controlled corporation that provides research grants, and other technical and material support, from government appropriations and resources and those from government-managed Official Development Assistance (ODA).

3.17. **"Holder of TK" or "Holder"** refers to a traditional community, an individual or a group, irrespective of the pattern of ownership, who owns the traditional knowledge, genetic resource, or expression of folklore in a traditional and intergenerational context, who has a right over or to whom traditional knowledge, genetic resource or expression of folklore belongs in accordance with customary laws and practices.

3.18. **"Invention Disclosure"** refers to the complete description of an invention provided by the inventor intended for patenting.

3.19. **"Inventor"** refers to the PSU personnel who comes up with patentable technology.

3.20. **"IP Assignment"** refers to the transfer of the creator's intellectual property rights (copyrights, trademarks, patents, trade secrets, or other intangible creations) to another so that the assignor is no longer the owner of that right. The assignor cannot, therefore, use the right unless the assignee grants a license back to the assignor.

3.21. **"IP Disclosure"** refers to prompt disclosure of intellectual property of IP creators necessary for effective protection and transfer of technology.

3.22. **"IP Licensing"** refers to an agreement between PSU (licensor) who owns the specific IP rights and a licensee, to whom PSU grants the right to use the IP rights for a limited time within a defined geography.

3.23. **"IP Valuation"** refers to the process used to evaluate the arm's length or fair market value of IP assets.

3.24. **"Lead Creator"** refers to personnel who is primarily involved in or has the most substantial contribution to the creation of an IP amounting to reduction to practice from the point of conception, execution, and testing of methodologies to the development of the product or tangible material.

3.25. **"Net Cumulative Return" or "NCR"** refers to the money or revenue received by or through PSU in relation to the exploitation of the relevant IP, minus payment of fees, royalties, tax, travel, production, development costs, legal fees, expenses of registration, or other protection.

3.26. **"Non-Disclosure Agreement"** refers to an agreement that establishes a confidential relationship. The party or parties signing the agreement agree that sensitive information they may obtain will not be made available or disclosed to any other parties by any means or forms.

3.27. **"Non-Prejudicial Disclosure**" refers to the disclosure (publication of an invention in journals, selling, or discussion in the public) of information contained in the application during the twelve (12) months preceding the filing date or the priority date of the application which shall not prejudice the applicant on the ground of lack of novelty as provided by the IP Code.

3.28. **"Patent Drafting"** refers to the process of writing the patent descriptions and claims.

3.29. **"Patentable Invention"** refers to any technical solution of a problem in any field of human activity which is new, involves an inventive step, and is industrially applicable.

3.30. “**Patent Search**” or **“Patent Information Search”** refers to the search of existing patents and other publicly-available documents, or prior art to locate the closest existing things to the invention.

3.31. **“Premature Disclosure**” refers to the untimely disclosure of information regarding the IP, such as but not limited to publication, presentation in conferences, or discussion with anyone not authorized by PSU, before an application for IP registration has been filed and will prejudice the novelty of the IP.

3.32. **“Prior Art”** refers to everything which has been made available to the public anywhere in the world, prior to the effective date of the IP application. It includes, but is not limited to, public documents such as patents, technical publications, conference papers, marketing brochures, products, devices, equipment, processes and materials.

3.33. **“Prior Art Search” or “Patent Information Search”** refers to an organized review of prior art materials available from public sources which may be used to assess the patentability of an invention or may be a part of due diligence.

3.34. **“PSU IPU”** refers to the PSU Intellectual Property Unit.

3.35. **“PSU Personnel”** refers to all PSU employees such as: permanent, temporary, and contract of service faculty; full-time and part-time faculty; visiting faculty; emeritus faculty; academic and research staff; affiliate and adjunct staff; and non-teaching personnel.

3.36. **“PSU Resources”** refers to all tangible resources provided by PSU to IP creators which includes:

a. Office facilities;
b. Laboratory facilities;
c. Tools and equipment;
d. Computer hardware and software;
e. Support services;
f. Teaching, research, and laboratory assistants;
g. Supplies;
h. Utilities; and
i. Funding and reimbursement for instruction, research, extension activities, and travels

3.37. **"Public Disclosure"** refers to the communication of information relating to IP to the public or any parties. Public Disclosure includes, but is not limited to, disclosure in written or oral form; communication by email; posting on a web blog; disclosure in a news report, press release or interview; publication in a journal, abstract, poster, or report; presentation at a conference; examination of a thesis; demonstration of an invention at a trade show; or the industrial application of an invention.

