PROJECT PROPOSAL FORM

2021 CHED-INITIATED INSTITUTIONAL DEVELOPMENT AND INNOVATION GRANT

I. PROJECT INFORMATION

HEI Proponent	Partido State University College of Education
Project Title	Establishment of Partido State University Reading Center
Proposed Grant Amount	Php 2,965,856.40
Grant Priority Area (Choose only one)	Smart Campus Development for Continuity of Learning (Multimedia Center)
Duration (in months) *Maximum of 24 months*	24 months
Specific Program Offering/s to be Supported by the Grant	Bachelor in Secondary Education Major in Science & Mathematics Bachelor of Science in Civil Engineering Bachelor of Science in Sanitary Engineering Bachelor of Science in Engineering Technology Bachelor of Science in Information Technology Bachelor of Science in Computer Science Bachelor of Science in Biology Bachelor of Science in Geology Bachelor of Science in Mathematics Bachelor of Science in Environmental Science
No. of current year's enrollees for the Program	BSEd Science & Math – 94 BSCE – 139 BSSE – 104 BSET - 410 BSIT – 529 BSCS- 143 BS Bio – 238 BS Geo – 100 BS Math – 141 BS Envi Sci - 173
No. of faculty members (full-time and part-time) under the identified program offering/s	Full-time Faculty – 110 Part-time Faculty – 8
Name of Project Leader	Ms. Sheila E. Amoroso
Contact Information *(Phone number and Email address)*	09204541972 sheila.amoroso@parsu.edu.ph

II. OUTCOMES, GOALS, AND OBJECTIVES

Describe the project and provide the rationale or justification for it. State the expected outcomes vis-a-vis the goals and objectives.

The project consists of the establishment of a reading center in Partido State University integrating smart campus capabilities. Smart campus is "a physical or digital environment in which humans and technology-enabled systems interact to create more immersive and automated experiences for university stakeholders" (Gartner, 2019). The need for this project arises in the past years due to the decreasing literacy levels of college students in universities. This problem has been consistent of the low literacy levels of students in basic education as shown in national and international standardized exams such as NAT, TIMMS, and PISA (PISA, 2018). Despite implementing the current Philippine educational reform which is the K-12 curriculum that aims to provide us with the localized contextual quality education since 2012, the data from both the international and local studies have been showing a staggering low in terms of academic performance of the students. In terms of Reading, Science and Mathematics literacy, the Filipino learner had been facing a real deal of difficulty coping up with his international counterparts. This can be further validated in local studies conducted such as that of Magat (2018) on the study titled, "Assessment of Existing School Programs and Projects in Public Elementary and Secondary Schools in Partido Area and their Compliance to the Implementation of Child Friendly Schools Systems (CFSS)" which assessed the sustainability, relevance, accessibility and compliance of school projects to child-friendly school system (CFSS). It was found out that although the school projects were said to be compliant to CFSS goals and majority were relevant, accessible, and sustainable, and despite having a relatively satisfactory achievement of CFSS outcomes, such as the retention rate and percentage of well-nourished children, yet the Mean Percentage Score (MPS) in National Achievement Test (NAT) was noted as below average (Magat, 2018).

This problem has been consistently true not only in primary and secondary levels but also in tertiary levels as revealed in the low board performance of test takers across various disciplines. Numerous studies pointed out the importance of reading comprehension in tertiary education since it is where they are required to do complex educational tasks. When reading comprehension is problematic, it greatly affects the students' capacity to absorb concepts across content areas such as Science, Math, Social Studies, among others (Akbasli et al., 2016). Thus, lack of mastery in the basic reading skills consistently contributes to low achievement in test scores more importantly in passing their board exams and further contributes to low self-efficacy in performing their jobs in the future.

In Partido State University, where its primary function is to provide quality higher education to its clients, one of the major setbacks that most faculty and students encounter is their difficulty to access quality reading materials as well as technological tools that caters to their needs in pursuing their degrees. This has been aggravated by the current Flexible Learning modality in the educational system having limited mobility of students resulting to an increased reliance to ICT resources in carrying out educational tasks. Having this lack of facility and resources, these students are not given equal opportunity to optimize their capacities to acquire the desired level of competencies which will greatly affect their professional careers in the future since Reading Comprehension is one of the important skills towards achieving functional literacy.

