MANUAL FOR THE OPERATION OF UNIVERSITY RESEARCH, EXTENSION AND KNOWLEDGE MANAGEMENT

Effectivity Date:

OCTOBER 16, 2020

Rev. No.:

00

Republic of the Philippines
PARTIDO STATE UNIVERSITY
Goa, Camarines Sur

RESOLUTION PASSED DURING THE 78th REGULAR BOARD OF REGENTS MEETING HELD ON OCTOBER 16, 2020 VIA ZOOM

Resolution No. 70, s. 2020

A resolution approving the proposed revision of the Manual for the Operation of University Research, Extension and Knowledge Management, subject to compliance with existing laws and applicable government issuances.

I hereby certify to the correctness of the afore-going approved resolution:

LEIH ANNE R. ODOÑO
Board Secretary V

ATTESTED:

RAUL G. BRADECINA, Ph.D.
SUC President III

MESSAGE

Consistent with its mandate and vision to catalyze sustainable development in the service area and to build its reputation as a knowledge hub and laboratory of innovation, Partido State University relentlessly build a cadre of university faculty with strong passion for research, development and extension (RDE) over a short period of time. Along with this, thematic areas for research and extension services that address the needs and issues of the area were also crafted to provide directions to achieve sustainable development.

A critical element that will put these RDE assets and directions to work to achieve this noble end is an operations manual that provides guidance for correct, reasonable and efficient performance of individual functions in the University research, extension and knowledge management.

This manual documents the University' approved standard procedures for generating new knowledge, developing technologies, implementing community extension services and disseminating them in our pursuit to contribute to the sustainable development of the service area, and for nurturing research culture and upgrading the reputation of PSU as a research university as well. As a knowledge base of university research, extension and knowledge management, it will guide our faculty researchers and support personnel to reliably and efficiently conceptualize, implement, monitor and evaluate RDE projects with consistent results and impacts.

Crafted through popular participatory process that recognize stakeholdership and strengthened by pertinent directives of our regulatory bodies to uphold accountability, it is hoped that this Operations Manual will provide the enabling environment in the university for our faculty members and support personnel to passionately engage in implementing meaningful, relevant and impact-oriented RDE and knowledge management work.

RAUL G. BRADECINA, PhD
SUC President III

PREFACE

The Manual for the Operation of University Research, Extension and Knowledge Management is designed for three reasons – first is to develop a common "language" for increased cross disciplinary researchers and extensionists for their knowledge sharing; second to respond to the emerging needs of the service area relevant to the local, regional and national research, extension and knowledge management agenda; and third to comply with accreditation requirements such as AACCUP and ISO.

This is a revised edition of the approved Extension Manual (BOR Res. No. 05, s. 2007), and Manual for the Operation and Management of University Researches (BOR Res. No. 60, s. 2009). This was further strengthened by ISO 9001:2015 Research and Extension Work Instructions, and the BOR approved: (1) Creation of the University Research, Extension and Knowledge Management Council (BOR Res. No. 43, s. 2018) where the same BOR Resolution led to the creation of the Knowledge Management Division; (2) Updating/Revision/Addition of Research and Extension Incentives and Awards; and (3) Establishment of RDE Centers.

The Manual for the Operation of University Research, Extension and Knowledge Management outlines the overall functions, processes and manning of the research, extension and knowledge management divisions broken down into the following major sections: (1) University Research, Extension and Knowledge Management; (2) Research and Development Division; (3) Extension and Community Services Division; and (4) Knowledge Management Division.

PATRICIA M. CANDELARIA
Vice President for Research, Extension &
Knowledge Management

I. UNIVERSITY RESEARCH, EXTENSION AND KNOWLEDGE MANAGEMENT

I. UNIVERSITY RESEARCH, EXTENSION AND KNOWLEDGE MANAGEMENT

A. VISION, MISSION, GOALS AND OBJECTIVES

Vision

A technologically capacitated research hub and public-oriented service center in the region that continuously generates, and transfers knowledge and technology to transform communities and promote sustainable development

Mission

1. Contribute to the expansion of knowledge in key disciplines of the University
2. Support knowledge-based development planning of local communities
3. Promote sustainable ecosystems and resource utilization
4. Develop sustainable agro-fishery and livelihood technologies
5. Sustain knowledge and best practices dissemination
6. Strengthen active international research collaboration
7. Enhance household incomes and alleviate poverty in resource dependent communities
8. Support sustainable community-based development projects and resource-based rural enterprises
9. Empower and promote accountability of stakeholders
10. Mainstream multisector participation in collective decision making process
11. Educate public about the environment, sustainable resource utilization

Goals

1. Growth of knowledge and enhancement of instructions in geology, bioresource sciences, environmental management, Partido culture and history, and relevant disciplines such as education, computational science and engineering, business and accountancy
2. Localized and community-specific development intervention planning and implementation
3. Socioecological resiliency, sustainable resource utilization and proactive socioecological behaviors of stakeholders
4. Increased agro-fishery productivity, profitable livelihood and relevant collective enterprises
5. Increased environmental awareness and adoption of best practices in knowledge dissemination
6. Engaged scholarship and pro-active research programs and directions among faculty members and students in the university
7. Sustainable livelihood promotion and enhancement of household incomes and alleviation of poverty
8. Strong partnership with LGUs
9. Empowered and accountable stakeholders and resources users
10. Dynamic community based resource management councils and people's organization
11. Established institutional frameworks and mechanisms for resource and ecosystem governance
12. Sustainable behaviors in resource dependent communities

Objectives

1. To implement researches that will contribute to the expansion of knowledge in geology, bioresource sciences, environmental management, Partido culture and history, and relevant

disciplines such as education, computational science and engineering, business and accountancy

2. To implement researches on social issues and drivers of social change in rural and urban upland and coastal areas to promote deeper understanding of dynamics of communities in transitions and development
3. To provide responsive researches that promotes ecological resiliency, sustainable resource utilization and positive socioecological behaviors of stakeholders
4. To provide sustainable technologies that enhance agro-fishery productivity, livelihood profitability and collective enterprises
5. To disseminate new knowledge and best practices through publication, paper presentations, and symposiums
6. To actively engage with international research and academic institutions for knowledge co-creation and promotion of engaged collaboration to enhance existing curriculums or develop new frontiers in research and instruction adopting futures thinking approach
7. To capacitate upland and coastal communities with sustainable livelihood skills that will enhance household incomes and alleviate poverty
8. To provide technical expertise to local government units and communities in conceptualizing, analyzing and implementing sustainable community-based development projects and resource-based rural enterprises
9. To capacitate resource dependent communities and stakeholders in organizational management and participatory resource governance to promote empowerment and accountability
10. To develop institutional frameworks and mechanisms for resource and ecosystem governance to mainstream multi-stakeholders' participation in collective decision making process
11. To provide public education about the environment, sustainable resource utilization through IEC development, social marketing and performing arts to promote sustainable behaviors in resource dependent communities

B. UNIVERSITY RESEARCH, EXTENSION AND KNOWLEDGE MANAGEMENT COUNCIL

By virtue of the BOR Res. No. 43, s. 2018 the University Research, Extension and Knowledge Management Council (UREKMC) was created. The functions of the existing Research and Development and Extension and Community Services Divisions of the university were further strengthened. The same BOR resolution led to the creation of the Knowledge Management Division. The University Research, Extension and Knowledge Management Council, a policy-determining body and clearing house of the University as far as research and development, extension and community services, and knowledge management is concerned (Fig 1a).

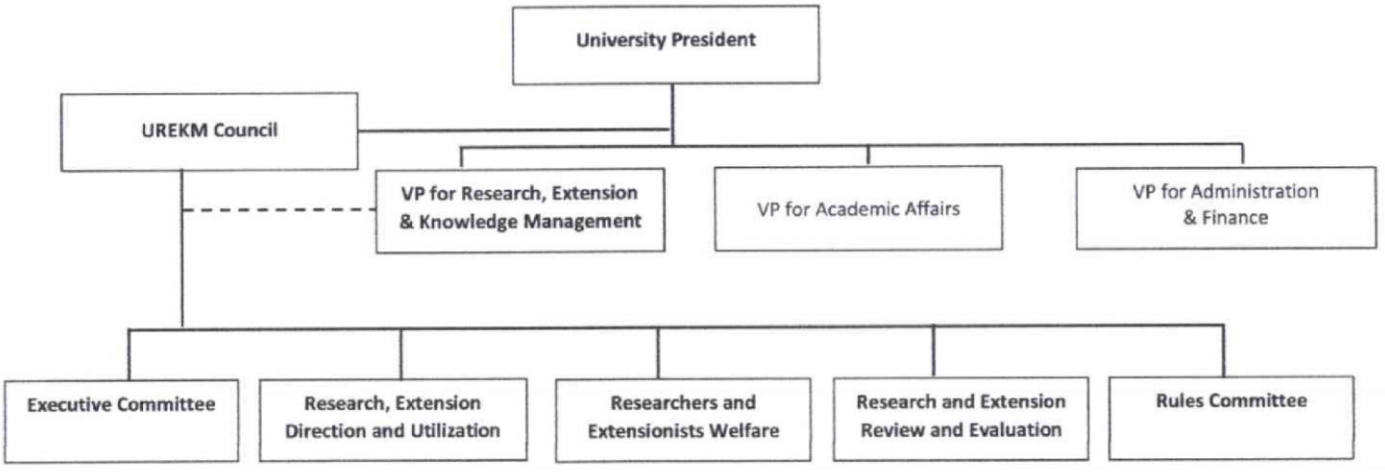

Figure 1a. Organizational Structure of the UREKM Council

Composition of the UREKMC

The UREKMC shall compose of the:

1. University President as Chair
2. Vice President for Research, Extension and Knowledge Management as Vice Chair
3. Vice President for Administration and Finance
4. Vice President for Academic Affairs
5. Director for Research & Development
6. Director for Extension & Community Services
7. Director for Knowledge Management
8. Planning Director
9. College and Campus Deans
10. RDE Center Directors
11. Budget Officer
12. Finance Officer
13. Data Protection Officer; and
14. Faculty with academic rank of Assistant Professor IV and above are automatic members of the Council.

Powers and Functions

The UREKMC shall have the following powers and functions:

1. Formulate policies, guidelines, rules and regulations governing research and development, extension and community services, and knowledge management and recommend it to the Board of Regents (BOR) for approval through the University President;
2. Determine the research and development, extension and community services, and knowledge management priorities of the university;
3. Allocate available funds for research and development, extension and community services, and knowledge management activities;
4. Initiate appropriate actions for the establishment of institutional linkages with other foreign or local institutions for the development of research, development and extension activities of the university;

5. Review and recommend amendments to improve established policies and guidelines for research & development, extension & community services and knowledge management for the approval of the Board of Regents through the University President;
6. Formulate policies pertaining to incentive systems for researchers, extensionists, inventors and demonstration projects; and
7. Provide technical support to university researchers and extensionists in accessing the internally/ externally funded programs and projects.

Officers

The UREKMC is presided by the University President. The University President may commission the Vice President for Research, Extension and Knowledge Management to preside the meeting, and, in the absence of both, the Director for Research & Development shall take over. The Director for Research and Development shall be Ex-Officio Secretary of the Council whose function shall be the same as for those specified for the position in the Administrative Council. In his/her absence or where he/she is designated as presiding officer caused by the absence of the University President and the Vice President for Research, Extension and Knowledge Management, the Director of Extension and Community Services shall sit as Secretary of the Council.

Meetings and Quorum

The Council shall conduct one regular meeting, at least per quarter which may be called by the University President or upon the written request of the Vice President for Research, Extension and Knowledge Management. Attendance in all its meeting shall be required of every member of the Council and only for meritorious and justifiable reasons shall a member be excused from attendance. Proxies may be allowed without voting powers.

A quorum of the Council shall consist of a majority of all its members, excluding those on official travel or leave, and a majority vote of all members present shall be required to dispose a question or decide an issue, unless otherwise provided for under parliamentary rules.

Committees

The Research, Extension and Knowledge Management Council may create committees, as it may deem necessary, for the proper performance of its functions. The committees with duties and responsibilities (UREKMC Res No. s. 2019).

Executive Committee (1) Convenes to decide urgent matters for the council when it is impractical to wait for a meeting of the entire UREKM council at its next meeting; (2) Reviews the items previously acted upon by UREKMC committees and determine the agenda of the UREKMC Meetings; (3) Approves the membership in each committee upon recommendation by the VPREKM; and (4) Approves research, extension and knowledge management related designations upon recommendation by the appropriate official.

SUC President III, Chair
Vice President for Research, Extension, Extension & Knowledge Management
Vice President for Academic Affairs
Research and Development Director
Extension and Community Services Director
Knowledge Management Director
RDE Center Directors
Chair, UREKM Standing Committees

Research, Extension Direction and Utilization Committee (1) Reviews policy proposals concerning Identification of research, extension and knowledge management thrusts and priorities; (2.)

Reviews policy proposals for University- developed technologies for piloting, demonstration and commercialization; (3) Review policy proposals for research and extension presentations, publications; and information systems; and (4) Reviews policies for training and other research and extension activities.

Vice President for Research, Extension, Extension & Knowledge Management, Chair
Research and Development Director
Extension and Community Services Director
Knowledge Management Director
Concerned RDE Center Director
Planning Director

Researchers and Extensionists Welfare Committee (1) Reviews items particularly on matters relating to researchers' and extensionists welfare such as workload units, incentives, honoraria, working condition, trainings and social protection/insurance; and (2) Review and evaluate policies on RDE awards and incentives.

College/Campus Deans, Chair/Members
Accountant
Budget Officer
Human Resource Development Officer/Human Resource development

Research and Extension Review and Evaluation Committee (1) Reviews and evaluates the proposals within their areas of concern that are submitted by the researcher/extension proponents; and (2) Reviews and evaluates research and extension reports and identifies those for possible publication and dissemination.

Research and Development Director, Chair-Research
Extension and Community Services Director, Chair-Extension
Vice President for Research, Extension, Extension & Knowledge Management
Knowledge Management Director
GAD Focal Person
Faculty Expert* by discipline
** A Faculty (1) who has implemented funded research/extension projects/program; and (2) preferably with research/extension publication in the last 3 years*

Rules Committee (1) The committee on rules shall be responsible in interpreting, amending the council's internal rules and assist the council chair in enforcing them; (2) The committee shall also serve as arbiter in case of conflict in the interpretation of the rules; (3) Assist the presiding in enriching rules; and (4) Train members on application of parliamentary law (UREKMC Res 2020).

The chair and member are faculty experts (1) who has implemented funded research/extension projects/program; (2) preferably with research/extension publication in the last 3 years; and (3) with experience or background in parliamentary procedures.

The Chair of each committee will be elected from among its members during the first members during the first meeting to be convened by the VPREKM.

Organization and Management

Figure 1b shows the organizational structure of the University Research, Extension and Knowledge Management Council.

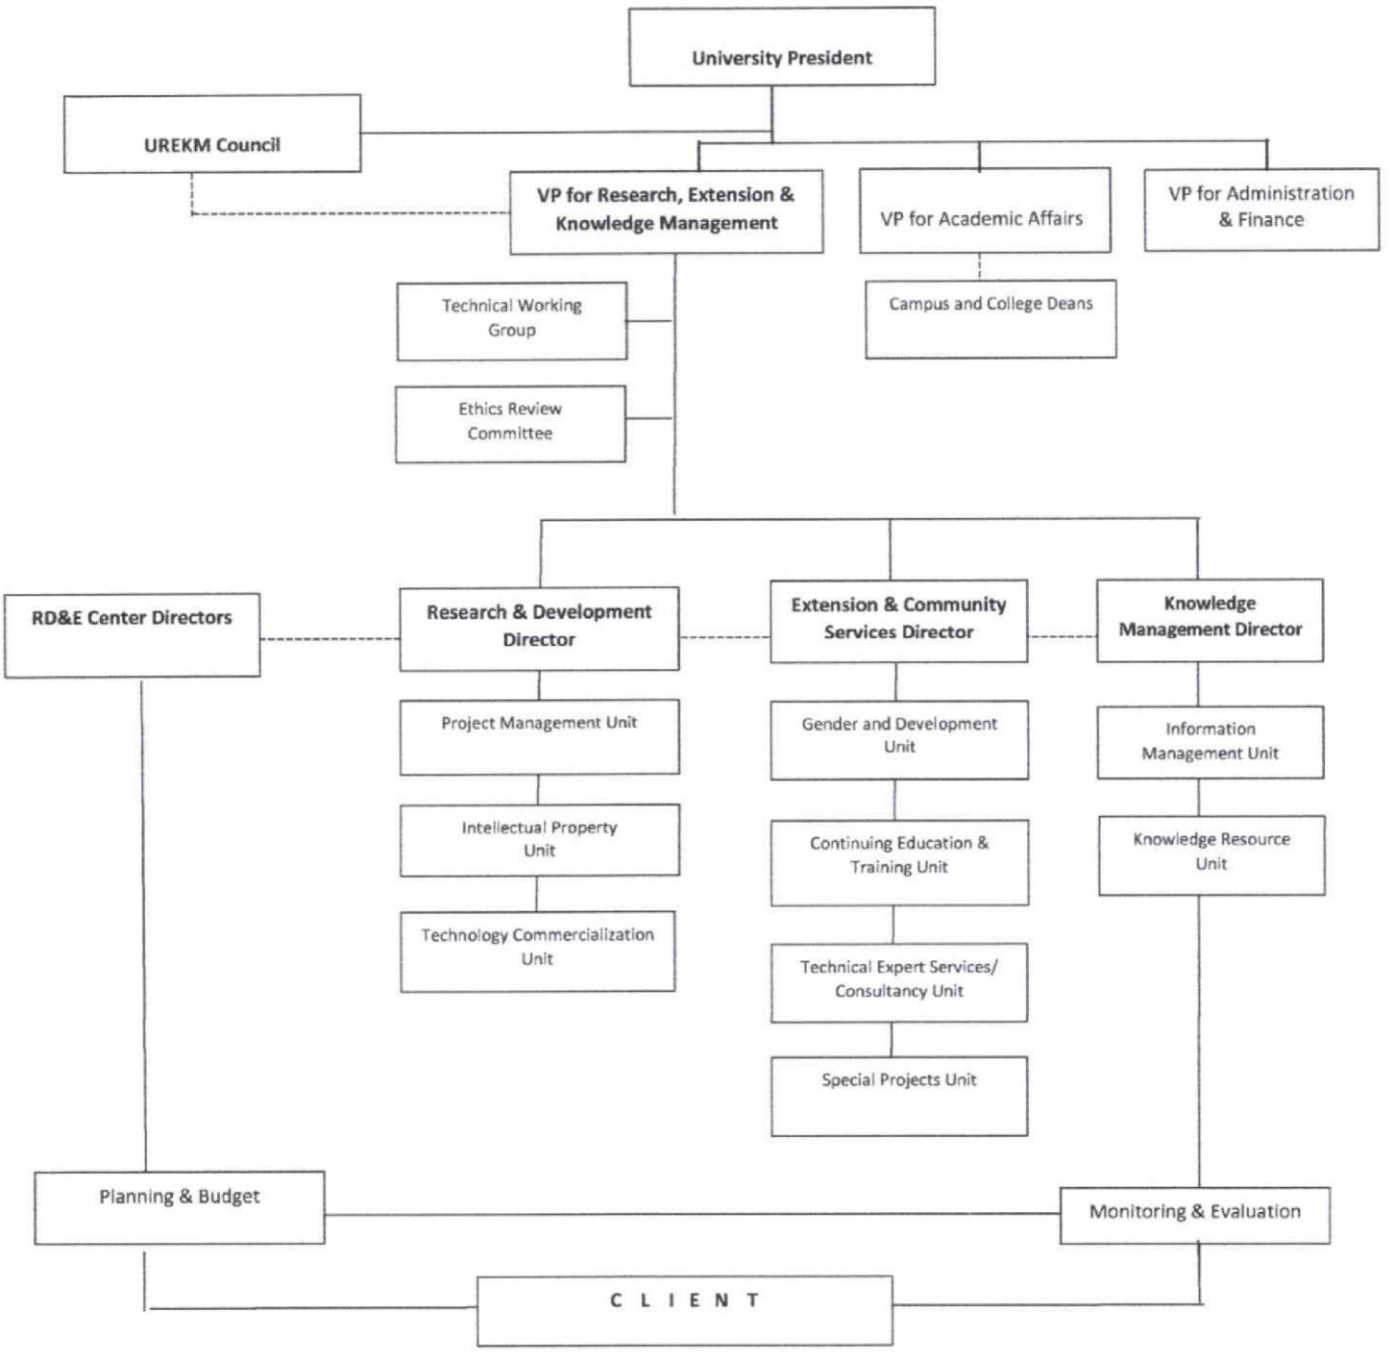

Figure 1b. University Research, Extension and Knowledge Management Organizational Structure

University President

The University President is the Chief Executive Officer of the University system. Supporting him/her in the research, extension and knowledge management (REKM) structure is the University Research and Development, Extension and Knowledge Management Council. The overall REKM Program is headed by the University President where he executes University REKM policies and guidelines approved by the BOR.

Vice President for Research, Extension & Knowledge Management (VPREKM)

The Vice President for Research, Extension and Knowledge Management shall be designated by the University President, subject to the confirmation of the Board of Regents. One shall have the appropriate doctoral degree in philosophy or science with an academic rank of at least Professor I, with at least three (3) years of research and extension experience and at least three (3) years of administrative experience. The term of Office shall be for one (1) year, subject to reappointment.

Duties and Functions of VPREKM

a. Assist the University President in directing and coordinating research, extension and knowledge management programs of the University;
b. Oversee the development and implementation of research, extension and knowledge management programs of the University;
c. Serve as Vice Chair of the UREKMC;
d. Initiate innovative techniques for efficient planning, implementation, performance evaluation and reporting of research, extension and knowledge management activities in the University;
e. Effect increased output of technical and popular publications and implement an extensive and efficient distribution system;
f. Coordinate staff development in research, extension and knowledge management professional categories;
g. Assist in resource generation and in the establishment of inter-institutions linkages in research, extension and knowledge management; and
h. Perform other related functions as may be directed by the University President.