3.38. **"Reduction to Practice"** with respect to the invention, this involves the critical processes from conceiving the invention, building the working or actual invention or the essential features or technical functions of the invention, constructing or describing the relevant claims of the invention, up to the filing of the patent. With respect to creative undertakings, this involves the processes from conceiving of the idea, the formulation, testing, and execution of methodologies, to the development of the product or creative output.

3.39**. "Regular Duties"** refers to the official duties or functions of the officer, employee, or service provider as spelled out in their job descriptions relative to their employment with PSU, or as may be so specified in their official designations.

3.40. **"Revenue"** refers to a revenue related to the commercialization and exploitation of intellectual property such as licensing fees, royalties, and other types of revenue sharing arrangements.

3.41. **"Serendipitous IP"** refers to an IP generated incidentally in the course of the collaborative undertaking or agreement entered into by PSU with another party, company, or organization whether local or international. Such IP, which was not part of the contemplation of the agreement, shall be owned by PSU, except if otherwise expressly articulated in the same agreement.

3.42. **"Sponsored Research"** refers to any research undertaking by PSU for which funds are sourced from any external party.

3.43. **"Student"** or **"Scholar"** refers to all matriculated undergraduate, graduate, postgraduate, including postgraduate fellows and exchange student at PSU.

3.44. **"Substantial Use of Resources"** or **"Significant Use of Resources"** refers to the use of resources and properties of PSU which are not commonly available to the public. Moreover, use of institution's resources shall be considered significant if:

a. Use of PSU's resources is important for the creation of the IP;
b. Resources used would cost an officer or employee X pesos if paid out of pocket; and
c. If the officer or employee is using committed or official time of PSU.

3.45. **"Technology"** refers to knowledge and know-how, skills, products, processes, and/or practices produced or generated at the level of PSU.

3.46. **"Technology Readiness Assessment"** refers to the process of estimating the maturity of the technology for commercialization. It may also refer to the process of estimating the level of acceptance of the target adopters for the technology.

3.47. **"Technology Transfer"** refers to the process by which one party systematically transfers to another party the knowledge for the manufacture of a product, the application of a process, or the rendering of a service that may involve the transfer, assignment, or licensing of IPRs.

3.48. **"Traditional Knowledge" or "TK"** refers to a living body of knowledge resulting from intellectual activity in a traditional context, which includes know-how, practices, skills, and innovations. TK embodies the traditional lifestyles of indigenous peoples and local communities and is transmitted from generation to generation, often forming part of the cultural and spiritual identity of the community. TK is not limited to any specific technical field, and may include agricultural, environmental and medicinal knowledge.

3.49. **"Work/s"** refers to any intellectual property created by any officer, employee, or service provider in the course of their employment or engagement with the institution.

ARTICLE 4. SCOPE AND COVERAGE OF THE POLICY

4.1. Personnel Covered

This IP Policy applies to all PSU personnel and students who participate in the creation of Intellectual Property at the main campus and other campuses. This policy shall also apply to external parties and other stakeholders.

4.2. IP Rights Covered

This IP policy shall cover all types of Intellectual Property Rights stated under the IP laws of the country such as:

a. Copyright and Related Rights;
b. Trademarks and Service Marks;
c. Geographic Indications;
d. Industrial Designs;
e. Utility Models;
f. Patents;
g. Layout-Designs (Topographies) of Integrated Circuits; and
h. Protection of Undisclosed Information

ARTICLE 5. GOVERNANCE AND OPERATION

5.1 Creation of PSU Intellectual Property Unit (IPU)

To carry out the implementation of the IP Policy and commercialization of PSU IPs, an IPU shall be created with functions and responsibilities specified below.