Hence, this facility is being proposed in order to address these two identified urgent needs. First, provide a reading platform using both digital and non-digital resources in order to enhance the reading skills of the college freshmen students; second, is to increase the board performance of students enrolled in the university along the Sciences, Technology, Engineering, and Mathematics (STEM) courses in order to fully prepare them as functional literates who can serve the country well in their chosen professions. Further, the project will be utilized in providing trainings for the faculty of the University especially those who are teaching reading and communication across content areas in the new curriculum thus,

contributing to the improvement of the delivery of instruction. Along research, the center will also serve as a venue for generating new knowledge in assessing, addressing and evaluating reading comprehension skills of tertiary education students.

Through the establishment of Reading Center in ParSu, it will greatly impact the community in the long run since "…literacy is the road to human progress and the means through which every man, woman and child can realize his or her full potential" (Annan, 1997). By realizing the citizen's full potential means taking on their roles as active key players towards nation building. Moreover, the facility will also generate rich data for research studies that need careful interpretation and apply appropriate interventions with the aid of expert professionals in the field of literacy education.

Goals: The center will provide access to reading materials both digital and non-digital for faculty and students of the university.

Objectives:

1. Improve the reading comprehension of the tertiary level students enrolled in STEM courses in the university in preparation for taking the board examination and in performing their careers in the future.
2. Provide reading platform and training for students and faculty of the university that will specifically address the reading comprehension difficulties especially during the implementation of flexible learning modalities as well as face-to-face classes when situation normalizes.
3. Generate researches on reading difficulties, reading comprehension, reading readiness of tertiary level students and other external factors (e.g. class breaks due to typhoons, malnourishment, etc.) leading to learning loss.

Materials

For non-digital reading program material, the Reading Center will utilize **SRA Reading Laboratory Kits by McGraw Hill**. This is an easy-to-use kit of self-guided and leveled readers. SRA Reading Laboratory is a carefully-structured system that helps learners develop independent reading skills, fluency and confidence. Reading Laboratory is a leveled reading program which provides individualized reading instruction to a whole class of students. It is a research-based reading program that supports the vocabulary, phonics, fluency, and comprehension skills and strategies towards reading development.

For digital reading program environment, online resources such as the **Excelsior College Online Writing Lab** otherwise known as **Excelsior Owl** will be used. It is an award-winning open education resource offering multimedia support for writing and reading. This powerful online tool is an excellent resource that instructors can freely share with their students so that they can get the help they need to improve their reading and writing skills. Students can also go directly to Excelsior OWL on their own and monitor their own pace in reading. It is full of engaging college level interactive content on a variety of topics. There are actual two distinct areas of Excelsior OWL, the Online Reading Lab and the Online Writing Lab. Both are easy to navigate, and the search feature returns targeted and more relevant results than searching in Google.

The Reading Lab is the first completely free, comprehensive, online open education resource for college-level reading. It offers a variety of multimedia materials—instructional videos, online exercises, and handouts—that can be used alone or in a course. It can be used as a complete textbook alternative for college, high school, continuing education, or training programs.

College-level reading is different from the kind of reading done in high school. The types of texts and assignments differ, but also the expectations for critical thinking, analysis, and synthesis of ideas. The more the students are able to read effectively at the college level, the greater their chances of having success in college, economic advancement, and a more

fulfilling life. The Reading Lab provides more than two dozen interactive, multimedia modules to help develop college-level reading skills and support student success. The reading lab also offers **text-to-speech feature** which is helpful for students in avoiding eye strain due to longer hours spent on reading printed texts.