Research and Development Director (RDD)

The Director for Research and Development shall be designated by the University President subject to the confirmation of the Board of Regents. The Director have at least the appropriate doctoral degree with an academic rank of at least, Associate Professor with at least three (3) years of research and development experience, and at least three (3) years of administrative experience. The office shall require a term of one (1) year, subject to reappointment.

Duties and Functions of RDD

1. Assist the VPREKM in directing, coordinating and consolidating the research programs of the colleges and campuses, and specialized units;
2. Assist the VPREKM in the formulation of research policies and strategies of research and development of the University;
3. Assist the VPREKM in strategic planning to determine major thrusts of the University research programs to create impact on target clientele;
4. Assist the VPREKM in packaging research programs for funding;
5. Assist the VPREKM in generating external funding;
6. Assist the VPREKM in establishing linkages with other universities, colleges, and other local and international agencies for enhancing research capabilities of the University;
7. Facilitate the review of the faculty research proposals in coordination with the Campus/College Deans and recommends funding thereof until approval of the University President;
8. Manages the college/campus research programs/projects with the program/project/study leaders in close coordination with the Deans;
9. Coordinate all R&D activities of the University, including those of the colleges and campuses;
10. Conduct periodic monitoring and evaluation of the research activities of the University and submit recommendation to the VPREKM;
11. Recommend training/seminars that would enhance the research capability of the University; and

12. Monitor the accomplishment of the Office vis-à-vis the University targets for operational plan, normative funding, SUC levelling, and quality objectives.

Extension and Community Services Director (ECSD)

The Extension and Community Services Director shall be designated by the University President subject to the confirmation of the Board of Regents. The Director have at least the appropriate doctoral degree with an academic rank of, at least Associate Professor with, at least three (3) years of research and development experience and at least three (3) years of administrative experience. The office shall require a term of one (1) year, subject to reappointment.

Duties and functions of ECSD

1. Assist the VPREKM on matters pertaining to policy and strategy formulation of Extension programs of the University in accordance with institutional targets;
2. Assist the VPREKM in strategic planning for extension in determining major thrusts of the university extension programs to create impact on target clientele;
3. Assist the VPREKM in packaging extension programs/projects/activities for funding;
4. Assist the VPREKM in establishing linkages with other universities and college and other local;
5. Manage the colleges and campuses extension programs with extension coordinators in close coordination with the respective Deans;
6. Conduct periodic monitoring and evaluation of the extension activities of the University and submit recommendation to the VPREKM;
7. Conduct capability enhancement training/seminars for faculty engaged in extension work; and
8. Encourage faculty engaged in extension work to participate in the call for paper presentation for their extension programs sponsored by local, national, and international agencies.
9. Prepare and submit consolidated action plan from different colleges and campuses to the VPREKM; and
10. Ensure the attainment of the target of the office.

Gender and Development (GAD) Focal Person

Duties and Function of GAD Focal Person

1. Institutionalize gender policy support for gender and development;
2. Conceptualize and implement gender-based research and extension projects;
3. Organize groups to empower the marginalized sector of the society especially the women and children;
4. Prepare Annual Gender and Development Plan;
5. Submit required reports to CHED, DBM, COA and other agencies; and
6. Perform other related functions.

Knowledge Management Director (KMD)

The Knowledge Management Division shall be headed by a Director appointed by the University President, and holds office for a term of one (1) year, subject for reappointment. This facility is a support facility for knowledge management of information, technology and data bank, to include development of IEC materials for training and advocacies (print, e-learning materials, and tri-media materials).

Duties and Functions of KMD

1. Formulate and recommend a well-organized and directed program of the University knowledge management programs;

2. Provide processed information that are useful in the rational planning and decision-making for research, extension and knowledge management; and
3. Plan, develop and maintain RDE information system for the University.

Research and Extension (RDE) Centers

Each RD & E Centers will be headed by Center Director appointed by the University President, and holds office for a term of one (1) year, subject for reappointment.

1. Coastal and Wetland Ecosystems Center for Research and Management *(BOR Res. No. 26, s. 2014)*
2. Water Resource Engineering and Hydrology Center
3. Center for Sustainable Communities (*BOR Res. No. 73, s. 2018)*
    a. Tourism Studies
    b. Public Safety
    c. IP Studies
4. Center for Partido Studies (*BOR Res. No. 12, s. 2020*)
5. Sloping Land Science Center
6. Food Science and Innovation Center
7. Agriculture and Marine Bio-technology Center
8. Small Enterprise and Appropriate Technology
9. Community Studies and Rural Development Center
10. Marine Protected Area, Social Science and Riverine Center
11. Partido Statistics Center (*BOR Res. No. 71, s. 2019*)
12. Center for Bio-Resource-Based Enterprise Development (*BOR Res. No. 14, s. 2019*)

Research and Development, Extension and Community Services, and Knowledge Management Division

1. **Research Management Division**
    a. Project Development Unit - Develops and manages research and extension projects for internal and external funding
    b. Intellectual Property Rights Unit - Assists in the evaluation, application, processing and protection of intellectual properties, and coordinates with other offices that are involved in the exercise of such function.
    c. Technology Commercialization Unit
        i. Connect faculty with companies, licensing technology for the development of new products and services that benefit the public good to foster economic growth and generate revenue that supports the University's research and extension goals.
        ii. Take charge of pre-assessment and socio-economic surveys prior to the implementation of technology projects.
        iii. Assist in the conduct of trainings, establishment of community-based demo projects at the same time monitor and evaluate field level activities.
        iv. Consultancy, coaching, mentoring and advisories will be part of services for the transfer, application and commercialization of technologies.

2. **Extension Management Division**

    a. Continuing Education and Training Unit - Plans and implements training, skills for the development of the beneficiaries
    b. Technical Expert and Consultancy Services Unit
    c. Gender and Development Unit
    d. Special Projects Unit (*Externally Funded Projects*)

3. **Knowledge Management Division**

a. Information Management Unit
   i. Prepare plans, projects and strategies for the development;
   ii. Formulate, coordinate, and implement policies and guidelines related to research and extension data collection, processing, and data banking;
   iii. Conduct annual collection, collation, consolidation, storage, and analysis of data and information from research and extension division in coordination with campuses and colleges;
   iv. Provide technical assistance to the campuses and colleges on the data collection, processing and data banking needs of the University;
   v. Manage/maintain databases to enable continuous online access of research and extension data;
   vi. Prepare annual university RDE statistical bulletin and directory of RDE Programs and Projects;
   vii. Prepare university RDE data projections and other related statistics as required by the stakeholders in support to the policy formulation and decision-making;
   viii. Collect, generate, and monitor RDE indicators gathered from campuses and colleges; and
   ix. Coordinate with the concerned campuses and colleges for statistical standards uses in aggregating data.

b. Knowledge Resource Unit
   i. Performs quality checks on manuscripts and final printed products worthy of publications and initiate administrative processing for printing;
   ii. Conduct researches and prepare write-ups for the production University key publications;
   iii. Conceptualize, designs and develops or produce information, education and communication materials for special events and other RDE related activities per target audience; and
   iv. Collaborate with campuses and colleges for the conduct of information dissemination campaign for university RDE data products, services, and activities.

Research & Extension Monitoring and Evaluation Unit (RDE M & E)

The RDE Monitoring and Evaluation Unit shall be headed by a Chairperson and shall be appointed by the University President upon recommendation of the VPREKM, and Directors for Research, Extension & Knowledge Management. Holds Office for a term of one (1) year, subject for reappointment. The Chairperson reports to the Directors for RD & E and coordinates with Campus & College Deans, Division Chairperson/ Coordinators, other Unit/Division Directors, and line agencies.

Duties and Functions of RDE M & E

1. Monitoring. (i) Recommend policies and guidelines for effective monitoring and evaluation of R & E proposals and projects implemented; (ii) Conduct regular monitoring and assessment of R&E projects/activities, make feedbacks and recommendations for effective project implementation; and (iii) Prepare RD & E updates and regular reports / feedbacks on the University R & E.

2. Evaluation (i) Receive, pre-evaluate program/project/study/proposals for research and extension Technical Working Group (TWG) evaluation; (ii) Act as secretary during TWG evaluation of research and extension proposals; (iii) Compile and prepare REKM reports; (iv) Supervise and coordinate the regular conduct of RE Project Evaluation and In- House Reviews; (v) Recommend generated technologies/information for dissemination based from recommendation in reviews; and (vi) Do other functions as delegated by higher authorities.

Technical Working Group (TWG)

The Technical Working Group shall be appointed by the University President upon the recommendation of the VPREKM and holds office as an Ad Hoc Committee. The members of the group shall be technically competent faculty researchers and extensionists. The specific function of the TWG is to evaluate, screen and consolidate proposals on the different thrust identified by the University.

Ethics Review Committee (ERC)

The ERC shall be composed of the Vice President for Research, Extension and Knowledge Management, Director for Research & Development, Director for Extension and Community Services, Director for Knowledge Management, Medical Health Officer, GAD Focal Person, RD&E Center Directors, Data Information Officer and two independent/external representatives from LGU and Religious Group.

Duties and Functions of ERC

1. The ERC will review the ethical acceptability of different types of research studies to be undertaken by PSU students, faculty and staff involving human and animal participants/subjects that specifically deal on: clinical trials, epidemiology, social science research, research on medical records or other personal information, stored samples, health systems, and implementation research.

2. The committee shall evaluate the research proposal as to the conduct of research/methodology, research participants or involved communities specifically on the following: (i) Predictable risks; (ii) Anticipated benefits; (iii) Provisions relating to the care and protection including the treatment of any participant harmed by the research; (iv) Recruitment and selection; and (v) Provisions for protecting the security and confidentiality of data.

3. The committee will review submitted proposals and may approve and exempt from further review, approve but require further submission, or disapprove the proposals: (i) If the capsule research and extension proposals are approved a detailed research and extension proposal shall be required; (ii) Disapproved capsule proposals shall not undergo further review; and Capsule research and extension proposals which need modifications must be rectified and complied before the detailed research and extension proposals shall be required for submission.

4. The ERC shall communicate to the proponents their decisions of the conducted review. Principal investigators will also be notified of their submission of progress report/s, final, and early termination report/s; receipt and management of submissions.

C. UNIVERSITY RESEARCH AND EXTENSION DIRECTION and FOCUS for 2020-2022

(UREKMC Res. No. 11, s. 2020)

With the government realignment of financial resources towards addressing the challenges of COVID 19 pandemic and for the Partido State University to make its Research and Extension programs relevant and responsive to these challenges, the RDE Agenda has been realigned to these directions transcending social, ecological, economic, historical and institutional aspects of COVID pandemic to generate information that will lead to the deeper understanding of the pandemic, developed policies for mitigation and controlling community transmission, supporting rural livelihood to address unemployment and generate local based technologies to address food security issues brought by the pandemic. This is aside from the approved RDE Agenda in 2018-2020 that guided on-going research and extension projects that aim to achieve sustainable development in Partido.

1. *RESEARCH AGENDA*

a. Online Flexible Learning System

The COVID pandemic has constrained the implementation of the traditional learning delivery model using face to face and highlighted online flexible learning system as alternative modality. Although the modality has been in use for some time in selected academic institutions, many are starting to adopt it this coming semester. The uncertainties in terms of faculty and student's readiness to adopt it, its effectiveness and effect on learning remain unchartered.

Suggested Studies:

i. Understanding teacher's behavior towards online learning systems
ii. Intrinsic motivational factor associated with use of online learning systems
iii. Students and Faculty perceived enablers and barriers in online education
iv. Students experiences and preferences in online and distance learning
v. Assessment of college faculty online instructional materials
vi. Analysis of online instructional delivery system on students learning outcomes
vii. Innovative online and distance learning materials and approaches
viii. Applying and Evaluating R2D2 Model for online and Distance Learning

b. Gamification of learning in education

The current focus on online teaching as delivery mode under the new normal brings out the challenge of addressing boredom and absence of instructors in the classroom to liven up learning. Within the context of online learning, there is a need to design instructional materials in a way that creates enthusiasm and strong interest among online learners.

Suggested studies:

i. Gamification of learning
ii. Evaluating effect and impact of gamified learning
iii. Factors influencing gamification of learning

c. Online digital transactions for food commodities

Agrifood supply disruptions in transport and logistics system of inputs, machineries and equipment and farm produce. Limited movement of people involved in transport of such inputs and products, technicians will also be limited. Further, with the regulated operations of wet markets, super markets and retail food establishments, the increased reliance on online/digital transactions for food commodities is expected to continue, even in post ECQ scenario.

Suggested Studies:

i. Fish marketing apps for fishers
ii. Online food vending for fruit and vegetable entrepreneurs
iii. Readiness on online marketing

d. Fabrication of Small Multi-task Agri-Entrep Machines

On the production side, there will be increased demand for modern agricultural machineries and equipment in lieu of manual labor, given the need to limit movement of people.

Suggested studies:

i. Drone insecticide sprayers

ii. Automated cable-based *palay* carriers
iii. Weeder robots

e. Nutraceuticals and Enhanced Foods

The pandemic will cause a shift in consumer preferences for healthier diets, which will increase demand for safe and nutritious food. Consumers are now more health conscious and selective of the food they eat, preferring to eat fruits and vegetables to boost their immune system against diseases.

Suggested studies:
i. Food supplement with immune-boosting foods
ii. Indigenous immune boosting foods
iii. Immune boosting food product development

Impact Evaluation of COVID on SMEs

The major economic impact of COVID pandemic is the temporary suspension of production activities for both goods and services. The economy may register a decline as many bus9nesses have stopped operations and find it difficult to cope with the losses.

As the country navigates through the lingering effects of the pandemic, there is heightened risk of financial insolvency for firms particularly those that have incurred mounting debt, those with large overhead costs and those with limited or no insurance coverage against losses. In the near term, there will be increased demand among companies, especially from micro, small and medium enterprises for economic assistance such as tax break, access to credit subsidies, debt relief and employment subsidy support, among others.

Suggested studies:
i. Extent of losses of SMEs
ii. Coping mechanisms of SMEs
iii. Determinants of resiliency
iv. Impact of COVID on value chains
v. Acceptance of balance of risk and benefits for managing COVID protocol in SMEs

f. Development on PPEs from Local Materials

In the manufacturing sector, production of merchandize goods will favor essential goods particularly food, medicine, medical and pharmaceutical products, and other essential goods mostly related to efforts to contain the outbreak. Equally important is for the manufacture of intermediate inputs and raw materials for essential goods to remain unhampered (e.g. plastics and plastic products, rubber products, chemical products, etc).

Suggested studies:
i. Abaca-based masks
ii. Innovative mask designs
iii. Local disinfectants

g. Flexible Work Arrangements and Social Distancing

In many service-oriented organizations in the private sector and public sector, flexible –work arrangements (e.g. work from home) will have to be implanted in accordance with strict social distancing protocols. In many instances, part of the new normal means working and interacting virtually instead of face

to face. Work spaces (e.g. factories and office spaces) will need to be re configured to address the need for physical distancing.

Suggested studies:

i. Behavior and Socio psychology of Social distancing
ii. Effectiveness of Work Arrangements

h. Automation and Digital Technology

For the productions sector, there will be increased demand for automation to complement manual labor in the immediate term. Over the medium term, automated processes may substitute for labor.

Suggested studies:

i. Automation of agri-fishery products bidding process
ii. Use of digital technology in agri-machinery equipment rentals and services

i. Characterization and Management of Infectious Wastes

An adverse environmental effect is the increase in volume of infectious waste material's (e.g. disposable masks) from households in the number of health care facilities due rising COVID patients. Solid wastes from packaging materials will also increase due to the surge in delivery of food and other essential supplies.

Suggested studies:

i. Waste Analysis Characterization Studies focusing on waste PPEs
ii. Assessment of aquatic epizootics and zoonosis

j. Urban Agriculture and Behavior of People Towards Environment

There will be greater interest in urban agriculture, given the importance of ensuring steady food supply. The use of idle urban spaces for urban agriculture, backyard/household gardening of edibles and community farming will increase. Further, localizing the source of produce in urban areas will also help cut down fossil fuel consumption necessary to transport, package and sell food. Considering the foregoing, the pandemic is expected to spark positive behavioral effects on people, especially on the need to conserve finite natural resources and safeguard the quality of environment and public health.

Suggested studies:

i. Verification study on urban agri-fishery technologies to address issues on food security and unemployment due to COVID pandemic
ii. *Kurakding* farming
iii. Motivations towards Protecting Environment

k. Food Safety

The COVID pandemic has resulted in higher level of public awareness on food safety. The cessation of imported foods from outside sources will shift the demand on local food sources providing the impetus for food competitiveness in terms of quality and food safety.

Suggested studies:

i. Assessment of food safety practices of food services handlers
ii. Predictive modelling of microbiological behaviors in processed smoked fish
iii. Decision support in hazard identification

iv. Developing decision support tool for evaluation of microbiological risks in street food
v. Estimating effects of multiple variables on growth and survival of food borne pathogen in souvenir food items targeting *Aeromonas, Salmonella, Staphylococcus and Clostridium*
vi. Characterization of biological food hazard across supply chain in abalone, smoked skipjack
vii. Perception of risk across supply chain

l. Food Innovation

Suggested studies

i. Product development for ingredients/intermediate foods
   - *Aloe vera* as immune stimulant fortifications for pili-based products
ii. Innovative food products using local sources
   - *Lemonsiting kastila*, garlic, *kalabasa*, *Mangifera indica* stem bark, moringa pods, mushrooms (*kurakding*)
iii. Product development as food supplement
iv. Product development for enrichment, enhancers for cereal based products, tea and beverages

m. Creative Industry and Heritage

The migration of people from the metropolis to the rural areas have created unemployment problems for artisans previously employed by furniture companies and food processors and product development workers in food manufacturing corporations bringing with them new skills that can be used to develop new products from existing raw resources in the rural areas. Capitalizing these raw materials and using their artistry, these human resource can be taped for developing creative industry and heritage to promote valued adding

Suggested studies:

i. Inventory of plant-based food packaging products in Partido
   a. *Balusosu, latik, ibos* etc.
ii. Analysis of use of plant products for commerce in Partido
iii. Effect of arts and craft making on socioeconomic empowerment of art and craft artisans in Partido

COVID Social Science and Policy Studies

Apart from medical and health management interventions and studies for controlling COVID pandemic in the country, there is a need to deeply understand the human and institutional dimensions of COVID to develop effective policies for mitigating and controlling their community transmission.

Suggested studies:

i. COVID Risk perception across socio-demographics and levels of sensitivity
ii. COVID risk perception in the fishing industry across value chain
iii. Effect of locally enforced regulatory system on perception of COVID risk
iv. Cost effectiveness of COVID-related measures to prevent community transmission
v. Socio psychological factors supporting COVID protocol implementation
vi. Cost-Benefit of Implementing ECQ in Partido
vii. Projecting Welfare Effect of Suppressing COVID Contagion

2. *EXTENSION AGENDA*

a. CapDev for Online Virtual Interaction and Distance Education for Partido Teachers (COVID Education for Partido Teachers)

i. Learning Module Preparation
ii. LMS Module Migration
iii. Online Learning Evaluation
iv. Developing Radio-based learning Modules
v. Distance education instructional module development
vi. Developing learning and teaching modules for flexible learning options and radio or TV classes including e-learning materials (modularized for students, teachers and parents
vii. Online VLS assistance

b. Community On-site Visit towards Developing Smallholder and Backyard Fish farms for Food Security and Livelihood (COVID Smallholder and Backyard Fish farms)

i. Free tilapia seed stock distribution
ii. Training on Tilapia grow-out management in smallholder farms and backyard farms
iii. Technical assistance for establishing fish farms
iv. Weekly technical consultancy visit and mentoring of beneficiaries
v. Awareness raising on protection and conservation of aquatic ecosystem

c. CapDev for Online Virtual Interaction and Disruption Normalization of LGU Transaction (COVID Normalization of LGU)

i. Training on online and virtual interaction platform utilization for LGUs
ii. Training on cyber risks
iii. Training on public service continuity planning and M&E

d. Coping and Outsmarting the Vicious Impacts of Dreaded Infectious Diseases through Capacitated Community (COVID Capacitated Community)

i. Training on health and safety measures against COVID for local government waste collectors, handlers, and frontline workers
ii. Training on COVID-induced Traumatic Stress, Anxiety and Psychological Disorder Detection, Intermediate Management and Referral Systems for local government health workers
iii. Mass media campaign on proper disposal and management of health care wastes, especially masks and gloves
iv. E-*reseta*

e. Community-based Organizations Valuing Indigenous Directions for Sustainable Development (COVID SusDev)

i. Upland and riverine communities

- Community organizing and organizational capacity development
- Biodiversity-friendly and sustainable alternative livelihood training for local communities to avoid over extraction
- Establish wildlife sanctuaries for rescued turtles and wild life
- Development of community-managed agroforestry development

- Training of community-based forest rangers for forest protection
- Community water conservation advocacy

ii. Coastal and island communities

- Community organizing and organizational capacity development
- Biodiversity-friendly and sustainable alternative livelihood training for local communities to avoid over extraction
- Promoting Marine Fishery reserve sanctuaries
- Development of community-managed ecotourism trek
- Training of *bantay-dagat*
- CRM and sustainable fisheries advocacy

II. RESEARCH AND DEVELOPMENT DIVISION

II. RESEARCH AND DEVELOPMENT DIVISION

A. HISTORICAL BACKGROUND

The Partido State University (PSU), created through Republic Act 9029, is mandated to provide advanced instruction and training in the arts, philosophy, sciences, technology and other graduate and professional courses. It shall also undertake advanced studies, research, production, and extension services and shall provide leadership in these areas.

Research and development as an integral function of higher education institution had its beginning in 1994 since the establishment of Partido State College and its subsequent conversion to university status. This integral component to be functional must conduct researches, projects and programs responsive and directed towards the enhancement of the existing programs of the university and supportive to the country's development goals.

Toward this end, research management at PSU must enunciate clearly its vision, mission, goals and objectives, areas of concern, thrusts and priorities, organizational structure and functions, and implementing mechanisms. This is done to ensure an orderly manner and professional conduct of research in this academic community.

The University Research and Development Division was further strengthen by the establishment of the UREKMC by virtue of BOR Res No.43, s. 2018 and development of research centers also through BOR resolutions.

B. RESEARCH AND DEVELOPMENT GOAL AND OBJECTIVES

Goal

Develop a culture of research and contribute to the pool of knowledge that will address the problems of the academe, community and country.