a. IP Creation:

i. Receive copyright disclosures/invention disclosures and search reports from concerned researchers;
ii. Perform prior art search and/or patent information search to validate the report made by the IP creators within from receipt of the disclosure and search report;
iii. Assign a reference code for every IP disclosed or submitted to IPU and maintain a digital database to keep an inventory of all IP assets;
iv. If the IP is found to be protectable/patentable, prepare the description of the copyright/IP, or draft the specifications of the patent together with the IP creators concerned;
v. Write a recommendation to the University President/Institution Head for the immediate filing of appropriate IP protection, five days after writing the copyright/IP description, or drafting the claims of the patent;

vi. If the IP is not protectable/patentable, advise promptly the IP creators concerned on the next viable course of action;
vii. Manage the entire prosecution process of every IP filed for protection;
viii. Conduct periodic IP audits; and
ix. Conduct IP awareness/IP education activities to the university/institution constituents, service community, industry, and other stakeholders.

b. IP Protection:

i. Upon approval by the President/Institution Head, immediately file the IP for protection (preferably within 10 days from receipt of notice of approval);
ii. Keep track of the entire prosecution process from the filing of the IP and responding to examiner's actions to the granting of the IP right;
iii. Record progress of the prosecution process into the digital database using the reference code for each IP type;
iv. Update the IP creators concerned about any progress in the prosecution process;
v. Manage the maintenance of all IP assets already granted protection (i.e. for patents, payment of annuity fees; for trademark, date of renewal and declaration of actual use, etc.);
vi. Keep a record of the Certificates of Copyright Deposit, Patent Letters, Registrability Reports, or Trademark Registrations;
vii. Keep track of the remaining life-years of all protected IP assets; and
viii. See to the international protection of creative or innovative products (i.e. for patents, through the Patent Cooperation Treaty; for trademarks, through the Madrid Protocol).

c. Utilization and Commercialization:

i. Perform technology analysis to determine the IP's readiness for commercialization using various assessment tools (i.e. NASA's Technology Readiness Level; Quad Analysis; Technology Scoring Tool, Business Model Canvass, etc.);
ii. Perform assessment of IP readiness for market launch using various tools (i.e. Market Assessment Tool; Investment Readiness Level; Community Readiness Level, etc.);

iii. Assess which mode of commercialization (i.e. licensing; joint venture, etc.) is most suitable for the IP asset (i.e. using Path Decision Making Factor or other tools of assessment);
iv. If licensing is the chosen mode, draft the licensing agreement together with the IP creators concerned; and
v. Scout for potential licensees and prepare portfolio briefs;
vi. If spinoff, prepare the business plan together with the IP creators concerned;
vii. Prepare innovation briefs /portfolio profiles together with the IP creators concerned;
viii. Determine the potential value of the IP to be commercialized using the most appropriate asset valuation tools (i.e. cost, income, market, relief from royalty, multiple excesses earning method, etc.);
ix. Prepare the valuation report to be used as the basis for licensing negotiations and drafting the licensing contract;
x. Manage revenue cash flows from all commercialized IP assets.
xi. In collaboration with the accounting office, keep a financial statement for periodic revenue streams per IP asset; and
xii. See to the prompt release of the appropriate revenue shares to the rightful recipients (i.e. IP/Lead creator; enabler; others) based on net cumulative returns.

5.2. Staffing and Duties of the PSU IPU

To be able to effectively and efficiently perform its functions, the PSU IPU may have the following personnel with the corresponding requirements. The number of which depends on the volume of activities that will be handled:

a. Intellectual Property and Technology Officer

i. He/She shall oversees all activities directly related to the management, development and protection of the University's intellectual property.
ii. He/She shall evaluate patentability and commercial viability of University IP assets submitted to the PSU IPU.
Iii. Preferably, he/she has a Certificate Course in Intellectual Property Management or other IP related trainings.
iii. Qualified PSU faculty may be assigned or designated in this position provided that he/she will be given three (3) units de-loading in the instruction.

b. **Patent Agent**

i. He/She shall be responsible in performing search reports, drafting of patent specifications together with the IP creators concerned, and filling of patent applications.
ii. Preferably, he/she has experience in patent searching and patent drafting, or a Certified Patent Agent will be desirable.
iii. Qualified PSU faculty may be assigned or designated in this position provided that he/she will be given three (3) units de-loading in the instruction.