Instructors can also avail of several other exciting options that let them integrate Excelsior OWL content with their own curriculum. It uses an **HTML embed code** of over one hundred writing activities and almost two hundred interactive reading activities. Once they have the embed code, the students can easily add it to their own page in Canvas. Their students will be able to see and interact with that content without ever leaving their Canvas course. Instructors who want to create free accounts can gather whatever instructional content they like from Excelsior OWL and organize it into a larger customized lesson called an "Owlet". Instructors are also given tutorials on how to integrate the Excelsior OWL into traditional, hybrid, flipped, and online classes. It also provides information about how the Excelsior OWL connects to the Written Communication VALUE Rubric. Furthermore, Excelsior OWL is accessible in laptops, desktops, or other mobile devices such as cellphones or tablets.

For students with reading disabilities, they can utilize the **Bookshare.org** - an online library that provides access to ebooks intended for persons with dyslexia, blindness, cerebral palsy, and other reading barriers. Instructors can customize an individualized instruction for students with reading disabilities by subscribing to the services of Bookshare. By signing up to Bookshare, they can access the largest library of textbooks, bestsellers, children's books, career resources, and more. They can also avail of the customized reading experience with ebooks in audio, audio + highlighted text, braille, large font, and other formats. Furthermore, they can read on almost any device, including smartphones, tablets, Chromebooks, computers, and assistive technology devices.

Since the project will cater to various STEM courses in the university with over a hundred enrollees per program, an automation of its basic processes will be necessary to ensure its smooth flow. One mechanism is the application of **automated attendance checking system** that will effortlessly manage, capture and analyze student attendance using the AI-powered biometric scanning of either the face, fingerprint or iris. With the attendance being intrinsically linked to the facility, it is vital to have an efficient and accurate time and attendance system in place.

Future Direction

The project proponents will be proposing for the inclusion of reading program as part of the curriculum for the STEM course offerings of Partido State University. This program is a non-unit subject (0 unit) but to pass it is a requirement for all students enrolled in STEM courses. They have to undergo all the color-coded SRA materials specifically completion of SRA 3B Purple or accomplishment of 25 consecutive color levels (out of the 48 color levels from 2a to 3b). This is to ensure that they are literate-ready as tertiary level students who shall encounter complex reading materials during their stay in the university.

Aside from digital reading program materials (e.g. Excelsior OWL, CommonLit 360, Bookshare, etc), the reading center shall also provide access to quality online learning courses (**edX online learning of Harvard University**) to earn students their short-term course certificates in reading, writing, speaking and listening.

The establishment of Reading Center shall open doors to possible innovations in the field of localization and contextualization of instructional materials to suit the reading needs, levels, interests and other unique qualities of the Filipino college student across content areas. It shall also pave way for future institutional engagements or partnerships venturing on similar endeavors.

Deliverables

Among its deliverables are:

a) established Partido State University Reading Center;
b) training designs for faculty trainees handling Reading subjects;
c) baseline data in assessing the reading comprehension levels of tertiary level students, comparison of improvement of reading comprehension to the board performance results of students enrolled in board programs, among others;
d) research studies conducted related to reading comprehension, difficulties, readiness and other external factors that directly or indirectly affect reading development.

III. LOGICAL FRAMEWORK

The log frame shall provide the goals, objectives, outputs, activities, and their corresponding indicators of success of the project including the means of verification and the assumptions and risks. Risks as identified should be provided with appropriate strategies for its mitigation.

Goals/ Objectives	Activities	Outputs	Verifiable Indicators	Means of Verification	Assumptions and Risks
Establish a Reading Center in the university	Approval of project proposal and budget allocation	Approved project proposal with budget allocation	Number of proposal approved and budget allocation	Approved proposal and SARO	Prompt delivery of services in the concerned offices to properly implement the project
	Bidding and procurement procedures		Total Budget allocated to the project	Bidding and procurement documentations	Prompt delivery of services in the concerned offices to properly implement the project
	Project installation	Installed PARSu Reading Center	Percentage of on-time completion of the physical, digital and non-digital aspects of the reading center.	Turned-over documentations for supplies and materials received	Delay in the delivery of services of the concerned offices in the implementation of the project; bidding and procurement delays; unavailability of supplies and equipment

