Republic of the Philippines

PARTIDO STATE UNIVERSITY

I. Title of Proposal:
ADDENDUM TO THE "PUBLICATION AWARD" AND THE "TECHNOLOGICAL INVENTION AWARD:" CONFERMENT OF PLAQUE/CERTIFICATION DURING THE ANNUAL UNIVERSITY AWARDS

II. Proponent: **Dr. Bernadette G. Gumba**

III. Rationale:

The Partido State University, through the passionate and innovative leadership of President Dr. Raul G. Bradecina, has made giant leaps to advance the research agenda of the region and the nation. Consequently, these and other investigative engagements of the university have produced significant addition to new knowledge and development of science. Therefore, it is vital that the faculty-researchers constantly endeavor to disseminate their findings particularly through publication.

Publication is a major deliverable of the university in its Physical Targets, SUC Levelling standards, qualification requirements for PBB, and qualification requirements for the granting of CNA, among others. Publication is at the core of RQAT and AACCUP standards. RQAT requires the faculty to publish in scholarly journals, ensure maximum utilization and dissemination of research outputs. Moreover, AACCUP evaluation indicators include recognition of faculty publication particularly on Area 2 on Faculty, Area 3 on Curriculum and Area 5 on Research. Therefore, every time a faculty publishes successfully, such accomplishment benefits the entire university and its members a multiple-fold.

Recognizing the faculty for one's publication and/or technological invention during the Annual Awards shall serve as a public pronouncement of the prime importance that the university places on publication/invention and public pronouncement of gratefulness of the university to the faculty concerned.

It is in the foregoing discussion that, as an addition to the existing monetary incentives, this proposal seeks the conferment of a plaque or certificate to the concerned faculty during the Annual University Awards.

IV. Objectives. The proposed policy aims to:

1. Grant institutional recognition to the faculty who succeeded in publishing and/or securing patent for their research/invention work in accordance to the policy of the university on research and development;
2. Provide an official documentation of the exemplary performance of the faculty through a plaque or certificate award;
3. Express deep gratitude to the faculty who contributed to the attainment of a major university target that cuts across multiple standards and requirements, not only for one's own benefit but for the entire institution and its members;
4. Manifest the prime importance that the university renders to the publication/invention success of the faculty.

V. The Proposal

It is hereby proposed that the university, through the Office of the VP for Research, Extension and Knowledge Management (OVPREKM), will confer a plaque/ certificate of recognition during the Annual University Awards to the faculty who has published or secured patent for invention.

Mechanics:
1. The publication/patent falls within the year covered by the university awards;
2. The publication/patent is approved by the Research and Development Office;

3. A **plaque of recognition** will be conferred to the faculty who published their research in a journal indexed by Elsevier's Scopus, Clarivate's Web of Science Core Collection (Science Citation Index Expanded, Social Sciences Citation Index, Arts & Humanities Citation Index, Emerging Sources Citation Index, Conference Proceedings Citation Index, Book Citation Index, Current and Chemical Reactions and Index Chemicus), **and** ASEAN Citation Index. The same award will be conferred to research articles published with CHED-JIP or recognized journals.

4. A **certificate of recognition** will be conferred to the faculty who published their research in an international refereed journal but not included in those listed in no. 3 above.

5. A **plaque of recognition** will be conferred to the faculty who has secured an official patent for one's technological invention from the agency or organization duly recognized by the Research and Development Office.

VI. Effectivity: Upon approval by the University Research, Extension and Knowledge Management Council (UREKMC) on May 26, 2021.