d. Marketing Officer

i. He/She shall be responsible for operationalizing a creative, targeted, and credible messaging strategy to the intended public of PSU IPU's operations and business goals.
ii. He/She shall ensure a sustained social media awareness of the PSU IPU by generating steady website and social media interactions with partners, potential clients, and stakeholders.
iii. Together with concerned IP creators, he/she shall write innovation briefs or IP packaging materials.
iv. He/She shall be responsible in locating suitable commercial development partners and responsible for other commercialization related functions.
v. He/She must be a graduate of BS Marketing, BA Communications, BS Communications Research, or other related discipline.
vi. Qualified PSU faculty may be designated in this position provided that he/she will be given three (3) units de-loading in the instruction.

c. Administrative Assistant

i. He/She shall be responsible for the safekeeping of important office documents, managing office information flow, attending to clients, drafting communications, sending or receiving emails or similar types of correspondence.
ii. He/She shall provide administrative support to the staff of the PSU IPU.
iii. He/She must be a graduate of BA English, BS Office Administration, or other related fields and shall receive a salary equivalent to SG 3.

f. Legal Officer

i. He/She shall provide legal advice to the PSU IPU with regard specifically to business plans, licensing agreements, or commercialization deals to be entered into by the university/institution.

ii. He/She shall likewise review licensing contracts, spinoff/start-up agreements, IP assignments, and other similar ventures to be undertaken by the PSU IPU as to their legal implications and/or compliance with relevant laws, and how such contracts or agreements may be beneficial to the business interest of the university/institution.

iii. He/She must be a member of the Integrated Bar of the Philippines preferably with considerable expertise or practice in corporate law.

ARTICLE 6. INTELLECTUAL PROPERTY (IP) CREATION

6.1. PSU is a state university mandated to deliver the four-fold function: instruction, research, extension, and production. All PSU personnel and students may engage in the creation of IP.

6.2. If PSU personnel has generated any IP from the delivery of four-fold function and the ownership of which is vested to PSU under Article 8 of this policy, or pursuant to any obligation to disclose such IP under any agreement:

a. All research proposals of PSU personnel having patentable technology shall undertake prior art search and shall include the “Review of Prior Art” containing the search report in the proposal as a prerequisite for approval.

b. All IP generated by PSU personnel such as but not limited to instructional materials, modules, manuals, videos, recordings, artworks, posters, flyers, and software shall first undergo evaluation by the Instructional Material Development committee to ensure quality prior to copyright protection.

c. PSU personnel with approved research proposals having patentable technology shall attend orientation on basic IPR, IP Policy, and IP protection prior to the conduct of any research activity.

ARTICLE 7. INTELLECTUAL PROPERTY (IP) PROTECTION

7.1. IP protection is important to PSU since it recognizes the creators' work. The IP could have registrable rights such as patents, trademarks, and design rights; and unregistered rights such as copyright. Once the IPRs are secured, the IP can be utilized, sold, licensed, or shared, thus, creating incentives for PSU to promote and support knowledge transfer.

7.2. PSU personnel who generated an IP shall immediately disclose the details prior to any Public Disclosure:

a. For patentable technology, the creator shall promptly disclose the full details of the IP by submitting an Invention Disclosure Form to the IPU of PSU within fifteen (15) days after the discovery of the invention; and

b. For copyrightable IPs, the creator shall promptly disclose the full details of the IP by submitting a Copyright Disclosure Form to the IPU of PSU within fifteen (15) days after the review of the Instructional Material Development Committee.

7.4. PSU IPU shall assist in the disclosure, and protection of the IP creations of personnel, students, and other stakeholders.

7.5. The PSU IPU shall evaluate the patentability or registrability of the invention through prior art search and/or patent information search within twenty (20) days from receipt of the disclosure report from the concerned creator.

7.6. In case of the collaborative or sponsored research undertaking, protection and expenses for the "Foreground IP" and "Serendipitous IP" generated shall be initiated and shouldered by PSU except if otherwise expressly articulated in the agreement.