Objectives

1. To evolve and implement an effective mechanism for forecasting, planning, policy making, financing, managing, and assessing Research activities designed to promote the institution's growth and development along the four goals of higher education: access and equity, quality and excellence, relevance and responsiveness, and efficiency and effectiveness, and along the priority areas of the local and national government;
2. To conduct research and development studies in social and natural sciences, business, science and technology, culture, arts and tourism, agriculture, and fisheries, DRRM;
3. To strengthen the manpower and resource capabilities of the university;
4. To formulate and recommend research policies and guidelines conducive to and supportive of the research endeavor of the faculty and other members of the academe;
5. To establish linkage with government and non-government agencies, industry and business sector, sister SUC's and other local and foreign institutions for fund sourcing, capability building, and networking along the research and development endeavor;
6. To disseminate information and technologies responsive to the emerging needs of its clientele; and
7. To create mechanisms for monitoring and evaluating researches and research activities, and for dissemination, implementation and utilization of research outputs.

C. THRUSTS AND PRIORITIES

1. Poverty Alleviation and People Empowerment

2. Agriculture and Fisheries
3. Food Security
4. Governance and Sustainable Development
5. Environmental Protection and Resource Management
6. Enrichment of Bicol Culture
7. Efficient Management Information
8. Micro-enterprise Development
9. Education and Training
10. Nutrition, Health and Sanitation
11. Industry and Technology Advancement
12. Gender and Development

D. STRATEGIES OF IMPLEMENTATION

To ensure that all programs and activities of research at PSU are consistent with the objectives, the following strategies of implementation are formulated:

1. Formulation of research programs that will coordinate and direct all research activities, prioritize the most pressing needs of the university, and allocate resources efficiently and effectively;
2. Capability building/competence upgrading of university researchers through in-house trainings, seminars, workshops, symposia, fora, scholarships and study tours;
3. Strengthening laboratory and library facilities and development of research infrastructures such as laboratory or research centers through university procurement and solicitation from research-oriented people and funding institutions;
4. Formulation of policies that would promote conducive and supportive research climate for researchers, grant attractive rewards and incentives to research endeavors, and implement salient provisions of the Accounting, Auditing Manual for Research Operation (AAMRO) and other appropriate accounting rules and regulations;
5. Establishment and strengthening of linkages and consortia with government and non-government agencies, industry and business sector and other higher education institutions to help overcome the varied resource constraints of the Research Unit and network with institutions which have established research leadership and reputation; and
6. Creation of mechanism for monitoring and evaluating researches and research activities, and for dissemination of research outputs.

E. ORGANIZATIONAL STRUCTURE AND FUNCTIONS

In 1994, the leadership of the research function of the college was vested on the Director for Research. After sometime the Research and Development Council was organized through a provision in the Manual on Research Operations approved by the Board of Trustees in August 13, 1998. With the conversion of the college into a university in 2001, revision and upgrade of the Research Manual became necessary in order to make research governance more effective and attuned with its new mandate as a center of excellence.

In the Manual for the Operations and Management of University Researches approved by virtue of BOR Res. No. 06, s. 2009, the powers and functions of the University Research Council has been defined and expanded, with modifications on the organizational structure consistent with the University Comprehensive Development Plan to make research governance more dynamic and the conduct of research more relevant to the service area.

This revised manual captures new provisions as stipulated in the newly BOR approved UREKMC, updated research agenda, BOR approved Research Incentives and Awards, BOR approved Research Centers, ISO 9001-2015 Research Work Instructions, Quality Objectives and Failure Mode and Effects Analysis.

University Research and Development Division

The coordination and consolidation of the management of research activities in the colleges, campuses and RDE Centers as well as the overall management of multi-disciplinary impact research programs/projects is vested on the University Research and Development Division which is under the Vice President for Research, Extension and Knowledge Management. Under it, are the Research and Development Director, the Unit Heads of the Project Management Unit, Intellectual Property Unit, Technology Commercialization Unit, Technical Staff and Research Coordinators (Fig. 2) with the following mandated functions:

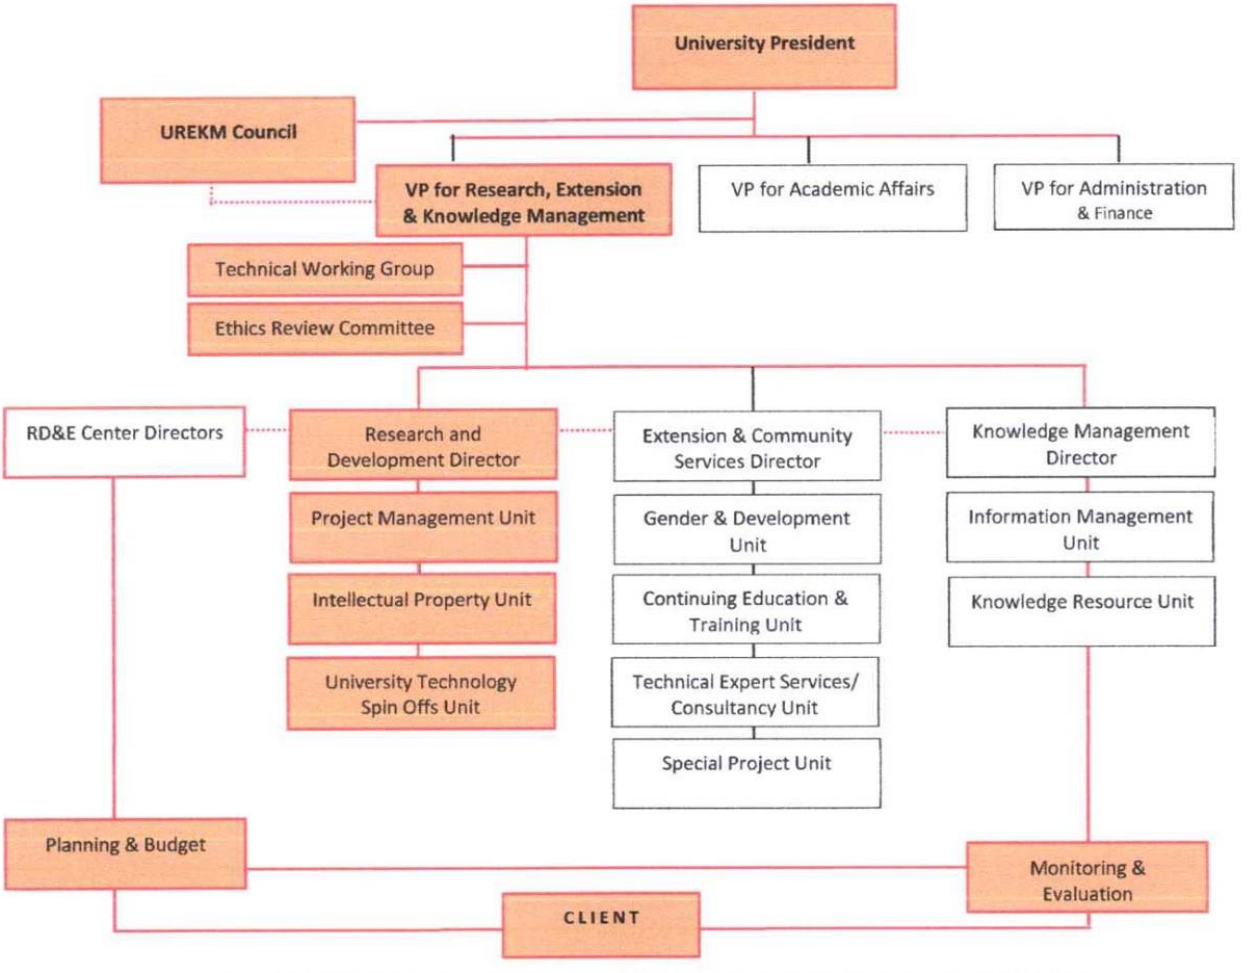

Figure 2. Organizational Structure of the Research and Development Division

Research Management Units

1. Project Development Unit - Develops and manages research and research cum extension projects for internal and external funding.

2. Intellectual Property Rights Unit -Assists in the evaluation, application, processing and protection of intellectual properties, and coordinates with other offices that are involved in the exercise of such function.

3. University Technology Spin Offs Unit - Performs the following functions:

a. connect faculty with companies, licensing technology for the development of new products and services that benefit the public good to foster economic growth and generate revenue that supports the University's research and extension goals;
b. take charge of pre-assessment and socio-economic surveys prior to the implementation of technology projects;
c. assist in the conduct of trainings, establishment of community-based demo projects at the same time monitor and evaluate field level activities; and
d. consultancy, coaching, mentoring and advisories will be part of services for the transfer, application and commercialization of technologies.

Technical Staff of Research and Development Division

1. Assists the Director in the formulation of research policies, guidelines and programs
2. Assists in the formulation of the research agenda and multidisciplinary impact research programs/projects implemented by the Division
3. Assist in monitoring impact programs/projects implemented by the division
4. Encourages and facilitates faculty staff in his division, in coordination with respective college/campus research coordinators to prepare and submit research proposals, research articles, results for publication
5. Establishes linkages with other funding agencies/institutions in coordination with Research and Development Director

Administrative Staff

1. Consolidate, encode, file documents, progress reports and review and edit data to ensure completeness and accuracy of information, follow-up with resolve problems or clarify data collected and maintain records related to assigned tasks
2. Prepare and organize paper works and other materials for meetings, conferences and trainings conducted by the office
3. Assist the Director of R&D in preparing documents for ISO visit and development of interview schedules and evaluation tools

Research Coordinator

When the research culture of the university started to be adopted, each college/campus shall establish its own research unit. This will be headed by the research coordinator who:

1. Plans, coordinates and implements University Research and Development Division -approved research programs/projects/ studies for the colleges/campuses (department /units);
2. Assists the Director for Research and Development in carrying out the University's research programs, projects and other research related activities;
3. Conducts research and performs such as other duties as may be assigned by the higher authorities; and
4. Performs other functions pertinent to Research as maybe necessary.

Researchers

The researchers are primarily from the faculty of different disciplines and those from the non-teaching staff who are interested to undertake research.

Research in the university, which can be implemented as a program, project or an independent study can be done by an individual or by a team headed by a leader.

F. RESOURCES FOR RESEARCH

Resources for Research are vital elements in the implementation of University research activities. These include manpower, facilities and financial resources.

1. Manpower Resources

The university manpower research resources are composed of the faculty and non-teaching personnel who shall primarily lead the research undertakings of the University. They will be supported by the hired contractual employees assigned in Research and hired field enumerators, This internal manpower resources may be augmented thru collaborations with various stakeholders including industry partners, funding agencies, the project beneficiaries, and other institutions.

2. Financial Resources

There are two sources of funds to support the research in the university:

Internal Funding. This comes from General Fund (Fund 101) and PSU's Income (Fund 441). These cover maintenance and other operating expenses (MOOE) and Capital Outlay (CO).

External Funding. This fund comes from external funding agencies sourced out through program/project/research proposals in the form of grants binded thru a MOA/MOU.

3. Facilities and Equipment

To enhance and facilitate the research activities, the university supports these through its facilities and equipment. It has dedicated land areas which serve as experimental sites; it has tissue culture laboratory and wet laboratory. The other facilities and equipment utilized by research have been generated through the PSU funds and income generated from externally-funded research projects.

G. IMPLEMENTATION OF APPROVED RESEARCH PROJECTS/RESEARCHES

1. Research Agenda

Research agenda set the tone for the research proposals in the University units. Proposed researches are approved once they have been evaluated by the review committee and endorsed by the Deans/Campus Deans, Research and Development Director, VP for Research, Extension and Knowledge Management and approved by the University President. Monitoring of implemented research projects will be done both by the respective colleges/campuses and the PSU Research and Development Division Center. Multidisciplinary, university in scope, and impact research projects/programs will be monitored by the PSU Research and Development Division. Another medium of evaluating completed researches is through presentation in agency in-house reviews.

The preparation of the university research agenda shall be done every three years or as the need arises. This is to ensure that the agenda shall be responsive to the needs of the clienteles and attuned to the local, regional, national and international research agenda. From these agenda, all research activities, studies, projects and programs will be based.

2. Research Proposal Review and Budget Allocation

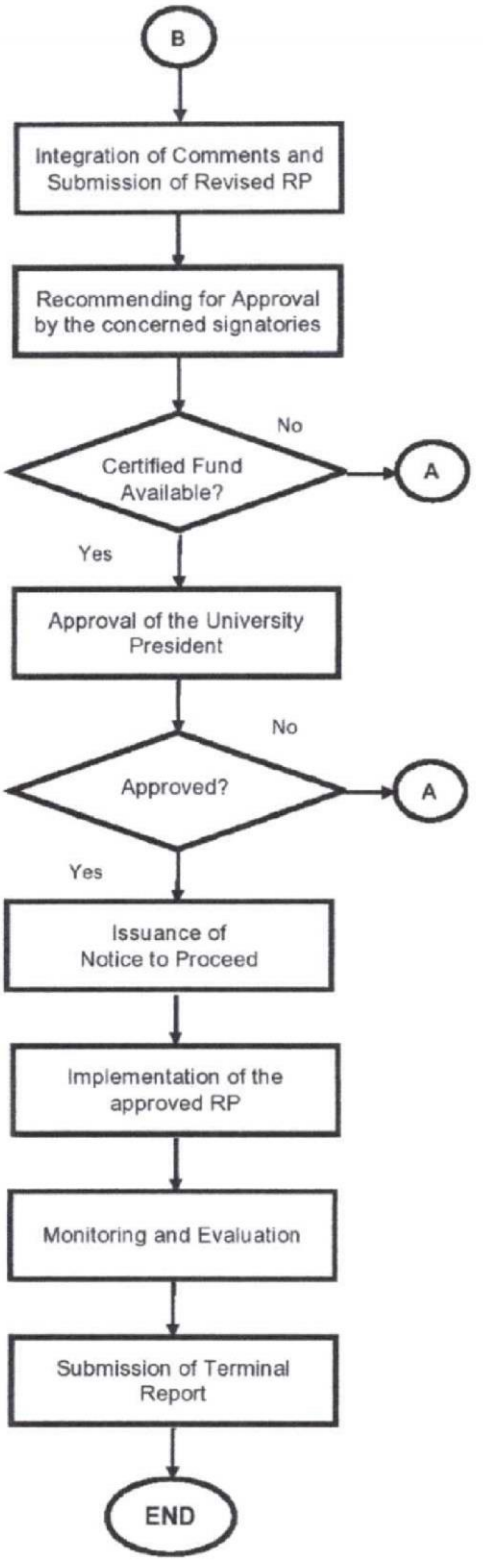
a. Internally Funded Researches

The PSU provides funds for research in two ways. One is through direct allotment to the colleges and centers for their operational expenses while the other is coursed through the University Research and Development Division.

1. **Funds directly allotted to the colleges, campuses and centers**- The central administration allots research funds as MOOE directly to the colleges, campuses and centers. The Research and Development Division manages these funds and determines research prioritization.

2. **Funds coursed through University Research and Development Division as multidisciplinary impact research fund** - The University allots research fund from the its regular MOOE and a portion from the University annual income to fund multidisciplinary impact researches. The University Research and Development Division issues calls for research proposals during the last quarter of each year wherein proponents are required to submit their proposals to the University Research and Development Division using PSU-F-Res-03. A Committee on Research Review and Evaluation (CRRE) is convened by the R & D Director to review the RP. The proponents will integrate the comments and suggestions and return the revise proposal to the RDD for compliance evaluation. These processes are shown in the Work Instruction for the Conduct of Research Project/Programs approved by the office and use for ISO document. This is to facilitate the conduct and implementation of internally-funded research project/programs. This work instruction covers the proposal preparation review, implementation, monitoring and submission of terminal report of internally funded researches (Fig. 3).

Process Flow	Responsibility	Details
START A Receive Research Proposal (RP)	Researcher Deans Research Director Research Coordinator	The research director receives the RP submitted by the researchers to the R & D Office duly signed by the proponents & the concerned Dean
Conformance to Format? A Yes	R & D Director	The R & D Director evaluates the submitted RP if it conforms to the prescribed format (PSU-F-RES 03). If not, the RP will be returned to the proponent. Otherwise, the R & D Director will convene the CRRE for review.
Review of RP	R & D Director CRRE	A Committee of Research Review and Evaluation (CRRE) is convened by the R & D Director to review the RP.
No Relevant and Sound? Return to Proponent Yes B	CRRE R & D Director	If RP was found to have regional/national significance and methods used are sound by CRRE, the R & D Director will approve the RP and return it to proponents for consolidation of comments and improvement. Otherwise, RP will be returned to proponent for revision.



Proponent(s)	The Proponent(s) integrates comments by CREE on RP and submits the revised RP.
R & D Director VPRREA Center Director	The R & D Director receives revised Research Proposal submitted by the proponent, have it recommended for approval and facilitate signing by the Budget Officer & the VPREEA.
Budget Officer	The Budget Officer certifies fund availability, if none, RP will be returned to the proponent.
President	The President approves the recommend RP.
R & D Director	The R & D Director provides the copy of the approved RP to the proponent and to VPREEA for the issuance of Notice to Proceed. Otherwise, it will be disapproved.
VPREEA	The VPREEA will issue the Notice to Proceed to the proponents.
Proponent	Proponents conducts research.
VPREEA R & D Director	VPREEA and R & D Director monitor and evaluate research.
Proponent R & D Director VPREEA	Proponents submit Terminal Report (PSU-F-RES-22) or (PSU-F-RES-05) to Research Director.

Figure 3. Conduct of Research Project/Programs

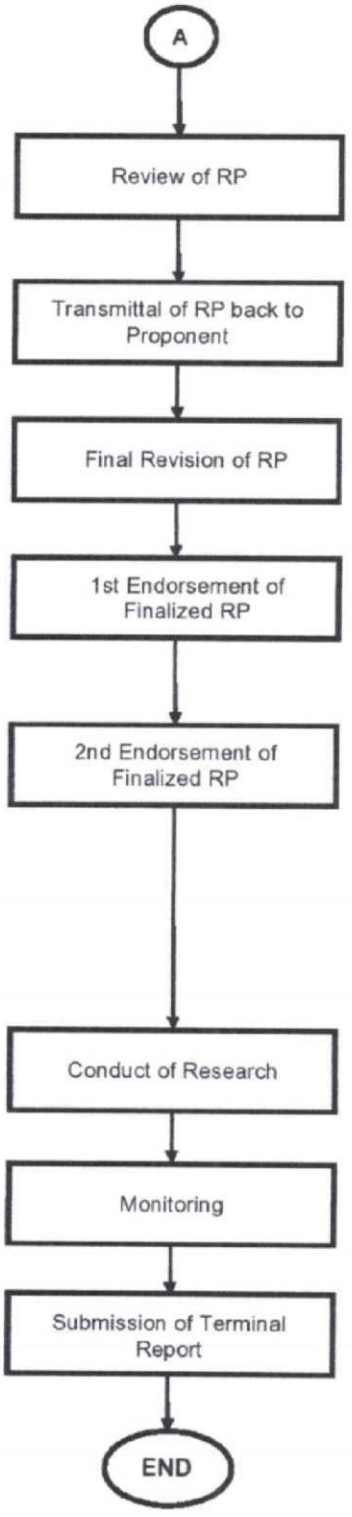
b. Externally Funded Researches

External funding for researches conducted in PSU such as from NGOs, funding from LGUs, or international agencies will involve the following series of processes.

a. The Research and Development Division receives calls for proposals from external funding agencies anytime during the year. The division announces call for proposals by the external funding agencies to the colleges and campus.
b. The proponents prepare proposals in line with the thrusts and objectives specified by the funding agency and submit it to the University Research and Development Division (URDD).
c. The URDD conducts a pre-evaluation based on PSU thrusts and checks the duplication of efforts if there is any. It then convenes the committee on research review and evaluation (CRRE) to evaluate the technical soundness of the proposal.
d. The CRRE reviews, critiques, make recommendations and submits the proposal to the RDD Director.
e. The Research Director sends back the proposal to the proponents for revision.
f. The proponents make final revisions on the proposal incorporating the recommendations of the CRRE and strictly follow the format prescribed by the funding agency. They then submit the revised proposal to the Research Director for endorsement to the President.
g. The President issues the final endorsement to the funding agency.

The work instruction for the processing and management of externally-funded research project proposals is shown in Figure 4. This is to facilitate the processing of externally-funded research proposals. This work instruction covers the proposal preparation, internal review of proposal, endorsement to funding agency implementation, monitoring and submission of research terminal report funded by external organization.

Process Flow	Responsibility	Details
	R & D Director	The Research and Development Director Center/Office (RDC/O) receives calls for proposals from external funding agencies anytime during the year. The RDC/O announces call for proposals by the external funding agencies to the different colleges and units.
	Proponent	The proponent prepares proposals in line with the thrusts and objectives specified by the funding agency that responded to the submitted proposal and submit the same to the Research and Development Center/Office. The researchers may also look for external funding source to finance their proposals.
	R & D Director	The Research and Development Director (R & D Director) conducts a pre-evaluation of the proposal based on the thrusts of the funding institutions and the University. It then convenes the Committee on Research Review and Evaluation (CRRE) to evaluate its technical soundness and social relevance.



CRRE	RDC/O through the R & D Director convenes the CRRE to review, critique and make recommendations.
R & D Director	The R&D Director sends back the reviewed research proposal to the proponent/s for revision.
Proponent	The proponent makes final revision on the research proposal incorporating the recommendations of the CRRE and submit revised proposal to RDC/O.
R & D Director	R & D Director and Vice President for Research, Extension and External Affairs (VPREEA) endorse revised proposal to the President.
President	The President endorses finalized proposal to the funding agency. If Memorandum of Agreement is forged between the University/Proponent and the Funding Agency, and funds for research are transferred to the University, the proponent/s are provided copy of the documents with advice to start implementing the research.
Proponent	The proponent conducts research.
R & D Director	R & D Director monitors progress of research project and provides logistic support to achieve objectives of the research.
Proponent	Proponent submits copy of terminal report to funding agency endorsed by the President. A copy of the Terminal Report is furnished to the R & D Office.