Development of training guides for faculty and students	Design training guides for faculty and students	Properly planned and designed training guides	Number of training guides produced	Copy of training guides / plans	Availability of expert trainers and training plans.
Orient the Faculty for proper usage of the SRA materials.	Conduct a university-wide orientation-seminar on the use of SRA materials and the reading facility.	Efficient use of the reading materials and facility	Number of faculty trained	Attendance sheet and other documentations	Prompt access of the budget for faculty training
	Pilot testing of the reading center	Improved systems operations of the reading center		Copy of systems operations procedure of the reading center	
Implementation of Reading center	Implement proper scheduling and house rules in using the facility	Efficient scheduling and utilization of the facility	Number of users scheduled Number of clients served	Schedule of Users House Rules Logbook	Availability of the schedules of the reading center users
Increase the reading proficiency of faculty and students in the service area.	Conduct SRA reading program for students and training for teachers.	Improved reading proficiency of faculty and students in the service area.	Percentage of reading center users with increased reading proficiency scores. Percentage of center users with low reading proficiency given reading intervention.	Reading proficiency assessment using the SRA. Supervisors' feedbacks on the teaching reading skills of the faculty users. Clients satisfaction survey	Time availability of center users completing the SRA reading test Willingness of the users with low reading proficiency levels to use the reading center and its resources.
Improve the Reading proficiency scores of reading center users	Conduct a reading program consisting of periodic diagnostic and	Efficient monitoring of students' reading progress.	Percentage of reading center users classified as low risk readers after using the	SRA reading performance scores	Inability of the clients to complete the reading sets; system & manpower to monitor the

	evaluative reading exercises for users of the reading center.		services		users' progress.
Monitor the implementation of the reading center	Conduct a quarterly monitoring and annual evaluation of the facility	Efficient use of the reading center	Percentage of clients who rated the reading center services as Very Satisfactory and Outstanding	Evaluation sheets; monitoring sheets; Statistical computation	Online digital users failed to evaluate the services Prompt delivery of services for monitoring and evaluation
			On-time monitoring of project's progress	Project monitoring progress report	Desired preliminary activities are attained and implemented on time.
Undergo formal study on the reading proficiency and other relevant factors surrounding literacy development in higher education	Conduct research studies related to reading development, reading comprehension, difficulties, etc.	Formal studies conducted along reading	Number of studies conducted on reading comprehension	Studies conducted on reading	Prompt implementation and data availability for analysis and interpretation.

IV. GANTT CHART

Gantt Chart for Year 1 (12 months)

Milestones	Activities and Tasks	2022											
		Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Establishment of the PARSu Reading Center	Approval of proposal and budget allocation												
	Bidding and procurement procedures												
	Project installation												
Development of training guides	Design training guides for faculty and students												

for faculty and students													
Orient the Faculty for proper usage of the SRA materials and in using the facility	Conduct a university-wide orientation-seminar on the use of SRA materials and the reading facility.												
	Pilot testing of the reading center												
Implementation of Reading Center	Implement proper scheduling and house rules in using the facility												
Improve the Reading proficiency scores of reading center users	Conduct a reading program consisting of periodic diagnostic and evaluative reading exercises for users of the reading center.												
Monitor the implementation of the reading center	Conduct a semestral monitoring of the implementation of the reading center.												
Evaluate the efficiency of the reading center on its first year of implementation	Conduct an annual evaluation of the reading center												

Gantt Chart for Year 2 (12 months)

Milestones	**Activities and Tasks**	**2023**											
		Jan	Feb	Mar	Apr	May	June	July	Aug	Sep	Oct	Nov	Dec
Feedbacking meeting with stakeholders	Conduct feedbacking conference with faculty and students												
	Adjustment of mechanisms or procedures based on the feedbacks gathered from stakeholders												