ARTICLE 8. OWNERSHIP OF INTELLECTUAL PROPERTY (IP) AND RIGHTS OF USE

8.1. **Respect for Intellectual Property Rights (IP)**

a. All PSU personnel shall be mindful of their conduct with regard to IP and shall promote respect for intellectual property rights (IPR) at all times. As such, they shall not use, patronize, buy, or sell counterfeit products; unlawfully download or have access to protected materials from the internet or elsewhere; or plagiarize the works of others or claim creatorship over works that they have not created.

b. The Human Resource and Development (HRD) of PSU shall be responsible in ensuring that all institution officers, employees, and service providers have abiding respect for IPRs by conducting awareness campaigns, training sessions and other means and mechanisms of values education.

c. The HRD shall likewise ensure that new hires are oriented on the institution IP Policy upon their assumption of office.

8.2. **Ownership of Patent, Utility Model, Industrial Design, Copyright, and other IP**

All IP generated by PSU personnel shall be owned by PSU if it falls under any of the following conditions:

i. The IP derived and generated from the research is funded by GFA in whole or in part as stipulated in RA 10055; or

ii. The IP is generated through substantial use of PSU's resources; or

iii. The IP is generated in the context of collaborative or joint research projects, except if otherwise expressly articulated in the same agreement; or

iv. The IP is generated as part of scholarly works and within the scope of work or official function or designation of PSU personnel.

8.3. **Acknowledgment of Creatorship/Inventorship**

a. PSU personnel shall own the rights to the IP which they generated outside of their regular duties, designations, or special project orders, and without using to a

substantial degree the resources and the official time of PSU. Otherwise, these rights shall be owned by PSU.

b. PSU personnel who are covered by a scholarship contract with institution and were able to develop the IP shall conform to the IP Policy of the receiving university where they enrolled or finished their training/course/degree.

c. PSU personnel, however, shall acknowledge in all documents, which may include but are not limited to academic reports and press releases, that the product was developed as a result of a scholarship contract with institution.

8.4. **Ownership of IP Generated by Students**

a. The students shall own the IP of their theses, dissertations, and scholarly publications if they did not use substantial resources of PSU.

b. The thesis adviser may be a co-creator of the IP provided he or she has substantial input into the scholarly work amounting to reduction to practice, and that the student agrees to such an arrangement.

c. When the student graduates, he has to assign ownership of IP to PSU, subject to certain terms and conditions.

8.5. In case of collaborative or sponsored research undertaking, the Foreground IP, and Serendipitous IP to be generated shall be owned by PSU, except if otherwise expressly articulated in the research agreement.

ARTICLE 9. PUBLICATION, NON-DISCLOSURE, AND TRADE SECRETS

9.1. For the purpose of protection, PSU has the right to decide or delay publication, dissemination, and other form of public disclosure of all IPs owned by PSU.

9.2. The creator shall first seek IP protection of his/her IP through the PSU IPU prior to any form of “public disclosure”, “premature disclosure”, and “enabling disclosure” to prevent loss of IP rights.

9.3. Should PSU enter into any contract with external party, a non-disclosure agreement shall be signed by PSU, the external party, or both parties to protect any “confidential information” making it not available to others.

9.4. All IP creators of PSU shall maintain secrecy to maintain the Trade Secret of a specific IP owned by PSU.

ARTICLE 10. COMMERCIALIZATION AND UTILIZATION OF INTELLECTUAL PROPERTY (IP)

10.1. PSU shall be entitled to assign rights or grant licenses, whether exclusive or not, in respect of the IPs for such periods as it shall deem fit, or make other arrangements relating to such IP as it may deem appropriate in order to facilitate the communication of information for public good.

10.2. PSU shall be entitled to approach, negotiate and enter into any binding agreement with any third party on such terms and conditions as PSU, being the legal and beneficial owner of the IP, shall in its sole and absolute discretion deem fit.

10.3 PSU shall seek fairness opinion from the Fairness Opinion Board to valuate IPs (including full financial due diligence on the underlying business) and review financial structure, type and timing of the deal, financial and tax consequences of the transaction.

10.4. Should PSU derive income from the commercialization of its IPs, the creator shall have a share of the revenues for the PSU taken from the Net Cumulative Return pursuant to the provisions of RA 10055 and RA 8439. Below is the sharing arrangement for the creator, College/Campus, and PSU.