Figure 4. Processing and Management of Externally Funded Research Project Proposals

H. SIGNING OF MEMORANDUM OF AGREEMENT (MOA) FOR EXTERNALLY FUNDED RESEARCHES

Approved project researches follows the following procedures:

a. The proponents request the funding agency to prepare the MOA.
b. The funding agency prepares the MOA.
c. The President reviews the MOA from the funding agency. The MOA is transmitted to the proponents.
d. The proponents submit the MOA to Complete Worth Staff (CSW) for review.
e. The proponents revise the MOA based on the comments of the CSW and the Legal Office.
f. The CSW endorses the MOA to the Admin Council for endorsement to the Board of Regents (BOR).
g. The President presents the MOA to the BOR for approval.
h. The funding agency signs the MOA and returns copies to the Office of the President.
i. The funding agency will issue Notice to Proceed.
j. The proponents implement the project.

I. MONITORING AND EVALUATION

1. Monitoring

Research projects that are internally funded are monitored by the Monitoring Team in close coordination with the College/Campus Deans through the research coordinators in the case of the college-based projects and the Director of Research in the case of the multidisciplinary impact research projects. The Director for Research and Development checks on programs/projects/studies and other activities through meetings, field visits, ocular inspection for periodic monitoring of implemented programs/projects/studies, submission of quarterly status/progress report for on-going research, periodic performance review and terminal report once the research is completed.

Researchers with funded programs/projects/studies are governed by accounting and auditing rules to ensure legal protection in the use of research funds.

Research projects funded externally are monitored in the financial and technical areas. The accounting division conducts financial monitoring by providing the status of funds and audited financial reports.

On the other hand, the University Research and Development Division also monitors the finances of the research project as well as the appointments of personnel requests and advice of sub-allotments and other pertinent data.

2. Evaluation

All research projects whether college/campus -based or impact research projects are evaluated by the University Research and Development Division through the committee on research review and evaluation composed of selected evaluators. All on-going research projects/programs with external funding are evaluated quarterly. The evaluation will determine the renewal or extension of research projects/programs. To ensure quality research outputs, the following evaluation mechanisms are also set:

a. Performance /Status Review. This is done quarterly or as the need arises to evaluate proposals submitted by researchers for approval by the President.
b. Agency In-House Review. This is conducted every year to:
    i. evaluate completed researches on the attainment of objectives and adherence to the approved program of activities.

ii. identify problems met during the research implementation and recommend specific courses of activities such as: continuation, extension, modification of planned activities and recommendations of the evaluation panels.
iii. identify technologies generated requiring field-testing, verification and piloting.
iv. identify significant results/information for policy formulation development planning of the agency.
v. identify new researchable areas.
vi. update agency research plans and programs.
vii. identify technologies/results ready for packaging & dissemination.
viii. serve as venue for researchers to present technical papers.

Request for Extension of Implementation of Research Program/Project/Study

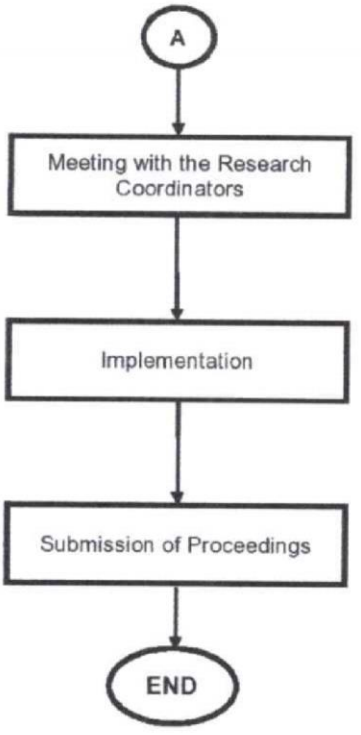
In event that the proponent(s) is/ are not able to submit accomplishment report/ terminal report on the approved planned time frame, he/she may request for the extension of its implementation thru a letter of request address to the University President, attention to the VPREKM and the Research & Development director, at least two weeks before the projects expires. The maximum number of request for extension is two and for every term, should have at least six months. Granting of the extension will be evaluated based on the merit of the reasons justifiably cited for not completing the project on time. The extension will no longer entitles the proponents of the equivalent workload credits and other privileges, only official time to conduct the research until its completion and submission of terminals reports will be granted to the proponents.

A researcher(s) who commits twice of not completing his/her approved research in its original time frame will no longer be allowed to submit new research proposals.

J. CONDUCT OF RESEARCH-RELATED ACTIVITIES

Figure 5 shows work instruction for the conduct of research-related activities. This covers the proposal preparation, implementation and submission of accomplishment of activities related to the research and development function of the University.

Process Flow	Responsibility	Details
	R & D Director VPREEA	The Research and Development Director (R & D) prepares the research activity proposal.
	President	The Vice President for Research, Extension and External Affairs (VPREEA) recommends for approval by the President. If approved, the president sends the proposal to the Finance/Budget Office for Certification of Fund Availability. If not, the President sends it back to the R & D Director.
	Budget Officer	The budget officer certifies to the availability of fund for the activity proposal.
	R & D Director	The R & D Director prepares the Purchase Request forms covering supplies, labor, and transport expenses needed in the conduct of the activity and submits the same to the Procurement Office together with the copy of the approved proposal.



R & D Director	The R & D Director meets with the Research Coordinators to discuss committee assignments in the implementation of research-related activities.
R & D Director Research Coordinators	R & D Director supervises research-related activity implemented by Research Coordinators and Committee members.
R & D Director	R & D Director submits Proceedings of Research Activity to the President.

Figure 5. Conduct of Research-Related Activities

K. PUBLICATION AND DISSEMINATION OF RESEARCHES

Discoveries, inventions, new methods, and processes as results of the conduct of research should be disseminated to the public.

The amount and quality of research outputs reflect scientific productivity and are among the determinants of the scientific career of scientists, faculty and researchers, as well as a mirror of the capabilities of an academic institution. Unless these outputs are promoted and published for public consumption, they remained useless. The PSU come up with the following schemes to address the need to promote and publish research outputs.

1. Publication

Scientific productivity, in the form of intellectual contributions to the advancement of science and ultimately communicated in written form, is considered to be fundamentally important to one's scientific career advancement. Thus, publication is a major output of a researcher.

Publication serves two purposes: recognition and reward. First, it lets people know that such a research was conducted. Second, it contributes to the academic career enhancement of the person(s) involved by earning merit or compensation and also contributes to the attainment of the University targets.

A. Print Media

Print media are the most common means to promote research output as these reaches wide audience. The following are the most common publications for knowledge products of the University:

i. PSU Research and Development Bicol Science Journal is a professional publication of Partido State University published annually. It publishes articles of completed researches of the university and other scientific and technical articles which have relevance to the mission and development goals of the research unit.

ii. College-based Research Journals

iii. Kilyab, a technical bulletin and quarterly magazine is the official Research publication of the university. It serves as a forum for the expression of scientific and technological views and as harbinger of events and developments in the university research sector. The research outputs presented are written in a semi-technical manner.

iv. Book – a non-periodical publication, at least 49 pages (according to UNESCO), covering an extensive treatise on a specialized field. A textbook is a book approved by a textbook board to be used as a main material for a course. Book or textbook writing is supported by grants from funding agencies or the university. The PSU will support book writing for core courses of undergraduate degree programs, including reference books, workbooks, and laboratory manuals (in print or other media) by regular, full-time faculty.

Requests for publication require the approval of the University President through the recommendation of the Research Director.

v. Monograph – a separate treatise on a single subject or class of subjects, usually detailed in treatment but not extensive in scope, and often contains an extensive bibliography.

vi. Pamphlet / brochure – a non-periodical publication, at least five pages (UNESCO), covering any field of interest. A pamphlet or brochure usually provides an overview and highlights of a certain research or project.

vii. Leaflet – usually a single sheet of paper, which is sometimes folded to make 2-4 pages, deals with one main topic, and is highly illustrated.

2. Reporting/Research Paper Presentation

The findings of the research should be documented according to the college prescribed style and format. After these findings are sanitized by experts, those identified ready for publication will be printed and published. For proper dissemination of research findings, the Research Division established the following venues:

a. Agency In-House Reviews;
b. Regional/National/International Research Symposia; and
c. Seminars, Fora, Conferences, and other papers presentations

These are usually sponsored by organizations and are intended to gather specialists in a particular field to promote the exchange of ideas and knowledge that will contribute to the further development of the field and of their outputs. Scientists, faculty members, and researchers participate in such gatherings by invitation to present a paper, poster, and/or serve as resource persons.

3. Commercialization

Research outputs with potential technological and industrial application will be commercialized through contracts and license agreements.

4. Direct Extension

Research outputs developed for the direct benefit of intended clients are promoted through direct extension. These usually involve outputs that deal with new methods or approaches, e.g. cultural management practices in agriculture and methods of management.

L. RESEARCH INCENTIVES, AWARDS AND GRANTS

Since research is considered as one of the primary functions of higher education institutions, it is necessary to encourage faculty members, students and personnel to conduct research in their respective fields of specialization. This could be done by: (1) providing researchers with conducive research climate; (2) improving infrastructure for research undertaking; (3) updating library collections; and (4) providing state-of-the art facilities.

To motivate researchers to conduct cutting edge researches the following incentives and privileges are provided:

1. Workload Credits/ Reduced Load

There shall be a reduction of teaching load or provision of equivalent units for those who are conducting research. The determination of the reduction shall be based on the BOR approved as shown below and will be reflected in the notice to proceed to be issued by the VPREKM.

Guidelines for Crediting Research and Extension Workload of Faculty *(BOR Res. No. 73, s. 2019)*

The guidelines for crediting research and extension workload for faculty provide a clear guideline on assigning research and extension credit unit or workload for faculty. Specifically to:

a. To provide guidance to the Deans, Program Directors, Research/Extension Directors, Vice President for Academic Affairs, Vice President for Research, Extension and Knowledge Management, Accountant and Budget Officer in assigning workload credit to faculty researchers and extensionists;

b. To equitably distribute faculty responsibilities across college/campus over time; and
c. To effectively implement the research and extension programs/projects of the university.

Coverage/Scope

This guideline is applicable to externally and internally funded research and extension program/projects/study of full time permanent or temporary faculty of Partido State University.

Definition of Terms

Workload - A credit unit assigned to faculty engaged in research or extension program/project/study.

Proposal - Refers to the plan and description of a research/extension program/project/study developed by a program/project/study leader in accordance with the specific requirements set by the university or external funding agency and submitted for financial assistance.

Program - A group of interrelated or complementing projects usually requiring an interdisciplinary or multidisciplinary approach to meet established goal(s) within a specific time frame. It is composed of at least 2 projects

Project - A set of interrelated studies/activities or a component of a program with predetermined objective(s) to be accomplished within a specific time frame. It is composed of at least 2 studies or extension activities.

Study/Extension Activity - A basic unit in the investigation of a specific problem identified under a research project or a set of activities for a planned extension strategy.

Credit Units in Research and Extension Involvement

The workload credits given to faculty engaged in various research and extension undertakings shall differ during the coordination, and actual implementation.

Furthermore, in the actual implementation, workload credits will also differ depending on the responsibility of researcher by scope of research, i.e. program, project, or study.

Credit units per type of research and extension involvement by scope together with the breakdown of credits according to activity is shown Table 1.

Table 1. Credit unit researchers/extensionists earn based on the type of involvement

Type of Involvement	Activity	Credit
Program Leader	Coordination of two or more projects under the program	3
	Coordination of two or more studies under the project	3
	Actual implementation of a study/under a project	3
	Total	**9**[a/]
Project Leader	Coordination of the studies under the project[b/]	3
	Implementation of a component study	3
	Total	**6**
Study/Extension Leader	Implementation of one study under the project	3
	Total	**3**

a/ To earn credit as a program leader, he/she should also serve as a project and study leader. In serving as a leader of two projects, he/she will earn additional 2 credits, or 3 credits for an additional study or activity

b/ If implemented by more than one study leader

Researchers/extensionists should properly determine their research/extension involvement using the standard definitions (Table 2).

The type of involvement of faculty based on responsibilities and nature of work is shown in Table 2.

Table 2. Type of involvement of Faculty based on responsibilities and nature of work

Research/Extension Involvement	Role
Program Leader	One who directly plans, organizes and supervises the overall activities of a Research/Extension Program and is directly responsible for the conduct of one of the projects of the said program. *Should have at least 1 or 2 projects in the program.* Consolidates the entire program proposal and terminal report.
Project Leader	One who directly plans, organizes, supervises and conducts the implementation of a basic unit of investigation of a specific research or extension. *Should have at least 1 or 2 studies. Consolidate the entire project proposal and terminal report.*
Study Leader	One who supervises and conducts the investigation of a specific research study/under a particular project

Mechanics to earn RDE Credit units

a. Upon approval of the research/extension proposal, the program/project/study leader shall submit a photocopy of the said proposal to the Office of the Vice President for Research, Extension and Knowledge Management (OVPREKM).
b. Upon verification from the Research/Extension Director, the OVPREKM shall issue Notice to Proceed (NTP) to the program/project/study leader indicating workload credits earned.
c. The researcher will sign commitment to finish the research within the period as provided in the proposal.
d. A list of all researchers and extensionist with RDE workload credit units will be issued to respective College/Campus Deans.
e. Progress/status report shall be submitted regularly/quarterly or as required by the RDE Monitoring and Evaluation Unit.
f. In case where the approved program/project/study cannot be completed on the expected period, the program/project/study leader shall request for approval of extension to the University President, attention to OVPREKM indicating the justification/reason for extension and expected period of completion. The approved extension of the implementation of the program/project/study shall no longer entitle the researcher/extensionist with an additional work load credit.

2. Publication Award

Automatic cash award will be given for each scholarly article of a faculty member or researcher published in an international peer reviewed journal and for a book published by a reputable international publisher; automatic cash award for each scholarly article of a faculty member or researcher published in a national peer reviewed journal and a cash award for a book published by a reputable publisher or organization. An implementing guideline detailing the mechanisms as well as the amount of the award is shown in the BOR approved proposals below:

3. Research Awards, Publication Incentives & Grant

This is given to a university faculty who has brought honors to the University by having distinguished himself in research and extension as supported by having won best papers in scientific forum or recipient of awards by reputable bodies for pioneering activities, extra-ordinary performance and merit.

a. Sanggaya (Outstanding University Faculty Researchers) Award *(BOR Res. No. 03, s. 2018)*

Aside from promoting behavioral changes that manifest the organizational core values, reward and recognition incentive mechanism, brings out the best among faculty members. These underscore the need to provide and design rigorous selection criteria for the award that: (1) demand exemplary performance and outstanding achievements in RDE; (2) reflective of the core values of PSU as an academic institution; and (3) befitting the dignity, honors and prestige commensurate with the award.

Objective. Design criteria/mechanism to reward and recognize faculty for their exemplary and outstanding achievements in research and extension.

Nature of the RDE Award. The ***Sanggaya* Award** (Outstanding University Faculty Researcher) shall be given to PSU faculty members who had satisfied, and garnered the highest score of 85 points and above of the selection criteria. The award should be given annually. In case no one qualifies in the selection year for failing to meet the minimum number of points in the selection criteria, such award may be cancelled for the year.

Recognition and Reward Mechanism. A cash incentives of PhP 50,000, and a Plaque of Recognition should be given to each single awardee of Sanggaya Award (Outstanding University Faculty Researcher). The Plaque of Award and Cash Incentive should be awarded during the University Foundation Day.

Selection Committee. The selection committee for Outstanding University Faculty Researcher should be composed of:

- Vice President for Research, Extension and Knowledge Management, as Chair
- Director of Research
- Director of Extension and Community Services
- FAPARSU President
- Active Faculty Researcher/Previous Awardee
- People's Organization representative/Stakeholder Representative (External Member)

Minimum Requirement. A faculty who satisfies the following qualification can be nominated for the *Sanggaya* Award (Outstanding University Faculty Researcher):

a. Any bonafide/regular/permanent faculty member;
b. Has at least three (3) years continuous service immediately preceding the nomination; and
c. Has not committed acts of plagiarism, intellectual dishonesty and other acts of unprofessionalism.

The nominee can be nominated either way: by his/her superior (Dean or Department Head) or by his colleagues or by the Faculty Association of Partido State University (FAPARSU) Officials. Nomination letter may be sent to the Selection Committee in January until February each year. The nomination letter must contain appended copies of credentials of the nominee.

The credential will be organized following the selection criteria and point allocations which can be requested in advance from the Selection Committee. The portfolio should contain copies of the publications, presentations, certificates, testimonials, assessments, and photographs of activities and other proofs of all items indicated in the Accomplishment Summary. Documentation of the extension processes and their outcomes/ impact is a must. Winners may be eligible for re-nomination three (3) years after receiving the awards with new accomplishments. Non-winners can be re-nominated on the following year.

Coverage of the award and Accomplishments. The research/extension accomplishment of the nominee should be within the last five (5) years. These accomplishments were credited as accomplishment of the university such as PBB, SUC Leveling, Normative Financing, CNA and other required reports as mandated from the university.

The metrics for selection for *Sanggaya* Award (Outstanding University Faculty Researcher) is shown in Table 3.

Table 3. Metrics for Selection for *Sanggaya* Award

Indicator	Maximum Points	Level/Points	Supporting Documents
Research Presentation	10	International – 3 National – 1 Regional – 0.5	Certificate of Presentation Picture Letter of Acceptance Program/Proceedings
Publication and /Patent of Research Outputs (Senior Author/2nd co-author)	30	International Refereed ISI – 10 International Refereed – 4 National Accredited Journal – 3 Patented Invention – 10 Patented Utility Model – 1 Patented Industrial Design – 1	Photocopy of Journal Photocopy of Registered Invention/Utility Model/Industrial Design
Externally Funded Research Project	20	International – 6 National – 5 Regional/Provincial/District – 3	Approved Proposal MOA
Awards in Research by Prestigious Award Giving Body i.e. government (DOST, BCHRD, PCARRD, BCARRD, PCIERRD, NAST, NFRDI, DENR, NEDA, PDA) by prestigious Non- Government Organizations i.e. Ford Foundation, Pew Fellow, Haribon, Conservation International Note: Awards given by National/ International Symposium/Research Presentation, endorsed/not endorsed by CHED without historical record of giving award, are not included.	30	National – 5 Zonal – 3 Regional – 2 Agency In-house Review – 1	Plaque/ Certificate of Recognition
Membership in Scientific Organizations	5	International – 2 National – 1	Identification Card/Certificate of Membership / Receipt
Involvement in Research Activities	5	International – 4 National – 2 Regional – 1 In-House Funded Research – 0.5	Appointment
Total Points	100		

Whoever got the highest score points of 85 and above, will be declared *Sanggaya* Awardee (University Outstanding Faculty Researcher).

Source of Fund. The University shall allocate an amount for these awards from the University Research and Extension Budget. Such cash incentive should be consistent with provisions in the CNA (Collective Negotiation Agreement), Faculty Manual and the state auditing and accounting rules and regulations.

b. Guidelines in the Recognition of Presented and Published Research Outputs

(BOR Res. No. 73, s. 2019)

This is to recognize the disseminated research outputs for purpose of university support, incentives, IPCR claims, OPCR accomplishments, and other similar systems.

Objectives

i. Identify and define parameters that will serve as basis in the recognition of conference presentations and publications of research papers for university support; claim of achievement in IPCR/OPCR, SUC levelling, and other systems; and for grant of incentives;
ii. Establish institutional procedures for the application of the parameters in the immediately preceding objective;
iii. Provide unequivocal rules of action in the treatment of applications and/or claims for recognition of disseminated research outputs;

iv. Encourage and assist faculty-researchers and authors to present their research outputs in regional, national or international conferences and publish the same in reputable publications;
v. Streamline the processes involved in claims for achievements on research output dissemination in deference to the advocacies for ease-of-doing-business; and
vi. Empower and equip the Deans in order to positively engage their accountabilities along research outputs of their respective delivery units.

Definition of Terms

Reputable publications. National or international journals of good standing, indexed in Scopus, ISI, WOS, or recognized by CHEd (for SUC levelling).

Research Output. For the purposes of this guidelines, this term is limited to papers produced out of internally and externally-funded research projects provided those pertaining to ongoing projects shall correspond to component-studies already completed.

Recognition. For the purposes of this guidelines, recognition of a research output presented in a conference or published in a journal shall mean its identification, categorization, or characterization as being compliant to the standards of the scientific community. When such output is recognized by the university, thru the rules provided herein, rights shall accrue to the authors/researchers for support, incentives, points in IPCR, points in delivery unit's claim for accomplishments and other permissible indicators.

Procedure on Conference Presentations

i. All claims / applications for support of presentations within the region must be approved by the VPREKM upon recommendation of the Research Director initialed by the Dean/s concerned; all others must be approved by the President upon recommendation by the VPREKM duly initialed by the Dean/s concerned. For this purpose, the existing Travel Order/Authority template shall suffice provided the applicant annotates in the Purpose section therein the Source of Fund (whether Trust Fund, or otherwise) and the title of the approved project;

ii. All claims / applications shall be accompanied with the Notice of Acceptance (or similar document) by the organizing body, and the approved project proposal;

iii. The Deans and the VPREKM shall, based on the following criteria / parameters, act on the application within fifteen (15) calendar days upon receipt thereof at the lapse of which the application shall be deemed approved should there be inaction on the part of the approving authorities:

    - The output to be presented is a research-based;
    - The research output presented is as defined above;
    - he paper has not yet been presented in any other external conference;
    - The conference is endorsed by CHEd and other government agencies, or national and international venues recognized by scientific community; and
    - The presentation was made within 3 years after the completion of the project;

iv. Certification by the Budget office as to the availability of funds for travel expenses, registration fees, and other relevant expenses must be secured, unless the approved project has allocated budget for said expenses, in which case the Dean's recommendation should likewise certify that such allocation exists. For this purpose, it shall be the duty of the Dean/s concerned to see to it that the application complies with this requirement before his/her initial or recommendatory signature is affixed;

v. Three copies of the documents shall be prepared: one for the office of the Dean concerned, to be filed and secured by the Research Coordinator; one for the R&D office for monitoring and filing purposes; and one for the applicant; and

vi. Conference proceedings, narrative report, and other pertinent documents shall be submitted to the Deans concerned, and the R&D office within seven (7) calendar days upon return to office by the presenters without prejudice to other requirements under DBM/COA regulations.