Continuation of the implementation of the reading center	Implement proper scheduling and house rules in using the facility												
Undergo formal studies on the reading proficiency and other relevant factors surrounding literacy development in higher education	Conduct research studies related to reading development, reading comprehension, difficulties, etc.												
Monitor the implementation of the reading center	Conduct a semestral monitoring of the reading center												
Evaluate the efficiency of the reading center	Conduct an annual evaluation of the reading center												

VI. WORK AND FINANCIAL PLAN (WFP)

This component shall itemize the funding requirement per object of expenditure per month. ***Funding for Personnel Services and MOOE shall be reported as the counterpart of the proponent HEI.*** *The counterpart of the proponent HEI shall also be indicated. Please also accomplish the WFP template in Excel Format which is provided and downloadable from this link.*

PROPOSED WORK AND FINANCIAL PLAN (WFP)

***Note:** Proposed allocation for equipment, facility or systems shall be supported by a market survey containing quotations of potential suppliers including the complete specifications of each proposed equipment, facility, or system. The counterpart of the proponent HEI shall be also indicated.*

Line Item, Budget, Particulars, and Specifications	***Unit Cost***	***Quantity***	***Duration (in months)***	***HEI Counterpart***	***Amount Requested from CHED***
Personnel Services (PS) *(Should be HEI Counterpart)*

TOTAL AMOUNT REQUESTED FROM CHED:	***928,331.70***	***2,965,856.40***

VII. SUSTAINABILITY PLAN

(Describe the activities and mechanisms to be put in place to ensure the sustainability of the intervention after the end of the project.)

For wider usability and enhanced impact of the project, the reading center will be utilized by freshmen students in all board courses after the board approval on the inclusion of reading program in the curriculum. This program is a non-unit subject (0 unit) but to pass it is a requirement for all students. They have to undergo all the color-coded SRA materials specifically completion of SRA 3B Purple or accomplishment of 25 consecutive color levels (out of the 48 color levels from 2a to 3b). This is to ensure that they are literate-ready as tertiary level students who shall encounter complex reading materials during their stay in the university. These non-digital materials will be properly kept in a storage free from humidity. Furthermore, in order to save its printed and hardcopy quality, the SRA kits will be plastic-laminated in order to avoid wear and tear. Furthermore, proper accounting procedures shall be done on a regular basis in order to avoid misplaced or lost materials. This shall be done by the center custodian or assistant.

Aside from non-digital reading program materials, the reading center's digital resources which will provide access to quality online resources (e.g Excelsior Owl, etc) shall be properly maintained by the university. Among this equipment include the ICT units (networked computers, internet connectivity, CCTV units, networked printer, etc) shall be properly maintained by the university through its ICTMO. A regular maintenance procedure shall be put in place in order to check the operability of various equipment inside the reading center. The university shall allocate annual budget for proper maintenance and operation of the said facility.

Through the establishment of Reading Center, it shall open doors to possible innovations in the field of localization and contextualization of instructional materials to suit the reading needs, levels, interests and other qualities of the college students.
It shall also pave way for future institutional engagements or partnerships venturing on similar endeavors.

VIII. PROJECT TEAM

This component shall enumerate the project team including the terms of reference of each member. Copies of the curriculum vitae of each member shall also be attached.

(Kindly add rows as necessary.)

No.	Name of Project Team Member	Designation in HEI and Employment Status	Role in the Project
1.	*Ms. Sheila E. Amoroso*	College Admission Coordinator Assistant Professor III	Project Leader
2.	*Dr. Marita S. Magat*	College Dean Professor VI	Project Member

3.	*Dr. Josefina A. Borromeo*	Internationalization Coordinator Professor V	Project Member

PREPARED BY:

SHEILA E. AMOROSO

PROJECT LEADER

DATE: December 14, 2021

- I hereby certify that I have reviewed and that I am endorsing the project proposal as responsive to the needs of our higher education institution.
- I hereby certify that this project proposal **has not been previously funded** by the CHED and other government agencies.
- I hereby certify that this project proposal **has not been submitted for funding** in other government agencies or other programs of CHED in the previous years.

RAUL G. BRADECINA, PhD

PRESIDENT
Partido State University