Net Cumulative Return (NCR)	Creator’s Reward (% of NCR)	College/Campus Share (% of NCR)	PSU Share (% of NCR)
PHP 100K or less	60%	20%	20%
Over PHP 100K	40%	40%	20%

10.5. When there are more than one creators, the 60% of the NCR (100K or less) or 40% of the NCR (over 100K) share shall be divided equally among them except where there is a prior written agreement between all the creators to the contrary.

10.6. A revenue sharing of 10% for enabler shall be taken from the Creator's Reward (60% or 40% of NCR). When there are more than one enablers, the 10% share shall be divided equally among them except where there is a prior written agreement between all the enablers to the contrary.

10.7. A revenue sharing of 10% for student who created the IP shall be taken from the College/Campus Share (20% or 40% of NCR). When there are more than one students, the 10% share shall be divided equally among them except where there is a prior written agreement between all the students to the contrary.

10.8. PSU and College shares in the income derived from commercialization shall constitute fiduciary fund that may only be disbursed for purposes relevant to IP and Technology Transfer thrusts of the university and the college, respectively.

ARTICLE 11. TRADITIONAL KNOWLEDGE AND GENETIC RESOURCES

11.1. PSU shall respect, preserve and maintain knowledge, innovations and practices of indigenous and local communities (ILCs) embodying traditional lifestyles relevant for the conservation and sustainable use of biological diversity and shall promote their wider application with the approval and involvement of the holders of such knowledge, innovations and practices.

11.2. PSU shall protect the holder against infringement of the holder's right in relation to traditional knowledge, genetic resources, and expression of folklore; misappropriation; misuse; and unlawful exploitation; and improper grant and exercise of intellectual property rights.

11.3. Traditional knowledge shall be protected by PSU in accordance with this policy if it satisfies the following conditions:

a. The TK is generated, preserved, and transmitted in a traditional and intergenerational context;

b. The TK is distinctively associated with traditional community, individual or group;
c. The TK is integral to the cultural identity of a traditional community that is recognized as holding the knowledge through a form of custodianship, guardianship or collective and cultural ownership or responsibility, whether formally or informally, by customary laws and practices.

11.4. A traditional community shall have the rights to regulate access to its genetic resources; use its genetic resources in an alienable way; share the benefits arising from the utilization of genetic resources; and assign and conclude access agreements.

11.5. The beneficiary of the traditional knowledge shall be the holder and the benefit derived by a traditional community shall be put to the common benefit of the traditional community.

11.6. PSU shall encourage equitable sharing of benefits derived from the utilization of traditional knowledge.

ARTICLE 12. AWARDS AND INCENTIVES

12.1. **Techno Award (Patented, Registered, and Commercialized/Utilized Technologies)**

This award is to be conferred to creator/s whose patentable technology were granted by IPOPhil a Letters Patent or issued a Registration Certificate, utilized by industries and other technology adopters, and commercialized. Incentives for this award are categorized as shown below:

a. For Invention

Patented Invention	80,000.00
Patented and Utilized Invention	6,000.00
Patented and Commercialized Invention	30,000.00
Utilized/Commercialized Invention with Pending Application	36,000.00

i. For a patented invention, Php 80,000. 00 will be awarded to the IP creator/s.
ii. Once the patented invention is utilized, an additional Php 6,000.00 will be awarded to the IP creator/s.

iii. Once the patented invention is commercialized, an additional Php 30,000.00 will be awarded to the IP creator/s.

iv. For invention with pending application but is already utilized/commercialized, Php 36,000.00 will be awarded to the IP creator/s. Once the application is already patented, Php 80,000.00 will be awarded to the IP creator/s.

v. Creator/s who already claimed incentives for "Utilized/Commercialized Invention with Pending Application" shall no longer be qualified for incentives in the "Patented and Utilized Invention" and "Patented and Commercialized Invention" categories after the application is already patented.

b. For Utility Model

Registered and Commercialized Utility Model	10,000.00
Registered and Utilized Utility Model	5,000.00

i. For a "Registered and Utilized Utility Model," Php 5,000.00 will be awarded to the IP creator/s.

ii. For a "Registered and Commercialized Utility Model," Php 10,000.00 will be awarded to the IP creator/s.

iii. Creator/s who already claimed incentives under the "Registered and Utilized Utility Model" category shall be qualified for an additional Php 5,000.00 incentive when the Utility Model is commercialized.