Procedure on Publications

i. The Deans and the VPREKM shall, based on the following criteria / parameters, act on the application within fifteen (15) calendar days upon receipt thereof at the lapse of which the application shall be deemed approved should there be inaction on the part of the approving body:

   - The output to be published is a research output; or the output is a full paper corresponding to one previously presented in a conference;
   - The research paper published is as defined above;
   - The publication was effected within 3 years after the completion of the project; and
   - The journal is a reputable publication. Journals that charge publication fees are discouraged.

ii. All applications for recognition of publications must be filed in a form to be created for this purpose, and to be approved by the University President upon recommendation by the VPREKM duly initialed by the Dean/s concerned. The application shall be accompanied with copy of the article's abstract, Journal's title page, table of contents showing the titled of the article, actual pages. Three copies of these documents must be prepared: one for the office of the Dean concerned, to be filed and secured by the Research Coordinator; one for the R&D office for monitoring and filing purposes; and one for the applicant; and

iii. Provided all research outputs / papers that have been presented or published, or have been approved by university authorities for presentation or publication, even for ongoing projects, shall no longer be covered.

c. Policy on Incentives for Publication and Award- Winning University Faculty Research Output (Kilyab Award) and for Research Outputs Patented and Commercialized/Utilized (Techno Award) *(BOR Res. No. 12, s. 2020)*

This is to encourage faculty researchers to engage in this scholarly works for professional growth (NBC points) while contributing to meet the University's targets on published researches, invention and commercialized research outputs.

i. Publication Incentives/Awards

This award is to be conferred to researchers whose research outputs were previously granted recognition pursuant to a policy to this purpose categorized below to incentivize their exemplary contribution in the attainment of the University's targets under the indicator "Published researches".

Forms and Category of Award

Category 1 – Journals included in the list of Thomson Reuters (ISI), Scopus (by Elsevier), Source publication list in Web of Science (WOS)-clarivate analytics, author shall be eligible to receive **P 65,000.00** if the hard copy of the entire journal is presented and **P 45,000.00** if e-copy with complete supporting documents.

Category 2 – Peer-reviewed or refereed journals that are indexed or listed in high quality abstracting and indexing (A&I) services other that what is listed in category 1, author shall be

eligible to receive **P 15,000.00** if the hard copy of the journal is presented and **P 10,000.00** if e-copy with complete supporting documents.

Category 3 – Journals accredited by CHED and classified as category A and B (based on issued CMO) and those researches published as book chapters of recognized publishers, author shall be eligible to receive **P 9,000.00** if the actual journal / book is presented and a CMO issued by CHED.

Distribution of Cash Incentives:

For researches of multiple authors from ParSU, cash incentives will be divided based on the following: Principal author(s) (60%), Members/Co-Authors (40%).

ii. Kilyab Award

This award is conferred to researchers whose completed research papers in the University were presented in a competitive paper presentation and whose research-based generated technology outputs such as inventions, utility models, industrial designs were presented in a competitive recognized exhibits or forum such as but not limited to the DOST BRICE/ BCIEERD Symposium, etc and previously granted recognition pursuant to policy to this purpose and garnered an award as best paper or best exhibit's entry categorize in the forms and level of awards as shown below:

Forms and Levels of Award

International Level -		Certificate of Recognition
1st Best Paper/ Technology output entry -	Cash Award	P 15,000.00
2nd Best Paper/ Technology output entry -		P 10,000.00
3rd Best Paper/ Technology output entry -		P 7,000.00
National Level -		Certificate of Recognition
1st Best Paper/ Technology output entry -	Cash Award	P 12,000.00
2nd Best Paper/ Technology output entry -		P 8,000.00
3rd Best Paper/ Technology output entry -		P 5,000.00
Zonal/ Regional Level -		Certificate of Recognition
1st Best Paper/ Technology output entry -	Cash Award	P 7,000.00
2nd Best Paper/ Technology output entry -		P 5,000.00
3rd Best Paper/ Technology output entry -		P 3,000.00
University Agency In-House Review (AIHR) -		Certificate of Recognition
1st Best Paper/ Technology output entry -	Cash Award	P 5,000.00
2nd Best Paper/ Technology output entry -		P 3,000.00
3rd Best Paper/ Technology output entry -		P 2,000.00

Guidelines and Procedures in Claiming the Incentives

The claimant should consider the following criteria or requirements:

- Research paper to be presented for the current year shall be a completed research output submitted to the R&D office as part of his/her college or campus accomplishment under "completed researches" within the last three years (i.e. year 2019 published paper 1 (paper completion date is within the years 2017, 2018 or 2019).

Attach or provide the following:

- Copy of the approved research proposal;
- Copy of the abstract of the research paper presented or photo documentation of the prototype exhibited;

- Copy of the forum program where the following information are present; title of the presentation or forum activity, the classification of the presentation whether International/National/Regional/Institutional (University level);
- Certificate of recognition for the award received; and
- Copy of the conference proceedings.

For researches of multiple authors from ParSU, cash incentives will be divided based on the following: Principal author(s) (60%), Members/Co-Authors (40%).

iii. Techno Award (Patented Outputs and Commercialized/Utilized / Applied for Patents)

This award is to be conferred to researchers whose research outputs were issued by IPOPhil a certificate of patent for Invention, Utility Model or Industrial Design categorize as shown below:

Invention and Commercialized	- P 60,000.00
Invention and Utilized by beneficiaries	- P 40,000.00
Utility Models (UM)/ Industrial Designs (ID) and Commercialized	- P 10,000.00
Utility Models (UM)/ Industrial Designs (ID) and utilized by beneficiaries	- P 7,000.00
Applied for patents and commercialized/utilized	- P 5,000.00

Guidelines and Procedures in Claiming the Incentives

The claimant should consider the following criteria or requirement:

Research paper outputs To Be Patented for the Current Year shall be a completed research output submitted to the R&D office as part of his/her college or campus accomplishment under "completed researches" within the last three years for Utility Model (UM) / Industrial Designs (ID) (i.e year 2019 awarded with UM/ID is a product of research with completion date within the years 2017, 2018 or 2019) or for **invention** within 5 years after research has been completed.

Attach or provide the following:
- Copy of the approved research proposal;
- Copy of the abstract submitted and stamped by the IPOPHIL personnel;
- Copy of the issued certificate of patent as invention /UM / ID;
- Identify the product name/methods/process/ technology (proof description and documentation and the identified beneficiaries);
- Copy of the MOA with industry or adopters;
- Business Permit if commercialized; and
- Copy of the application for patent for not yet patented outputs.

The Research Director upon verification of the document and recommendation by the VPREKM shall endorse the techno award claimant to the University President for approval.

The faculty researcher (claimant) will be notified within 2 weeks of the status of his/her claim.

For researches of multiple authors from ParSU, cash incentives will be divided based on the following: Principal author (60%), Members/Co-Authors (40%).

Definition of Terms

ISI Refereed Journal. Refers to ISI indexed journals such as but not limited to Elsevier Scopus, Thompson Reuters Journals or those journals listed in the Web of Science (WOS) clarivate analytics where research-based articles or books are published after passing the rigorous process of blind review or evaluation by a panel of external referees who are experts in the subject matter

CHED Accredited Journal. A research publication that officially passed the screening of the CHED panel of evaluators based on current guidelines on CHED Accredited Research Journals.

Competitive Awards. Awards given by legitimate award-giving bodies such as but not limited to professional organizations, government agencies, NGOs, and academe.

Best Paper. Refers to an award conferred to researchers whose completed research or paper are adjudged as first, second, third best papers and qualifies to the criteria set by the reputable award giving bodies.

Invention. Research output that provides technical solution of a problem in any field of human activity which is new, involves an inventive step and industrially applicable with Certificate of registration issued by IPOPhil.

Utility Model. Research output that provides technical solution of a problem in any field of human activity which is new, and industrially applicable with Certificate of registration issued by IPOPhil.

Industrial Design. Research output with the following features: composition of shape, lines, colors, or a combination thereof or any three dimensional form, an aesthetic and ornamental effect in their tout ensemble or when taken as a whole; provided that such composition or form gives a special appearance to and can serve as pattern for industrial product or handicraft with Certificate of registration issued by IPOPhil.

Source of Fund

The University shall allocate an amount of 1.5 million from its annual income for the three (3) identified incentives. Any unexpended allocation will become part of the savings from Income.

All claims whose date of publication, issuance of awards and certificate from IPOPhil prior to the approval are no longer covered.

d. Incentives for the Citations of University Research Outputs *(BOR Res. No. 39, s. 2020)*

Citation Incentives

This incentives is to be conferred to researchers whose research outputs were cited in a specific research article published in a refereed international publication (such as Elsevier Scopus, Thomson Reuters Journals), CHED accredited journal, and Books that acknowledged the scientific contribution or relevance of the cited article or research-based paper to the topic being discussed or to the research works being conducted by other researchers.

Forms and Category:

Category 1 – Research works cited in **Journals included in the list of Thomson Reuters (ISI)**, Scopus (by Elsevier), Source publication list in Web of Science (WOS)-clarivate analytics, or cited in

books/book chapters of recognized publishers, author shall be eligible to receive **P 7,500.00 per citation** with complete supporting documents.

Category 2 – Research works cited in **Journals accredited by CHED/JIP awardee journals and classified as category A and B** (based on issued CMO), author shall be eligible to receive **P 5,000.00 per citation** with complete supporting documents.

Category 3 – Research works cited in **Peer-reviewed or refereed journals** that are indexed or listed in high quality abstracting and indexing (A&I) services other that what are listed in category 1 & 2, author shall be eligible to receive **P 1,500.00 per citation** with complete supporting documents.

Category 4 – Research as output of the theses/dissertations of ParSU faculty cited in journals classified in any of the Categories 1 to 3, shall be eligible to receive **P 1,000.00 per citation** with complete supporting documents.

Distribution of Cash Incentives:

The incentives will be awarded to the main author only, unless otherwise, the main author express in written form his/ her willingness to share with his/her co-authors, the incentives will be divided based on the following scheme: Principal author(s) (60%), Members/Co-Authors (40%). Once the main author retires from the University, incentive's claim is no longer valid and not transferable.

Guidelines and Procedures in Claiming the Incentives

i. The author must submit a letter of intent to claim incentives address to the University President, attention to the VPREEA and copy furnished the Research Director.

ii. The claimant should comply with the following requirements in 3 copies (1 copy for the OP, 1 copy for the OVPREEA and 1 copy for the RDO) for filing purposes:

   a. The research paper cited within the preceding/current year of claim, and recognized by the R&D office as part of the college/campus accomplishment under "completed researches" regardless of year of completion (duplicate claim is not allowed). Published outputs of the faculty theses/ dissertations are also eligible provided the office will be given a photocopy of the title page, the table of contents, approval sheet or its equivalent, abstracts and electronic copy of the theses/dissertation manuscript for it to be recognized by the R&DO.

   b. Attach or provide the following:
      - Copy of the approved research proposal for the cited paper
      - Copy of the abstract of the research paper cited
      - Copy of the full article published where the ParSU research work was cited
      - Proofs mentioned above should show the following information:
      - ParSU Research Paper: Author, Co-Authors, Year completed, Title of the Research Paper, indicate if published or unpublished, Volume/ number of pages
        -Article which cited the paper: Author(s), Article title, Year published, title of Refereed/International/National Journal, Volume/Pages (see attached form to be filled out)

iii. Before processing, the claimant will be required to fill up a template which will be prepared by the ORD (Table 4).

Table 4. Citations

No.	CITATIONS					CITED BY				
	Author	Year	Title of Study/ Manuscript/ Topic of Study	Indicate "1" for published / "2" for unpublished	Volume/ Pages	Author	Article Title	Publication/ Year	Refereed International/ National	Volume/ Pages

Definition of Terms

ISI Refereed Journal. Refers to ISI indexed journals such as but not limited to Elsevier Scopus, Thompson Reuters Journals or those journals listed in the Web of Science (WOS) clarivate analytics where research-based articles are published after passing the rigorous process of blind review or evaluation by a panel of external referees who are experts in the subject matter.

CHED Accredited Journal. A research publication that officially passed the screening of the CHED panel of evaluators based on current guidelines on CHED Accredited Research Journals (with CMO issuance).

Citation. Reference to a specific research article published in a refereed international publication (such as Elsevier Scopus, Thomson Reuters Journals), CHED accredited journals and Books that acknowledged the scientific contribution or relevance of the cited article or research –based paper to the topic being discussed or to the research works being conducted by other researchers (Joint Circular No. 1, s. 2016).

Research Outputs. Research outputs may comprise any or all of the following:

- Completed research-based papers or articles that are published in CHED accredited journals; international refereed publications such as Elsevier Scopus and Thomson Reuters Journals.
- Research-based papers presented in international, national, or regional forums or conferences; including in-house conference.
- Research-based paper as output of the theses/dissertations of ParSU faculty published in refereed journals.
- Inventions or innovations-any novel method, composition or process resulting from research; including those utility models, with patents and copyrights, and those with patent certification application in process
- Inventions utilized and commercialized research outputs duly patented and applied for commercial purposes, or utilized by adopters for development/production/services provision.
- Research as output of the theses/ dissertation of ParSU Faculty

Table 5 below presents the basis for allocating points under KRA 2, citation indicator: (JC # 1, s. 2016)

Table 5. Citation indicators (CHED)

5. Citations in the past three years	0.5
a. Total number of citations in articles published by other researchers in refereed international or national journal *(such as Elsevier Scopus, Thomson Reuters Journals, and CHED Accredited Journal)*	0.25
480 and above	0.25
250 to 479	0.125
20 to 249	0.0625

b. Each research-based paper cited by book authors	0.25
10 and above	0.25
1 to 9	0.125

Support for Paper Presentation outside Philippines, Creative and Research Projects

Support to researchers with accepted research for presentation outside the Philippines. The Creative and Research Scholarship Fund provides grants to faculty for textbook writing and creative or research work in the form of research contract

e. Guidelines for PSU Financial Support/Assistance for Paper Presentation in International Conference *(BOR Res. No. 10 s. 2011)*

International conference provides opportunity for disseminating research results. It is a venue of exchange of scientific ideas generated from research findings. It also serves as a venue for enrichment of knowledge and skills by exposing researchers to latest developments in their field of specialization.

For the University to extend its support to the researcher/employee with accepted paper for international paper presentation, this proposal was prepared to serve as basis.

Objectives

i. To provide financial support for PSU researchers whose papers have been accepted for presentation in international conferences/convention/seminars/workshop fora held outside the Philippines;
ii. To provide opportunities for PSU researchers to disseminate their research outputs and findings; and
iii. To encourage PSU researchers to aim for presentation of their research findings in international level.

Definition of Terms

Employee – teaching and non-teaching personnel of Partido State University holding a permanent status of employment in the University

International Paper Presentation – a forum/conference or similar venue where scholarly outputs of the employee are accepted for presentation outside the Philippines

Paper(s) for Presentation – include research, research/extension-based outputs, and scholarly article on policies and best practices which are accepted for presentation and dissemination

Qualification

This financial support is open to PS employee who satisfies the following requirements:

i. He is a full time faculty/employee.
ii. He is holding a permanent position.
iii. His paper has been accepted for oral presentation or poster exhibit in an international conference/convention/seminar/workshop for a held outside the Philippines.

Subject of the Accepted Paper

The accepted paper should be in accordance with the CHED priority areas and/or identified in PSU Research Agenda.

Financial Support

The financial support shall be in the amount of **Twenty Thousand Pesos only (₱ 20,000.00)** for presentation in Asian Countries and **Thirty Thousand Pesos only (₱ 30,000.00)** for presentation in South/North/Central American, European or Australian countries.

Application Procedure and Requirements

i. For Faculty Researcher:

An application letter noted by the Campus of College Dean/Program Director/University Research Director must be forwarded to the Office of the Vice President for Academic Affairs for endorsement to the President and recommending approval of the same for at least one (1) month before the date of the conference.

ii. For Non-Teaching Personnel:

An application letter noted by the Section Chief/Head of the Department and the University Research Director must be submitted at least one (1) month before the date of the conference to the Office of the Vice President for Administration. The VP for Administration is responsible for endorsing it to the University President.

Three sets of the following documents should be submitted together with the:

- Copy of the full paper accepted for presentation
- Photocopy of the acceptance letter/invitation letter/endorsement letter from CHED
- Photocopy of the conference brochure

In case of co-authored researches, the principal author/study leader shall have the right to present the paper.

A faculty/non-teaching personnel is entitled to one (1) slot for the same paper for one year and two (2) slots for two (2) different papers.

A Technical Working Committee (TWC) will be created to verify the credibility of the fora/conference- sponsoring agency if it is not endorsed by CHED.The members of the TWC are the Vice President for Administration, Vice President for Academic Affairs, Chief – Finance Office, University Planning Director and the University Research Director.

- The financial support shall be payable directly to the beneficiary and must be given before his/her travel.
- Maintain the necessary standard of a researcher/scholar
- Conduct himself/herself in such a manner so as to bring honor to her, the PSU and the country
- Report immediately to the President after the conference

Within one (1) month after the beneficiary's return, he/she shall submit to the University President the following documents and copy furnish of the Office of the University Research Director:

- Conference certification as paper presenter
- Copy of the official conference proceedings
- Written report supported with pictures on the highlights of the conference indicating observations, learnings, and recommendations
- Travel ticket

Refund in full to PSU the amount received as stated in this contract for failure to present his/her paper in the conference an comply with any of the foregoing conditions through his/her fault or willful neglect, resignation, voluntary retirement, or other causes within his/her control. It is being understood that proportionate refund shall, in no case, be allowed.

The PSU shall:

i. Relieve the beneficiary of his/her duties and responsibilities in the University on the duration of the conference inclusive of his/her travel time as reflected in his/her approved Travel Order. During which period he/she shall be on official time basis.

ii. Grant the financial support for the paper presentation in the amount of **Twenty Thousand Pesos only (₱ 20,000.00)** for presentation in Asian Countries and **Thirty Thousand Pesos only (₱ 30,000.00)** for presentation in South/North/Central American, European or Australian countries.

Honoraria

This is another form of incentive granted to researchers which aims to encourage productivity as well as acknowledge the performance and efficient delivery of outputs. Since the research budget in the university is from MOOE, no honorarium is provided to researchers. But researchers with externally funded research with provisions for honorarium receive this incentive.

Credit for Academic Ranking

Researchers may claim credit for the purpose of determining academic rank for their research output subject to the criteria of the PASUC, the accrediting body concerned. These credits may be claimed on researches only after they have been completed, and published.

Intellectual production through scholarly publications of research outputs shall be encouraged through reasonable logistical support. Promotion to higher academic ranks (e.g. Associate Professor and Professor ranks) shall be based in part to the "quality of their research and contribution to the world's fund of knowledge (CHED NHERA 1998-2007) and taking into consideration of the relevant provisions of NBC 461 and subsequent issuances.

Other incentives

These include royalties for those researches reproduced in formats of books, manuals or handbooks, or invented and reproduced development projects that may be sold to various clienteles. These incentives must be within the legal provisions set by the University.

M. RESEARCH STAFF DEVELOPMENT

As part of the University's professionalization program, the following staff development programs are implemented:

1. Immersion

This is a staff development program where the PSU forges a memorandum of agreement with a well-established institution of higher learning for support and assistance in developing its manpower resources towards becoming attuned with the needs of the times.

2. Scholarships

Scholarships come in varied schemes such as study leave with pays, study leave without pay, or weekend scholarship.

3. Training

Training for specialized skills locally or internationally may be made available to faculty members as research project requirement. Individual staff may scout for training opportunities.

4. Participation in Conferences, Seminars, Meetings, and Conventions

Researchers are allowed to participate in these activities as resource speakers, paper presenters, or participants.

5. Study Tours

Study tours arrangements for researchers are made to widen the staff's exposure to researches being conducted.

6. Consultancy and Secondment

The University allows faculty to serve as consultants in technical undertakings as well as their appointment to other agencies for special detail or for teaching in other institutions with which the PSU has MOAs subject to existing rules and regulations. Details about their terms of reference, payment and other benefits are covered in their specific MOAs.

N. THE UNIVERSITY RESEARCH INTELLECTUAL PROPERTY RIGHTS AND AUTHORSHIP GUIDELINES

The Intellectual Properties (IP) are the products of the University researchers. They are called intellectual properties because they are products of human intellect and creativity and are subject to ownership and time-limited protection of rights. (UPLB Res. Manual) The Partido State University adopts the following provisions related to the protection of intellectual property rights of researchers:

1. Protection of Intellectual Property Rights

Republic Act 8293 which was enacted in January 1, 1998 and known as the Intellectual Property Code of the Philippines is the law that covers and protects intellectual property. The IP Code contains the Law of Patent, the Law of Utility Model, the Law of Industrial Design, the Law of Layout Design of an Integrated Circuit, the Law of Trademark, the Law of Copyright, and the Trade Secret or Undisclosed Information.

Patent is a statutory grant by the government given to an inventor the exclusive right to make, use, sell or import the invention. Patentable inventions are those considered as new solutions to technical problems in any field of human activity such as useful machine, product, process or improvement of any of the foregoing- microorganism, non-biological and microbiological processes. The requirements for patentability are novelty, inventive step and industrial applicability, and the term of protection in 20 years.

Utility Model is a technical or functional improvement of an existing product or technology such as a useful machine, an implement or tool, a process or method. The requirement for registration is novelty or newness and industrial application, while the term of protection is 7 years.

Industrial Design is any ornamental or aesthetic design that gives a special form or appearance to an industrial product or handicraft. The requisites for registration are: new/original, article of manufacture, not dictated by technical or functional considerations and not contrary to public order, health and morals. The term of protection is 5 years.

Layout Design of an Integrated Circuit is an original topography or special arrangement of elements of an integrated circuit intended for manufacture. An integrated circuit is a product composed of interconnected elements intended to perform an electronic function. Its requisites for registrability are as follow: a layout design consisting of a combination of elements and interconnections that are commonplace shall be registered only if the combination is original. The term of protection is 10 years.

Trademark is any visible sign used to identify goods or services (service marks) which are capable of distinguishing the goods or services of an enterprise. Its term of protection is 10 years.

Copyright is a protection for original expression such as literary, artistic, (paintings, sculpture, cinematography, photographs) scholarly and scientific creations (e.g. computer programs). The term of protection is lifetime of the author/artist/creator and 50 years after his death.

Trade secret or undisclosed Information is confidential information which has commercial value and is subjected to reasonable steps to keep it secret.

Research outputs of PSU personnel which will fall under inventions, utility models industrial designs, computer programs, as well as literary, scholarly, and artistic/creative works are covered by the IP Code.

As a general rule, Partido State University and the researchers shall have joint ownership of a patent or copyright.

2. PSU Policy on Patents and Copyrights of Intellectual Property

To protect and safeguard the intellectual property outputs produced by PSU Personnel, these policy guidelines are adopted;

Ownership of intellectual property is covered by the national law and the university policies.

Under RA 8293

According to Section 30 of the IP Code, there are certain conditions to be satisfied to determine the ownership of the patent of the intellectual property, particularly if a work was commissioned.

An employer-employee relationship exists between the university and the researcher/faculty. As such, it is understood that the researcher/faculty conducts research commissioned by the university. Under Section 30 of the IP Code – Inventions Created Pursuant to a Commission – the person who commissions the work shall own the patent, unless otherwise provided in the contract. However, following subsections provide that:

"Sec. 30.2. In case the employee made the invention in the course of his employment contract, patent shall belong to:

a) the employee, if the inventive activity is not part of his regular duties even if the employee uses the time, facilities, and materials of the employer;

b) the employer, if the invention is the result of the performance of his regularly assigned duties, unless there is an agreement, expressed or implied, to the contrary."

Copyright, on the other hand is not pursued by the university itself. Copyright cannot subsist over works of government. Since the PSU is a government entity, technically, no copyright can subsist over works. However, copyright exists in the works of its personnel and such copyright can be assigned to the University.

3. University Requirements Related to Intellectual Property Rights

All PSU employed personnel teaching or non-teaching who may be expected to conduct research of any kind shall be required to sign an Invention/Patent Agreement in anticipation of any invention/patentable/literary or creative work.

This Invention Patent Agreement is a contract wherein an employee agrees to the following:

1. Joint ownership of inventions and patents;
2. Transfer or assign the patent or the patent application to the university whenever requested by the university;
3. Free, full, and prompt disclosure of inventions to the immediate head / Research Director;
4. Assign any invention of patent issued to the proper party for such period of time as may be determined by the university;
5. Assist in preparing or modifying patent application or both and in any litigation that may be necessary to obtain, assert or defend any patent, local or foreign;
6. Exercise reasonable judgment in discussing any information concerning an invention until such time that disclosure of such information will not compromise the rights of the university; and
7. Share royalties or any amount in accordance with the PSU Rules and Regulations, unless there is a previous agreement in writing to a different scheme.

4. University Rules

Under the university rules on copyrightable and patentable work, the source of funds used to create an intellectual property is considered in determining ownership, be it a patent or a copyright of a creative work.

5. Administrative Process

Protection of the University intellectual property shall be under the auspices of the University Research Council. It will be tasked to look after the interests of PSU researchers, teaching or non-teaching, including students to ensure that their creative works are properly protected and properly promoted and used.

The URC shall monitor and evaluate intellectual property outputs that are commercially patentable and can be commercialized. The administrative process in filing for copyright or patent application shall be done through the URC.

6. Authorship

Authorship is an explicit way of assigning responsibility and giving credit for intellectual work. Authorship practices should be judged by how honestly they reflect actual contributions to the final product. Authorship is important to the reputation, academic promotion, and grant support of the individuals involved as well as to the strength and reputation of their institution.

Decisions regarding promotion, tenure and salary are heavily influenced not only by the number of publications in peer-reviewed journals but also by the number of first-authored publications. Professionals with strong publication records are often considered to have more competence and expertise than their less published counterparts.

7. Authorship Rules

a. Researchers take responsibility and credit, including authorship credit; only for work they have actually performed or to which they have contributed.

b. Principal authorship and other publication credits accurately reflect the relative scientific or professional contributions of the individuals involved, regardless of their relative status. Mere possession of an institutional position, such as Research Director or College Dean does not justify authorship credit. Minor contributions to the research or to the writing for publication are appropriately acknowledged, such as in footnotes or in an introductory statement.

c. Everyone who is listed as an author should have made a substantial, direct, intellectual contribution to the work. For example (in the case of a research report) they should have contributed to the conception, design, analysis and/or interpretation of data. Honorary or guest authorship is not acceptable. Acquisition of funding and provision of technical services, or materials, while they may be essential to the work, are not in themselves sufficient contributions to justify authorship.

d. Everyone who has made substantial intellectual contributions to the work should be an author. Everyone who has made other substantial contributions should be acknowledged.

e. When research is done by teams whose members are highly specialized, individual's contributions and responsibility may be limited to specific aspects of the work.

f. All authors should participate in writing, reviewing and finalizing of the manuscripts.

g. Senior author should take primary responsibility for the work as a whole. He should assure that his co-authors meet basic standards for authorship and prepare a concise, written description of their contributions to the work, duly approved by them. This record should remain with the sponsoring college and research center.

8. Order of Authorship

a. The authors should unanimously decide the order of authorship.

b. Authors should specify in their manuscript a description of the contributions of each author and how they have assigned the order in which they are listed so that readers can interpret their roles correctly.

c. The senior author should prepare a concise, written description of how order of authorship was decided.

d. A student should be listed as principal author on any multiple-authored article that is based primarily on the student's dissertation or thesis.

III. EXTENSION AND COMMUNITY SERVICES DIVISION

III. EXTENSION AND COMMUNITY SERVICES DIVISION

A. HISTORICAL BACKGROUND AND LEGAL BASES

Historical Background

Partido State University (PSU) created thru RA 9029, is mandated to provide professional and technical instruction and training in the arts and sciences as well as to promote extension services responsive to the needs and demands of Partido Area for greater personal dignity and economic security.

Extension services therefore is an integral function of the University. It is a vital part in the attainment of its goals and objectives which led to the establishment of the extension Council to carry out these objectives. This integral component of the university to be functional must conduct extension services responsive and directed towards the enhancement of the existing program of the University and in support of the country's goal toward economic progress.

Toward this end, the extension Division must state clearly the goal and objectives, areas of concerns, organizational structure and functions, and its implementing mechanism. This is done to ensure professionalism in the conduct of the extension services in this academic community.

Serving as the link of the academe to the community to fulfil our mandate of promoting extension services suitable to the needs of the service area, our division manages extension projects and programs of the University's seven campuses namely: Goa, San Jose, Lagonoy, Tinambac, Salogon, Sagñay and Caramoan.

PSU has been addressing the needs of the service area, and reaching out to different sectors of the community including the fisher folk and farmers, small entrepreneurs, out-of-school youths, differently-abled individuals, and senior citizens.

Our past extension programs include a marine protected area focused on coastal resource management project in Atulayan Island, Sagñay Camarines Sur; an ecotourism institutional development and capacity strengthening project in Caramoan; beachscape tourism area, a special education for the deaf and mute (SPED) Project; a community-based environment conservation radio advocacy project; a project for the capacity development of high school teachers and students in information technology' community health promotion, aquasilviculture and mangrove rehabilitation projects; and generating information and education and communication (IEC) materials on relevant development concerns to raise community awareness, inspire volunteerism and advocate gender sensitivity and empowerment.

In summer 2012, the Partido State University conducted a strategic planning effort to map the future for the next five years. The planning process was guided by university officials representing the different divisions and was instrumental in collecting and analyzing data to form the 2012-2017 PSU extension plans. As part of the process; opinions and insights from the different stakeholders, decision makers, employees, clienteles, and partners were given through agenda-setting meetings of different campuses and colleges of the University.

Insights from agenda setting and the participatory rapid resource appraisal through focused group discussions and key informant interviews formed the goals in the strategic plan that will direct future extension programs. Faculty engaged in extension works are guided by these goals to move PSU extension services onward. These goals underscore the need for improvement while maintaining the University's 18-year tradition of helping the community through extension and community services. PSU is governed by its code which directly supports the National Development Goals of the present administration. Extension and community services activities aim to address urgent and local needs considering long term implications and achievement of the UN Sustainable Development Goals.

Legal Bases

The Legal Bases for the extension are the 10-point Socio-economic Agenda (2016-2022), UNDP Sustainable Development Goals, Republic Act No. 9029, Republic Act No. 8292, National Extension Agenda and Programs, and Republic Act No. 8550 or Agriculture and Fisheries Modernization Act of 1997 (AFMA).

B. EXTENSION SEAL AND CORE VALUES

University Extension and Community Services Division Seal

The seal is the symbol of the Extension and Community Services. The nine circles and curved lines represents the University campuses unified together to promote and generate extension services for the different sectors of the community.

The hands at the center of the circle portray the University and the community's harmonious interaction through these extension programs and activities.

The official colors of the office are black and green. Black represents strength, seriousness, and power. Green is associated with meanings of growth, harmony, freshness, safety, fertility, and environment.

Core Values

To nurture and uphold the core values of people empowerment, gender sensitivity, enabling access to opportunities, sustainable use of resources, and promotion of participatory governance as critical to the achievement of our preferred vision.

C. VISION, MISSION, GOALS AND OBJECTIVES

Vision

The community that is self-reliant and equipped with productive skills and technological know-how to rationally utilize their environmental and natural assets and community resources and participate in rural development-oriented decision-making processes.

Mission

To catalyze the development and transformation of marginalized Partido communities into socio-ecologically resilient, food secure, and self-determined communities through capacity development, advocacy and participatory governance.

Goals

To delivers suitable and timely extension and community services effectively and efficiently and broaden the access of the Partido community to the University for community empowerment.

Objectives

1. Provide skills development to marginalized sectors of the community for employability and generation of livelihood;
2. Introduce and enable the adoption of new technologies for improved productivity in agriculture, fisheries, and related endeavors;

3. Increase the level of awareness of communities on environment and resource management, biodiversity conservation and disaster and risk reduction;
4. Mainstream the participation of communities in governance;
5. Initiate the establishment of rural enterprise involving women;
6. Conduct community-initiated environmental restoration and rehabilitation; and
7. Promote awareness and understanding of the different aspects of gender and development.

D. THRUSTS AND DIRECTIONS

Extension thrusts and directions shall guide our projects and activities following community and stakeholder's participation. These thrusts and directions are responsive to the most pressing development issues and challenges confronting the service area. These are in harmony with the Center Piece Program of the National Government, 17 Sustainable Development Goals, the Bicol Development Plan and other development blueprint of relevant government institutions in the region. These include:

1. Increasing agricultural and fish productivity through technology adoption
2. Resource management and biodiversity conservation
3. Socio-ecological resiliency to climate change impacts
4. Poverty alleviation in rural areas
5. Increasing literacy
6. Mainstreaming participation in resource governance
7. Social/Rural enterprise
8. Gender and Development
9. Tourism & Health

Definition of Terms

Technology transfer - the conveying of results based on research and related studies on technology.

Information Dissemination - the diffusion of acquired facts to improve knowledge, skills, and attitudes necessary for the development and well-being of a person or the community.

Development outputs - the results of technological findings and other studies that are applicable and suitable in improving productivity and increasing income of the target clientele.

Community service - welfare programs rendered in partnership with the communities, government organizations (GOs) and non-government organizations (NGOs) for community development.

Continuing education and training - the University extension program which covers the dissemination and diffusion of appropriate knowledge and technologies to the clients for effective transfer. This includes conduct of short-term trainings/courses, technology demonstration, distance education through school on the air, etc.

Extension modality - the development of extension delivery models for the holistic delivery of extension services of the university e.g. adopt-a-school program, farmers field school , community learning centers, CRM, Social Marketing, livelihood program & advocacy etc.

Technical consultancy – services in the form of advice from experts in various technical fields offered by the University.

Special Projects - programs/projects which are externally funded intended to provide extension services.

Short term courses/non degree training - special hands-on training offered by different colleges and campuses on specific topics.

E. EXTENSION PROGRAMS AND STRATEGIES OF IMPLEMENTATION

1. Extension Programs

Improve farming and fishing productivity of rural households. The transfer of appropriate farming and fishing technologies to rural households is the core of this objective. Low-technology, low-input technology farming and fishing households will be most suitable and helpful to rural farming households and will enhance the yield and outputs from farming and fishing production activities. A combination of instruction and demonstrations on model farms will be used to accomplish this objective. Regular conduct of short-term trainings, cross-visits, symposia, and forums will enhance the skills of fishers and farmers for modern and sustainable farming system. Consulting with individuals with technical expertise in agriculture will also be part of the program.

Establishment of information dissemination centers. The campuses responsible for this are the Salogon and Sagñay campuses headed by the Dean. Specializing in agriculture and fisheries, these campuses have the technical expertise in terms of farming. Competent faculty and useful facilities are key to conducting trainings and technology demonstrations. Linkages with organizations such as the Department of Agriculture (DA), Bureau of Fisheries and Aquatic Resources (BFAR), Department of Social Work and Development (DSWD), NAFES, MASIPAG, BFIRDEN and Agricultural Training Institute (ATI) will be tapped for professional expertise and funding. Extreme and erratic weather conditions may become a challenge in the implementation of technology demonstrations as these activities are affected by environmental conditions.

Enhancing entrepreneurial activities in farming and non-farming households. Extension programs to enhance the entrepreneurial activities of farming and non-farming households in rural and urban communities are presented. Households are encouraged and capacitated to engage in small profitable enterprises or livelihood activities to augment family income and promote self-employment. Major strategies include the facilitation of community to access micro-credit services, linking with financial and livelihood funding institutions, assisting the households and community to link their products to the market and promotion of self- establishment of community enterprise funding mechanisms. Also involved are livelihood activities and enterprise in the communities using technology generated from research and available funds sourced from NGOs, government agencies, organizations and individuals using a set of criteria and given sustained technical assistance by PSU.

1. Enhancing knowledge and skills for petty trade and enterprise management
2. Developing investor- friendly business permit processing in Partido
3. Facilitating access to microcredit and market
4. Improving products and processes of local entrepreneurs
5. Piloting Community-Based Enterprise
6. Strengthening safety nets and mechanisms to mitigate climate change impacts on livelihood.

The College of Business and Management led by the Dean is the primary department for the formulation and implementation of these undertakings. Aside from having expertise in the field of business and accountancy, the college is composed of a strong team of faculty and staff capacitated to conduct extension services. Together with the extension office personnel, they will conduct inception meetings with the stakeholders for inputs about the activities to be conducted. The PSU is seen to collaborate with the Department of Trade and Industry (DTI), Cooperative development Authority (CDA), Chamber of Commerce and the business sector.

Increase receptiveness on use of technology and appreciation for sustainable management of environment and resources by rural and urban households This includes increasing awareness for environmental protection, biodiversity and resource management, widening the scope of computer literacy, encouraging development of incentive mechanism for behaviors responsive to conservation and enhancing understanding of conservation laws. This strategy aims to make rural and urban households computer literate and capacitated to use information technology. Strategies that aim to facilitate, guide, and encourage communities and officials and members of conservation organizations to develop and institutionalize incentive mechanisms for behaviors responsive to conservation are on the pipeline.

There following colleges and campuses that will take the lead in implementing this program include College of Arts and Science (CAS) Information Technology (IT) and, College of Engineering and Technology (CET). Although colleges and campuses offer different programs, some programs of one-unit complements that of another unit. CAS and CET will be responsible for awareness-raising that includes preparation of Information Education Campaign materials such as brochure, leaflets, newsletter, and monograph; while the other campuses will be assigned in giving trainings such as technical and vocational skills education. Key linkages will include DENR, BFAR, LGU, SEAFDEC, RARE, and other government organizations that have the same advocacy for the possible funding of extension activities.

Mainstream community participation in governance supporting human development and sustainable environment. This strategy involves assisting the fishing and farming communities to develop the basic framework necessary for instituting participatory governance and organize fisherfolk and farmers to promote their right to self-determination, advance collective interests and develop them as a powerful community force for rural development and resource management. Another strategy involves encouraging the community and capacitating them to enhance and manage their environment through a number of sustainable tools for resource management.

- Building Institutional Frameworks for participatory Resource Governance
- Establishing community-based resource enhancement and environmental management tools
- Forging multi-stakeholder collaboration and partnerships in environment and resource

Sagñay, Salogon, and Tinambac campuses and the College of Arts and Sciences will be responsible for designing and implementing the program as the activities are aligned with their program offerings. Collaboration with the local government units and barangay councils will also be done.

Upgrade education and teaching effectiveness. Reducing illiteracy and improving the performance in basic education are the key target areas of the following objectives. These strategies involve equipping newly recruited and old teachers in the basic education sector with new teaching strategies and orient them to emerging concepts, innovations and trends in basic education to make them more effective educators. The establishment of child-friendly schools that foster a suitable and safe environment is also a key strategy in this objective.

The School for Graduate Studies and College of Education will be the key implementing bodies of the program being highly competent in instruction and research in the field of education. Reaching remote communities may be a challenge that the implementers need to address. Most of the target communities are coastal and far from central, urban areas.

F. STRATEGIES OF IMPLEMENTATION

To ensure that all programs, projects & activities of the Extension & community Services consistent with the objectives the following strategies of implementation are formulated:

1. Establish more linkages to government, non-government agencies, industry & business sector, sister SUC's & other local & foreign institution for fund sourcing & networking; Involve partners

to multidisciplinary extension programs, projects & activities.

2. Utilize research-based knowledge and information in implementing extension activities.

3. Increase internal funding to accomplish extension Vision, Mission, Goals & Objectives (VMGO).

4. Add facilities & equipment by establishing extension infrastructure such as laboratory or extension centers.

5. Synchronize all extension programs of all the colleges & campuses to facilitate planning, implementation, monitoring, & evaluation of the extension activities.

6. Formulate extension programs that will:
   a. coordinate and direct all extension activities;
   b. prioritize the most pressing needs of the community; and
   c. allocate resources efficiently & effectively.

7. Carry out capability building/competence upgrading of university extension implementers through trainings, seminars, workshop, symposia, fora, scholarships & study tours.

8. Devise policies that would promote a conducive & supportive extension climate for faculty extensionists; grant attractive rewards & incentives to extension endeavors; and implement salient provisions of the accounting, auditing manual for extension Operation (AAMEO).

9. Evaluate extension outcomes to check if they are aligned with the priority needs by:
   a. enhancing and utilizing the monitoring & evaluation of extension programs/projects & activities;
   b. seeking inputs to make sure that the extension programs of the different colleges & campuses continue to address the needs of the community; and
   c. creating technical extension evaluator committee.

10. Establish PSU extension as the primary knowledge source for Partido communities through developing an effective marketing plan
    a. advocacy campaign (e.g. video presentation, brochure, leaflets & monograph);
    b. promote & launch extension programs; and
    c. share extension successes.

Employ social media & other Marketing tools to promote programs success (publication, holding knowledge-sharing events, and photo library)

G. ORGANIZATION AND MANAGEMENT

Functions of the University Extension and Community Service Division

The University Extension and Community Services Division shall be under the cluster of the Vice President for Research, Extension and Knowledge Management (REKM). It shall be headed by a director designated by the University president and approved by the Board of Regents.

The University Extension and Community Service (UECS) division was created through the PSU BOR resolution. The UECS shall coordinate, and operationalize the extension function of the university and its campuses in accordance with the approved extension program and priorities and recommends policies in extension programs and services.

Directly under the office of the Director for Extension are the head of units for gender & development, continuing education & training, technical expertise/consultancy & special projects who will help in managing the implementation, monitoring, and evaluation of the extension programs & projects. They shall come from the faculty and designated by the University President upon the recommendation of the Director for Extension and the Vice President for REKM.

Each Unit Head will have an extension staff who shall facilitate and implement the action plans of the unit in coordination with the various colleges/campuses.