12.2. **Guidelines and Procedures in Claiming the Techno Award**

The claimant of the Techno Award shall consider the following criteria and requirements in claiming the incentives:

a. The patented and/or utilized/commercialized invention should be an output generated from completed research submitted to the PSU Research and Development office as part of his/her college or campus accomplishment within the last eight (8) years.

b. The registered and utilized/commercialized utility model should be an output generated from completed research submitted to the PSU Research and Development office as part of his/her college or campus accomplishment within the last three (3) years.

c. The claimant shall attach and provide the following documents for evaluation:
   i. Copy of the approved research proposal
   ii. Copy of the Patent document (abstract, specifications, drawing, claims, etc.) stamped by IPOphil personnel
   iii. Copy of **Letters Patent** for Invention and **Registration Certificate** for Utility model
   iv. Copy of 1st Publication in the IPOphil eGazette, copy of substantive examination result, and copy of the response to substantive examination result for pending invention application
   iv. Description and utilization report of the invention, and utility model; documentation as proof of utilization; and the identified beneficiaries
   v. Copy of MOA with industry or technology adopters
   vi. Copy of business permit if commercialized
   vii. Report on Return on Investment (ROI)

d. The Research Director upon verification of the document and recommendation by the Vice President for Research, Extension and Knowledge Management shall endorse the Techno Award claimant to the University President for Approval.

e. The claimant will be notified within two (2) weeks of the status of his/her claim; and

f. For the IPs having more the one creator from PSU, cash incentives will be divided based on the following: Lead Creator (60%), and Co-Creator/s (40%). If there are more than one Co-Creators, the 40% cash incentives shall be divided equally among them.

g. The Co-Creator/s shall only be entitled to the 40% cash incentives if a certification showing their respective contribution in the development of IPs is issued by the Lead Creator.

ARTICLE 13. GENERAL OBLIGATION, CONFLICT OF INTEREST, AND CONFLICTS OF COMMITMENT

13.1. PSU personnel's primary commitment of time and intellectual contributions should be to support the education, research, and academic programs of the Institution.

13.2. PSU personnel have a primary professional obligation to act in the best interests of PSU; they should avoid situations where external interests could significantly and negatively affect their work ethic and research integrity.

13.3. It is the responsibility of all PSU personnel to ensure that their agreements with external parties do not conflict with their regular duties and responsibilities in PSU. This provision shall apply in particular to private consultancy and other research service agreements concluded with external parties. Each PSU personnel should make his/her duties and responsibilities clear to those with whom such agreements may be made.

13.4. PSU personnel shall promptly report all potential and existing Conflict of Interest (COI) or Conflict of Commitment (COC) to the appropriate PSU authority, in compliance with applicable COI/COC policies. The PSU authority will be responsible for resolving the conflict or reaching a solution satisfactory to all parties concerned.

ARTICLE 14. DISPUTE RESOLUTION

Any dispute related to intellectual property or arising from the interpretation of this IP Policy shall first be reviewed and settled by the PSU Grievance Committee. If the Grievance Committee is unable to resolve the dispute, it shall then form an Oversight Committee consisting of a nominee each from the parties. The nominees shall then nominate a third member who is acceptable to both nominees. The Oversight Committee shall then settle the dispute with utmost integrity and transparency. In any case, where the contending parties are not satisfied with the resolution reached by the Oversight Committee, the parties shall be free to seek appropriate legal action in a court of law at their own expense.

Any provision contained in this IP policy that are found contrary to the law shall be deemed invalid.

ARTICLE 15. AMENDMENT

The rules and guidelines set out in this IP Policy may be amended by PSU from time to time or as the need arises. PSU shall undertake to notify its personnel and students of the

amendment as soon as the amendments are made. In any case, the amendments shall be in full force and take effect on the date the amendments have been announced by PSU.