Organizational Structure

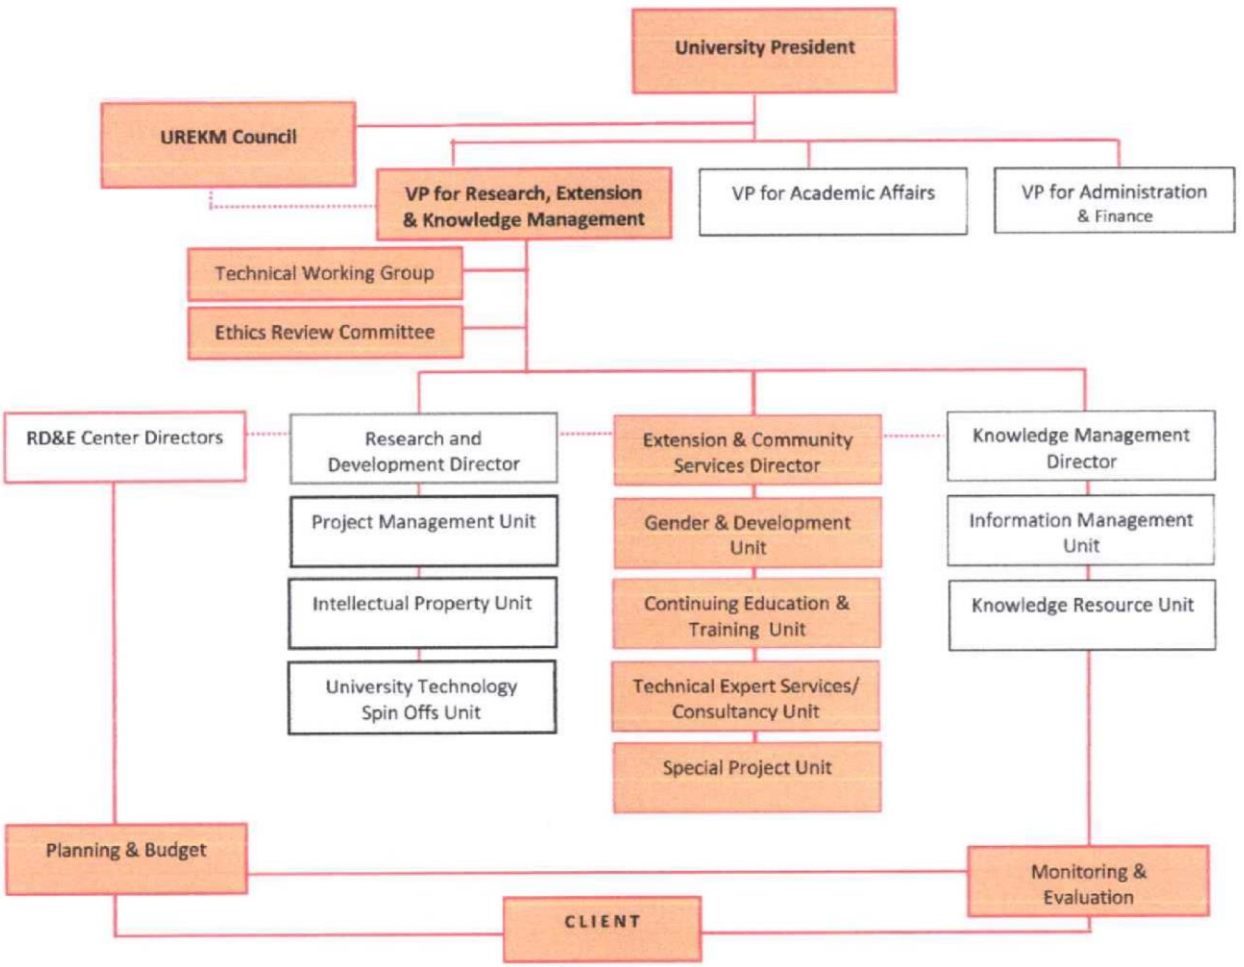


Figure 6. Organizational Structure of the Extension and Community Services Division

Functions and Responsibilities

1. Extension and Community Services Director

The functions of the Extension and Community Services Director:

a. Assist the VP for Research, Extension and Knowledge Management on matters pertaining to policy and strategy formulation of Extension programs of the University in accordance with institutional targets;
b. Assist the VP for Research, Extension and Knowledge Management in strategic planning for extension in determining major thrusts of the university extension programs to create impact on target clientele;
c. Assist the VP for Research, Extension and Knowledge Management in packaging extension programs/projects/activities for funding;
d. Assist the VP for Research, Extension and Knowledge Management in establishing linkages with other universities and college and other local;
e. Assist in the VP for REKM in the implementation of the policies formulated by the University's Board of Regents as well as laws enacted by the Republic and Rules and Regulations by the Department of Budget Management (DBM), Commission on Audit (COA), Commission on Higher Education (CHED), Civil Service Commission (CSC), and other higher authorities;
f. Manage the college and campus extension programs through extension coordinators and in close coordination with the respective Deans;
g. Conduct periodic monitoring and evaluation of the extension activities of the University and submit recommendations to the VP for Research, Extension and Knowledge Management;
h. Conduct capability enhancement training/seminars for faculty engaged in extension work;
i. Encourage faculty engaged in extension work to participate in calls for paper presentation for their extension programs sponsored by local, national, and international agencies;
j. Prepare and submit a consolidated action plan from different colleges and campuses to the VP for Research, Extension and knowledge management;
k. Ensure the attainment of the targets of the office; and
l. Perform other related functions that may be required by the top management.

The Gender & Development, Continuing Education & Training, Technical Expert Services & Special Project Units shall have the following duties & functions:

1. Assist the Director in the planning, implementation, and evaluation of extension programs to insure effective development;
2. Assist in the VP for REKM in the implementation of the policies formulated by the University's Board of Regents as well as laws enacted by the Republic and Rules and Regulations by the Department of Budget Management (DBM), Commission on Audit (COA), Commission on Higher Education (CHED), Civil Service Commission (CSC), and other higher authorities;
3. Complement with other units of the university for efficient utilization of resources & Budget;
4. Represent the division in appropriate office, division meetings and other university's meeting;
5. Act in behalf of the director whenever he/she is on official business or on travel; and
6. Perform other duties/responsibilities as directed or requested by the top management.

2. Extension Coordinators

The college/campus will have its own Extension and Community Services Unit to be managed by the Extension Coordinator designated by the VP for REKM

1. Plan, coordinate, monitor and implement extension programs and services of the college/campus;
2. Conduct periodic evaluation of the extension activities of the college/campus and submit recommendations to the Extension and Community Services Director;
3. Prepare and submit action plan and required extension reports of the college/campus regularly;

4. Coordinate with the Extension and Community Services Director and other officials in the planning for improvement and carrying out the University's extension services;
5. Act as chair in the extension services of the college/campus Internal Assessment Body (IAB) in the preparation of documents and other requirements for accreditation, ISO & SUC levelling;
6. Establish and maintain linkages with GOs and NGOs for possible partnership in the promotion of the extension services;
7. Serve with integrity, professionalism and commitment; and
8. Perform other related functions.

3. Administrative Staff

1. Assist the Director in the preparation of reports requested by the university and other regulatory bodies
2. Assist the director in the preparation and organizations of the needed documents & training materials for meetings, conferences and trainings conducted by the UECS
3. Assist the director in the preparations in accreditation, ISO and SUC levelling documents
4. Lay-out annual report, monograph, brochures and leaflets for community extension services activities
5. Manage office equipment & office space
6. Ensure proper recording of the reviewed proposals and tracking of its whereabouts from revision budget and Presidents approval & returned copies to the concerned extensionist for implementation.
7. Package pertinent documents & other forms of communications
8. Perform various secretarial/clerical duties such as photocopying and organizing, filing system of documents.
9. Conform to the administrative policies & procedure of the office
10. Maintain the cleanliness & orderliness of the office
11. Perform other related functions & work from time to time

H. DELIVERY FRAMEWORK OF EXTENSION SERVICES

Following the framework shown in Figure 7, the PSU extension services provides unified and coordinated services directed to the Partido community. To ensure effective delivery of extension services, it integrates the contributions of different branches of the Partido State University, local government units, government agencies, and other non-government organizations. To be able to provide research-based extension services, the PSU university extension services will incorporate important baseline data and relevant technologies with the help of the PSU research arm to identify good extension programs.

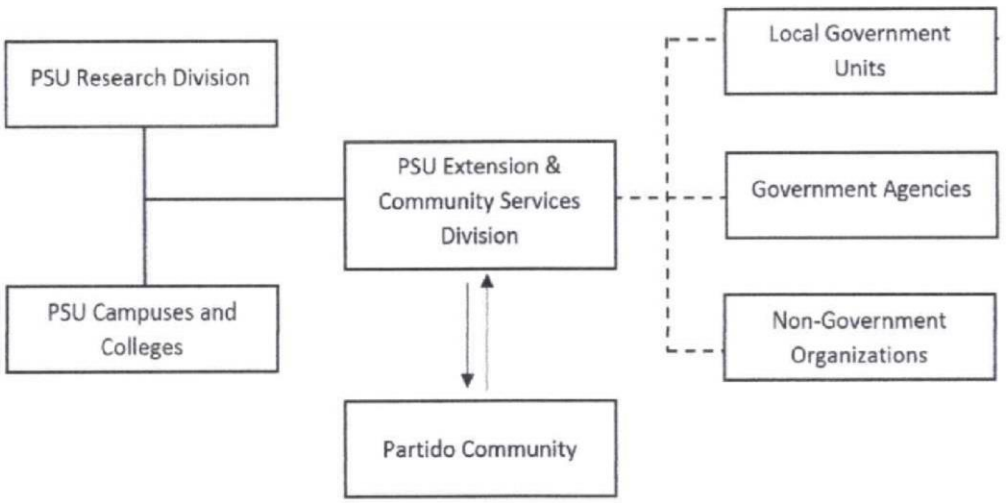

Figure 7. Framework of Extension Services

I. CONDUCT OF EXTENSION PROGRAMS, PROJECTS & ACTIVITIES UNDER THE NEW NORMAL

PROCESS FLOW	RESPONSIBLE PERSON	PROCESS DETAILS
1. Submission of the Extension Proposal (EP) / Training Proposal (TP)	Proponent/s	▪ Proponent shall prepare & submit their [1]Extension Program /Project Proposal with attachments such as Line Item Budget, Log frame, Terms of Reference and Work Plan using (PSU-F-EXT-03) ▪ or Training proposal via corporate email of the office (*extension@parsu.edu.ph*).
2. Receipt of the Extension Proposal (EP) / Training Proposal (TP)	Extension Staff	▪ The Extension staff will send a notification to the proponent indicating the receipt of the proposal/training Proposal.
3. Checking of the Extension Proposal (EP) / Training Proposal (TP)	Extension Staff	▪ The Extension staff will check the proposal if it is with complete attachments and follows the extension proposal format. If so, the proposal will be forwarded to the Extension Director for scheduling of the review. If not, it will be sent back to the proponent through e-mail. ▪ Training proposal will be used if there are request from the client that pass through the office of the University President.
4. Review of the Extension Proposal (EP) / Training Design (TD)	ED/Committee on Research & Extension Review & Evaluation	▪ The Extension Director endorses the proposal for review to the members of the Committee on Research and Extension Review and Evaluation via email and will schedule a review via zoom inviting the proponent to present the proposal. ▪ After the review, the Office of the University Extension & Community Services will send to the proponent the consolidated comments and suggestions made by the committee.
5. Submission of revised Extension Proposal (EP) / Training Proposal (TP)	OUECS Proponents	• Proponents will submit their revised proposal one (1) week after receiving the consolidated comments by the review committee.

6. Checking of the revised Extension Proposal (EP) / Training Proposal (TP)	Extension Director Extension Staff	• The Extension Director will review and evaluate the revised proposal submitted if the recommendations were incorporated. If all the suggestions by the committee were incorporated the proposal will be endorse to the office of the VP for REKM. • If the proponent failed to incorporate the suggestions made by the committee, EP/TP will be returned back to the proponents.
7. Approval of the Extension Proposal (EP) / Training Proposal (TP)	Extension Director OVPREKM President	• The Office of the University Extension & Community Services will be responsible in forwarding the revised proposal for the approval of the VPREKM and the University President provided that they are properly signed by the proponents and their respective deans/heads.
8. Approved Extension Proposal (EP) / Training Design (TP)	OUECS	• The scanned copy of the approved proposal will be forwarded to the proponent via email within three (3) days upon approval.
Methodology of Implementation	Extension Implementers	• The Face-to-face is being discouraged during the pandemic period, however, if there are no other options, health protocols (issued by the IATF) must be observed in conducting FTF extension activities.
1) Face to Face (FTF)		1) Activities involving consultation visit to the community/beneficiaries has to follow the basic health protocols and standards. 2) An approved and duly received communication letter informing the LGU, Barangays and beneficiaries where the extension activity will be conducted. 3) Conduct ocular visit prior to the activities to ensure the safety of the extensionists and the community. 4) A carefully laid out plan must be submitted by the extensionists before visiting the community. 5) All needed materials such as attendance sheets, evaluation sheets, alcohol, face shields, facemasks, alcohol, thermal scanner (if available) and other logistics must have already been prepared. 6) Ensure safety of the faculty extensionists and the beneficiaries (if in doubt, do not proceed). Extensionists must secure a copy of their health certification from the University Medical Officer indicating that they are healthy and COVID-free prior to conducting extension activities. 7) Understand and obey health protocols of the LGU and barangays. See to it that social distancing protocol is being observed (assign a Social Distancing Officer). 8) Ensure that the beneficiaries have their own facemasks, alcohol and ballpen with them.
2. Face to Face (FTF-FA) Family Approach		1. The faculty extensionists are being encouraged to conduct extension activities in their own barangays using their expertise employing Family approach. All basic health protocols must be observed during the conduct of extension activity
3) Podcast	Faculty Extensionist/s	The extensionist must secure approval for this type of internet-based extension activity prior to holding the podcast. Proposal must be submitted a week prior to the scheduled podcast.
4) Social Media	Faculty Extensionist/s	Same with the process in submitting the proposal, proponents will submit proposal/Extension activity proposal via email one (1) week prior the conduct of the webinar or online trainings through social media platforms (i.e. Youtube, Facebook)

5. Radio Program	Office of the University Extension & Community Services Colleges and Campuses	• All colleges and campuses will be assigned to have their own segment in this radio program. • Colleges and campuses should assign a faculty who should discuss a specific topic in line with the faculty's expertise. • Three days prior to the scheduled radio program, the assigned faculty should submit a copy of their radio script to the UECSD in preparation for the Q & A of the anchorman. • The assigned faculty must inform the office three (3) days before airing of radio program if the faculty cannot attend the scheduled time. • The assigned faculty should be at the radio station an hour before the scheduled time to prepare for the live airing of the program. • Assigned faculty, anchor man, documenter should follow the health protocols inside the studio. Use of PPE is strongly recommended.
6. IEC - Information Education Campaign	Extension implementers	• Distribution of information education campaign materials such as brochures, leaflets and video presentation, should also follow the health protocols.
Monitoring & Evaluation 1. Submission of reports	Extension implementers	To avoid non-acceptance of the submitted reports, the colleges and campuses must submit the scanned copies of the complete accomplishment reports and attachments via email three (3) days after the conduct of their extension activities. (*Accomplishment Report (PSU-F-EXT-09), Request letter Response letter (if requested, Approved Proposal/Training Proposal/Extension Activity Proposal , Narrative Report, Terminal Report (PSU-EXT-011) for approved extension programs/projects (internally-funded and externally-funded), Documentation with caption, Attendance, Training Evaluation Result (PSU-EXT-06), (analysis of the Evaluation Result is needed)* *Deadline of Submission:* *1st Quarter – first week of April, 2020* *2nd Quarter – first week of July, 2020* 3rd Quarter – first week of October, 2020 4th Quarter – first week of December, 2020
2. Community Visit	OVPREKM ORDE Extension implementers	• The UECSD will conduct an ocular visit at the target location to ensure that the activity is cleared. Basic health protocols must be observed during the activity.
3. Phone Call	Extension implementers	• Given the pandemic, phone calls, texts or using messenger may be used to reach out to beneficiaries.
4. Evaluation	Extension implementers Evaluation Team	• An evaluation result must be forwarded to the OVPREKM & office of University President after the evaluation and checking of all the documents submitted by the faculty extensionists and gathered data from community visit conducted by the Extension monitoring team.
Consultancy/Technical Advisory Services	Extension implementer/s	• Request for professional services should be coursed thru the Office of the University President for approval, copy furnished the UECSD • Faculty extensionists who have received a request for their expertise should submit the scanned/electronic copies of the Request Letter, Response Letter, Accomplishment Report (PSU-F-EXT-08), Narrative Report, Photo Documentation, Presentation (PPT) used and Technical Evaluation Result (PSU-EXT-06) via email.

J. MONITORING AND EVALUATION

Each of these programs will be monitored and evaluated through field evaluation and in-house reviews. Faculty who conducted the programs will be required to submit progress and terminal reports promptly.

Quarterly field evaluations by the campus and the university through the monitoring and evaluation team will be conducted. The socio-economic impact of the project defined in the context of the program will be evaluated and reported.

Reports on the progress of on-going projects must be submitted within the period(s) specified in the timetable as approved by the approving Council/Committee of the implementing unit based on the following:

1. Proponents of approved projects with a duration of more than six (6) months shall submit Quarterly Progress Reports (QPR);

2. Proponents of approved projects with a total duration of six (6) months or less shall submit only one progress report in the middle of its project timetable or at the time determined by the monitoring Extension Office;

3. Program/Project Leaders of undertakings lasting for three (3) months or less shall not be required to submit a progress report, however a final report shall be accomplished in the prescribed format that can be obtained from the monitoring Extension Office;

4. Program/Project Leaders are required to submit an e-copy of their final project output/manuscript to the Extension & Community Services Division which shall evaluate and later turn over such outputs to the Extension library for future reference;

5. At any time during the conduct of a project, coordinators/leaders may report and discuss with the Director of Extension and Vice President for research, extension & knowledge management of the implementing unit of the University System the developments and/or problems directly affecting the conduct of the project;

6. The Vice President for Research and Extension and Knowledge Management and Director for extension in close coordination with the college Dean & campus Deans of the implementing unit may appoint other program coordinators/leaders if the implementation of the project is unsatisfactory or disrupted. If the project has to be terminated, the approving Council/Committee reviews the circumstances to determine whether the termination of the project is justifiable or not;

7. Aside from the final project output, a terminal report is required of all completed approved projects to be accomplished in the prescribed format and which will include a report on the conduct of a seminar /forum on the findings/results of the project. (See Appendix 4 for format of the Terminal Report);

8. The terminal reports and final outputs of all approved extension programs/projects shall be evaluated by both internal and external evaluators through Agency-in house review spearheaded by the UECS Division;

9. As an additional mandatory requirement all completed extension programs & projects of the Colleges & campuses shall submit photo and video documentations; and

10. Programs/Projects with a duration of six months and beyond should establish MOU/MOA.

K. FINANCIAL MANAGEMENT

Budget Procedures

1. Release of approved budget for a program/project shall be based on the approved extension proposal submitted to the university extension Division by the faculty extensionist from the college and campuses.
2. Travels in connection with extension activities shall be based on guidelines/ provisions on the delegation of authority as prescribed by the university and other existing rules and regulations.
3. Proceeds from completed /on-going extension program, projects (agency funded & externally projects) shall be deposited & disbursed under the provisions of fund 101, and so with funds from other government, non-government, & foreign assisted projects (all special projects) shall also be deposited & disbursed under the provisions of fund 101.

L. EXTENSION INCENTIVES AND AWARDS

1. Balaog Award *(BOR Resolution No. 38, s. 2020)*

BALAOG is a Bicol word for a blessing which means a special favor, a gift or benefit. This award will be a fitting tribute for the significant contributions of the Extension implementers for having an exemplary extension programs & projects leading in the achievement to the University's mandate, thus serving inspiration for the PSU and extension community.

Objectives:

1. To encourage and sustain the development and interest of service-oriented, committed and productive extension implementers of the University.

2. To provide a system of awards and recognition for outstanding extension project and implementers thereby motivating them to strive for the best and quality output and ensure their continuous service to the University extension services.

Guidelines:

A. Nature of the BALAOG Award

BALAOG Award shall be given to faculty members/individual or group who's completed extension programs/projects presented in a local, regional, national & International contest or for a, conference & adjudged as Best Papers by an external evaluators.

The award should be given annually during the charter Day Celebration.

B. Recognition & Reward Mechanism

1. The University or Local Award will be conferred to individuals whose completed extension programs and projects presented in a local contest or forum are adjudged as best papers by an external body of evaluators (e.g. Agency In-House Review Best Paper)
2. The Regional or Zonal Level Award will be conferred to individuals whose completed extension papers in a regional/zonal contest or forum sponsored by a reputable agency are adjudged as Best Papers.
3. The National Level Award will be conferred to individuals whose completed extension papers are presented in a national contest or forum sponsored by a reputable agency are adjudged as Best Papers.

4. The International Level Award will be conferred to individuals whose completed extension papers are presented in an international contest or forum sponsored by a reputable agency are adjudged as Best Papers

Minimum Requirements

1. All Extension Programs and Projects qualifies for this award must be approved & completed within the last three years & preferably presented in the Agency In-House Review.
2. Regional, zonal, National & International winners qualified for the award will be required to submit documents (certified true copies) such as:
    a. Invitation letter
    b. Acceptance letter
    c. Winning paper
    d. Proof/s of winning as best paper (photocopy of certificate & Book of abstract/Proceedings)
3. The winning extension papers with multiple authors, the cash award will be divided based on the following:
    a. Senior Implementer - 60%
    Members - 40%

Level of Awards:

UNIVERSITY/LOCAL LEVEL	REGIONAL LEVEL	NATIONAL LEVEL	INTERNATIONAL
Certificate of Recognition	Certificate of Recognition	Certificate of Recognition	Certificate of Recognition
Cash Awards	Cash Awards	Cash Awards	Cash Awards
1st Best Paper	*1st Best Paper*	*1st Best Paper*	*1st Best Paper*
10,000.00	15, 000.00	20,000.00	25,000.00
2nd Best Paper	*2nd Best Paper*	*2nd Best Paper*	*2nd Best Paper*
7,000.00	10,000.00	15,000.00	20,000.00
3rd Best Paper	*3rd Best Paper*	*3rd Best Paper*	*3rd Best Paper*
5,000.00	7,000.00	10,000.00	15,000.00

2. Balalong Award (Outstanding University Faculty Extentionist)

To reward and recognize faculty for their exemplary and outstanding achievements in research and extension.

Nature of the Award

The **Balalong Award** (Outstanding University Faculty Extensionist) award is given to PSU faculty members who had satisfied, and garnered the highest score of 85 points and above of the selection criteria.

The award should be given annually. In case no one qualifies in the selection year for failing to meet the minimum number of points in the selection criteria, such award may be cancelled for the year.

Recognition and Reward Mechanism

A cash incentive of PhP 50,000, and a Plaque of Recognition should be given to each single awardee of Balalong Award (Outstanding University Faculty Extensionist). The Plaque of Award and Cash Incentive should be awarded during the University Foundation Day.

Selection Committee

The selection committee for Outstanding University Faculty Extensionist should be composed of:

- Vice President for Research, Extension and Knowledge Management, as Chair
- Director of Extension and Community Services
- Director of Research
- FAPARSU President
- Active faculty Extensionist/Previous Awardee
- Community Organization Representative/Stakeholder representative (External Member)

Minimum Requirement

A faculty who satisfies the following qualification can be nominated for the *Balalong* Award (Outstanding University Faculty Extensionist):

- Any bonafide/regular/permanent faculty member;
- Has at least three (3) years continuous service immediately preceding the nomination; and
- Has not committed acts of plagiarism, intellectual dishonesty and other acts of unprofessionalism.

The nominee can be nominated either way: by his/her superior (Dean or Department Head) or by his colleagues or by the Faculty Association of Partido State University (FAPARSU) Officials.

Nomination letter may be sent to the Selection Committee in January until February each year. The nomination letter must contain appended copies of credentials of the nominee.

The credential will be organized following the selection criteria and point allocations which can be requested in advance from the Selection Committee. The portfolio should contain copies of the publications, presentations, certificates, testimonials, assessments, and photographs of activities and other proofs of all items indicated in the Accomplishment Summary. Documentation of the extension processes and their outcomes/ impact is a must.

Winners may be eligible for re-nomination three (3) years after receiving the awards with new accomplishments. Non-winners can be re-nominated on the following year.

Coverage of the Award and Accomplishments

The research /extension accomplishment of the nominee should be within the last five (5) years. These accomplishments were credited as accomplishment of the university such as PBB, SUC Leveling, Normative Financing, CNA and other required reports as mandated from the university.

Table 6 shows the metrics for selection for *Balalong* Award (Outstanding University Faculty Extensionist).

Table 6. Metrics for Selection for *Balalong* Award

Indicator	Maximum Points	Measureable/Supporting Documents
Technical Competence - technical expertise in the area of specialization	20	Number of extension programs/projects undertaken as developer/Proponent-5 Resource person in workshops/conferences Local /regional1 National/nternational-2 Reviewer/evaluator of extension programs/projects-3 Extension Paper presentation - Local/regional -1 National/international-2 Internet blog- 1 Radio program Host/Segment Interview – 3 Talk show Host- 2 points
Commitment/Dedicated Service to Clientele (minimum of 3 years) - involvement in activities for the upliftment of the community (farmers, fisher folks and other beneficiaries)	30	
Community organizing activities		Community Organization-5 Established (at least 2) (related to livelihood/ governance)
Linkaging/Networking-10		MOUs/MOAs-10 International -5 National-4 Regional -3 Local-2
Institutional Development-5		Number of Policies and Municipal Ordinances-5
Capacity Development-10		Training Modules, Approved-5 Training Number of person-5
Awareness Raising-5		IEC material produced-5 (Billboards, leaflets, brochures and newsletter)
Leadership/membership to civic, religious and community organizations-5		Certificate of membership
Impact of Performance - contribution to the advancement and delivery of extension services to target beneficiaries that have local, regional and national impact/ significance	35	Proof of impact of performance and testimonials: Number of established demonstration schools/ Number of adoptors of technology introduced
Demonstration schools/projects or adopters of Technology introduced-15		Change in community/society-
Change in community/society-15 (Change in income/Change in other determinants of well-being i.e. house, furniture, cars/Change in level of skills/Change in membership in organizations/Change community health related indicators/Change in level of awareness/ Change in literacy/numeracy levels)		Endorsement by clientele/community/organizations
Creative Output - publications (local and international) including articles published in popular magazines and newspapers with national circulation and reports of completed extension program/project	15	Number of publications-5 Local/regional-2 National/international-3 Popular magazine-5 Reports of completed extension programs/projects-5
Total Points	100	

Source of Fund

The University shall allocate an amount for these awards from the University Research and Extension Budget. Such cash incentive should be consistent with provisions in the CNA (Collective Negotiation Agreement), Faculty Manual and the state auditing and accounting rules and regulations.

3. Guidelines for Crediting Research & Extension Workload of Faculty *(BOR Res. No. 73, s. 2029)*

Coverage/Scope

This guideline is applicable to externally and internally funded research and extension program/projects/study of full time permanent or temporary faculty of Partido State University.

Definition of Terms

Workload - A credit unit assigned to faculty engaged in research or extension program/project/study.

Proposal - Refers to the plan and description of a research/extension program/project/study developed by a program/project/study leader in accordance with the specific requirements set by the university or external funding agency and submitted for financial assistance.

Program - A group of interrelated or complementing projects usually requiring an interdisciplinary or multidisciplinary approach to meet established goal(s) within a specific time frame. It is composed of at least 2 projects.

Project - A set of interrelated studies/activities or a component of a program with predetermined objective(s) to be accomplished within a specific time frame. It is composed of at least 2 studies or extension activities.

Study/Extension Activity - A basic unit in the investigation of a specific problem identified under a research project or a set of activities for a planned extension strategy.

Credit Units in Research and Extension Involvement

The workload credits given to faculty engaged in various research and extension undertakings shall differ during the coordination, and actual implementation.

Furthermore, in the actual implementation, workload credits will also differ depending on the responsibility of researcher by scope of research, i.e. program, project, or study.

Credit units per type of research and extension involvement by scope together with the breakdown of credits according to activity is shown Table 7.

Table 7. Credit unit researchers/extensionists earn based on the type of involvement

Type of Involvement	Activity	Credit
Program Leader	Coordination of two or more projects under the program	3
	Coordination of two or more studies under the project	3
	Actual implementation of a study/under a project	3
	Total	**9**[a/]
Project Leader	Coordination of the studies under the project[b/]	3
	Implementation of a component study	3
	Total	**6**
Study/Extension Leader	Implementation of one study under the project	3
	Total	**3**

a/ To earn credit as a program leader, he/she should also serve as a project and study leader. In serving as a leader of two projects, he/she will earn additional 2 credits, or 3 credits for an additional study or activity

b/ If implemented by more than one study leader

Researchers/extensionists should properly determine their research/extension involvement using the standard definitions (Table 8).

Table 8. Type of involvement of Faculty based on responsibilities and nature of work

Research/Extension Involvement	Role
Program Leader	One who directly plans, organizes and supervises the overall activities of a Research/Extension Program and is directly responsible for the conduct of one of the projects of the said program. *Should have at least 1 or 2 projects in the program.* Consolidates the entire program proposal and terminal report.
Project Leader	One who directly plans, organizes, supervises and conducts the implementation of a basic unit of investigation of a specific research or extension. *Should have at least 1 or 2 studies. Consolidate the entire project proposal and terminal report.*
Study Leader	One who supervises and conducts the investigation of a specific research study/under a particular project

Mechanics to earn RDE Credit units

1. Upon approval of the research/extension proposal, the program/project/study leader shall submit a photocopy of the said proposal to the Office of the Vice President for Research, Extension and Knowledge Management (OVPREKM).
2. Upon verification from the Research/Extension Director, the OVPREKM shall issue Notice to Proceed (NTP) to the program/project/study leader indicating workload credits earned.
3. The researcher will sign commitment to finish the research within the period as provided in the proposal.
4. A list of all researchers and extensionist with RDE workload credit units will be issued to respective College/Campus Deans.
5. Progress/status report shall be submitted regularly/quarterly or as required by the RDE Monitoring and Evaluation Unit.
6. In case where the approved program/project/study cannot be completed on the expected period, the program/project/study leader shall request for approval of extension to the University President, attention to OVPREKM indicating the justification/reason for extension and expected period of completion. The approved extension of the implementation of the program/project/study shall no longer entitle the researcher/extensionist with an additional work load credit.

IV.KNOWLEDGE MANAGEMENT DIVISION

IV. KNOWLEDGE MANAGEMENT DIVISION

A. BACKGROUND INFORMATION

This manual was developed primarily to guide clienteles who intend to use knowledge generated through Partido State University and its partners. According to Davenport and Prusak, "Knowledge is a fluid mix of framed experience, values, contextual information, expert insight, and grounded intuition that provides an environment and framework for evaluating and incorporating new experiences and information. It originates and is applied in the mind of the knowers. In organizations it often becomes embedded not only in documents or repositories, but also in organizational routines, practices and norms." (Davenport & Prusak, 2000)

The Knowledge Management (KM) office will be dealing with research outputs that have gone through rigorous peer review and validation in local and international scientific paper presentations and/or have been published in internationally refereed journals. This is to ensure that knowledge which will be shared are those that have stood the test of experts' questioning and scrutiny.

There two basic types of knowledge that this manual will cover. These are explicit knowledge and tacit knowledge. Explicit knowledge are in the form of documents like published research papers and codified data clearly expressing facts as evidenced by scientifically-generated and processed information. Tacit knowledge are those being shared by university-based experts elicited from their long period of engagements in their own fields. This form of knowledge are shared through consultancy services. Tacit knowledge is found in: the minds of human stakeholders. It includes cultural beliefs, values, attitudes, mental models, etc. as well as skills, capabilities and expertise (Botha et al 2008, as quoted by Hajric, 2018).

The KM office was established through BOR Resolution No. 43, series of 2018 approving the creation of the University Research, Extension and Knowledge Management Council (UREKMC). With this newly established council, the functions of the existing Research and Development office and Extension and Community Services (now both are divisions under UREKMC) were clearly delineated and further strengthened, and the Knowledge Management (KM) Division was created.

The creation of the KM division has opened a wide array of opportunities to effectively and extensively disseminate knowledge generated through the university. The KM Division is tasked to convene scientific fora and conferences, locally and internationally, and other knowledge sharing events, spearhead the creation of knowledge sharing platforms, both online and on print media, in addition to the existing ones.

B. GOAL AND OBJECTIVES

Goal

Enrich knowledge on bio-resource science, public health, ecotourism, community resilience, sustainable development and responsive governance.

Objectives

1. Establish a web-based repository of knowledge generated through the university to enrich knowledge on bio-resource science, public health, ecotourism, community resilience, and sustainable development and governance.

2. Extensively and effectively disseminate local knowledge, research and extension outputs supporting local development directions.

3. Provide support in the development and production of IEC materials for specific audience.

4. Create, organize and convene fora, symposia, scientific conference and other knowledge sharing events and platforms beneficial to the immediate community and beyond.

C. ORGANIZATIONAL STRUCTURE

The KM division, as approved, will be under the direct supervision of the Vice President for University Research, Extension and Knowledge Management. The KM Division shall be headed by a Director appointed by the University President, and will hold office for a term of one (1) year, subject to reappointment. This facility is a support facility for knowledge management of information and technologies, to include development of IEC materials for training and advocacies (print, e-learning materials, and tri-media materials). The KM Division Organizational Structure is shown below (Fig. 8).

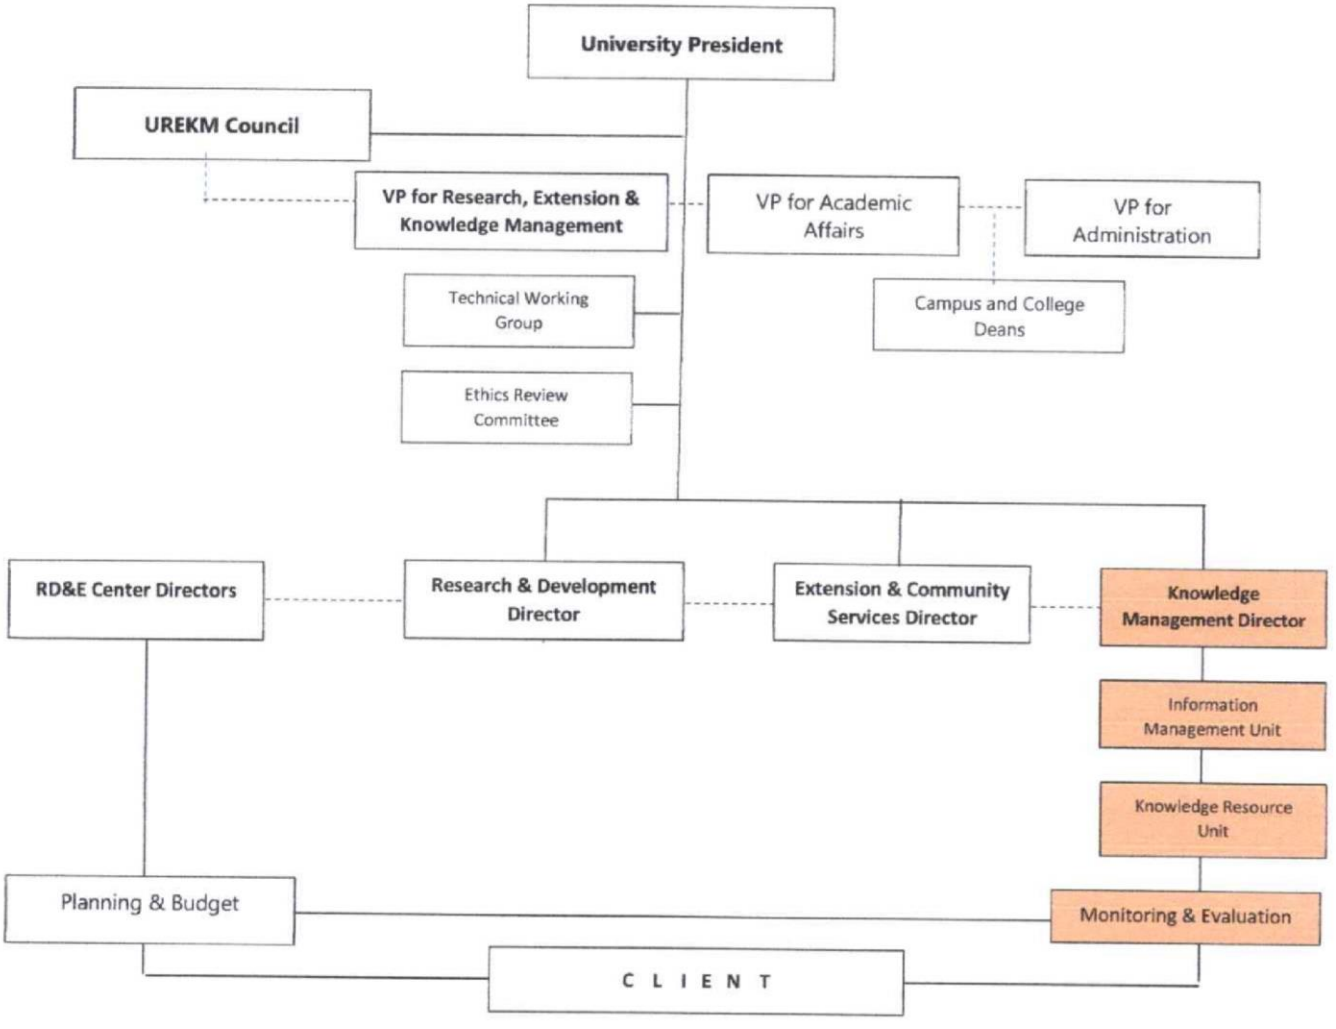

Figure 8. Organizational Structure of the Knowledge Management Division

D. FUNCTIONS OF THE KNOWLEDGE MANAGEMENT DIVISION

1. Formulation and implementation of PSU knowledge management programs;
2. Provision of processed information essential for rational planning and decision-making for research, extension and knowledge management;
3. Planning, development and maintenance of KM information system to optimize knowledge dissemination;
4. Formulation and implementation of policies and guidelines related to research and extension data collection, processing, and data banking;
5. Consolidation and analysis of data and information from research and extension division in coordination with campuses and colleges;
6. Provision of technical assistance to the campuses and colleges on the data collection, processing and data banking needs of the University;
7. Management and maintenance of web-based portal to enable continuous online access to research and extension information and data;
8. Preparation of annual university RDE statistical bulletin and directory of RDE Programs and Projects and a directory of researchers of Partido State University, in close coordination with the Center for Statistics;
9. Preparation of university RDE data projections and other related statistics, in coordination with the Center for Statistics, as required by the stakeholders in support to the policy formulation and decision-making;
10. Collection and monitoring of RDE indicators gathered from campuses and colleges;
11. Coordination with the concerned campuses and colleges for statistical standard uses in aggregating data;
12. Establish quality standard on manuscripts and final printed products worthy of publications;
13. Preparation of write-ups for the production of University key publications through the University Press;
14. Conceptualization and production of information, education and communication materials for special events and other RDE related activities per target audience; and
15. Promotion of university RDE data products, services, and activities.

E. MANPOWER REQUIREMENTS AND THEIR RESPECTIVE FUNCTIONS

The KM division will be manned by a Knowledge Management Director, Knowledge Management Assistant, Information Management Assistant and support staff. Each of these key personnel shall perform the following functions.

Knowledge Management Director

1. Oversee the day-to-day operation of the KM Division;
2. Oversee the formulation and implementation of PSU knowledge management programs;
3. Supervise the Information Management and Knowledge Resource Units;
4. Ensure close working relationship with colleges, campuses and primary knowledge generators and users including institutions of government and private entities;
5. Ensure provision of processed information essential for rational planning and decision-making for research, extension and knowledge management;
6. Spearhead the planning, development and maintenance of KM information system to optimize knowledge dissemination by exploring all other platforms available; and
7. A maximum teaching load of nine (9) units.

Information Management Assistant

1. Prepare plans, projects and strategies for IEC materials development;
2. Take the lead in formulating, coordinating, and in implementing policies and guidelines related to research and extension data collection, processing, and data banking;
3. Conduct annual consolidation, storage, and analysis of data and information from research and extension division in coordination with campuses and colleges;
4. Provide technical assistance to the campuses and colleges on the data collection, processing and data banking needs of the University;
5. Manage/maintain databases of research and extension outputs to enable continuous online access these processed information;
6. Prepare annual university RDE statistical bulletin and directory of RDE Programs and Projects;
7. Prepare university RDE data projections and other related statistics, in coordination with the Center for Statistics, as required by the stakeholders in support to the policy formulation and decision-making;
8. Collect, generate, and monitor RDE indicators gathered from campuses and colleges; and
9. Coordinate with the concerned campuses and colleges for statistical standards uses in aggregating and disaggregating data for specific purposes.

Knowledge Resource Assistant

1. Performs quality checks on manuscripts and final printed materials;
2. Conduct research activities and prepare write-ups for the production university key university publications;
3. Conceptualize, design and develop information, education and communication (IEC) materials for special events and other RDE related activities per target audience; and
4. Collaborate with campuses and colleges for the conduct of information dissemination for university RDE data products, services, and activities.

Support staff

KM support staff will perform the following functions:

1. Provide administrative support to KM division and its units;
2. Ensure availability of logistical requirements during activities led by the division;
3. Coordinate with stakeholders and other interested parties to the undertakings of KM Division; and
4. Perform other tasks as maybe assigned by the KM director.

F. PLANNED UNDERTAKINGS

The KM Division's primary responsibility is the dissemination of knowledge generated by the University. PSU, as a research institution, is expected to conduct research and extension activities beneficial to the university's immediate service area and beyond. Given this task, KM division must explore all possible means to efficiently and effectively share knowledge with users and other interest groups. Thus, KM Division, in the next five years, must be able to:

1. Develop a web-based portal that will serve as online repository of knowledge generated through the university. This portal will house, in an organized manner, all papers which have been published in refereed journals provided that the journal agrees to publish the paper outside its portal. Linked to each of the papers are author(s) research background and interests and other academic engagements;
2. Cultivate collaborative undertakings with other university offices, divisions, colleges, campuses, research centers and external entities in creating fora for information dissemination continuously, adapting to the evolving needs of the clienteles;

3. Identify mature research and extension outputs and develop brochures, flyers and other IEC materials which will be produced through the University Press;
4. Establish linkage with knowledge users, primarily with industry practitioners, government and non-government institutions, knowledge generators;
5. Produce a complete documentation of knowledge applications and/or utilization; and
6. Develop publications for university research outputs.

G. PUBLICATION OF RESEARCH OUTPUT TO PSU KM WEBSITE PORTAL

Figure 9 shows the process flow for research manuscript publication to PSU KM web-based portal.

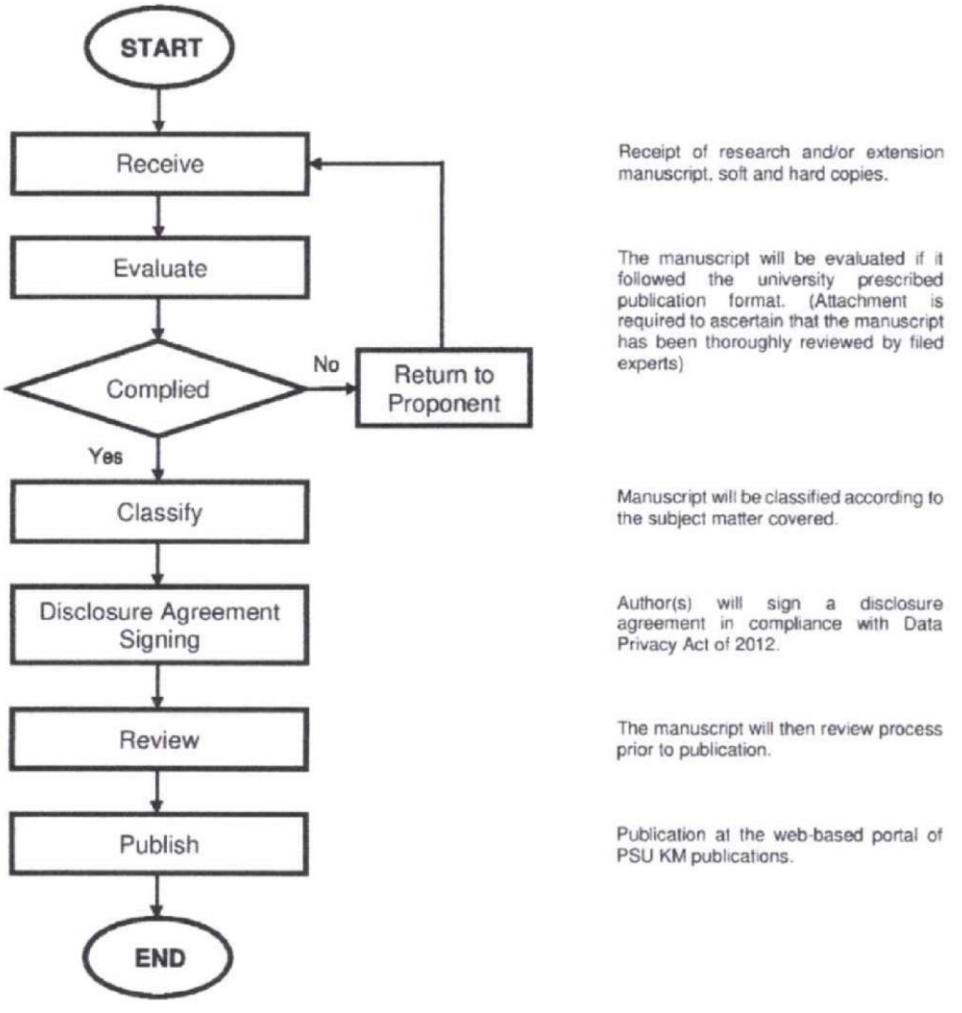

Figure 9. Process flow for research manuscript publication to PSU KM web-based portal or PSU KM publication(s) for papers which have been published in refereed journals

H. PERIODIC ACTIVITIES

1. Conduct domestic and international conferences for research critiquing, validation and sharing
2. Trainings on IEC Development and Web-based research portal management
3. Periodic review and printing of KM official publications

I. BUDGETARY REQUIREMENTS

The Knowledge Management Division's regular annual budgetary requirements for its operations shall be included in the university budget proposal for it to be included in the GAA intended for the university. Prior to this, however, specific activities must be identified with their corresponding requirements. This means that that planning for KM activities must be undertaken at least 18 months prior.
