NARRATIVE REPORT

PART I. SUMMARY OF INFORMATION

Project Title: Project 1-F. Developing the Intellectual Property and Technology Business Management (IP-TBM) in Partido State University (ParSU) through Regional Agri-Aqua Innovation System Enhancement (RAISE)

Implementing Agency/ies: Partido State University-Main

Cooperating Agency/ies:

- Camarines Norte State College (CNSC)
- Camarines Sur Polytechnic Colleges (CSPC)
- Sorsogon State University (SorSU)
- Catanduanes State University (CatSU)
- Central Bicol State University for Agriculture (CBSUA)
- Bicol University (BU)
- Dr. Emilio B. Espinosa, Sr. Memorial State College of Agriculture and Technology (DEBESMSCAT)

Budget:	Total approved budget	1,800,000.00 PhP
	Total released budget (as of July 4, 2022)	1,027,549.00 PhP
	Total actual budget expenditures (as of December 31, 2022)	617,807.00 PhP

Duration:	Actual Start of Project Implementation	(January 1, 2022)
	Actual End of Project Implementation	(December 31, 2023)
	Extension - Start:	(NA)
	Extension - End:	(NA)

Region/Areas Covered: Region V

Rationale/Significance:

The Philippines has further increased its innovation achiever position in the 2020 Global Innovation Index (GII) posting a jump from the 50th place from the 54th in the previous year and is considered the highest position ever of the country. The GII ranks 131 world economies based on innovative capabilities. The innovation inputs and outputs are being considered in the GII.

This achievement has been achieved due to the implementation of various laws that strengthened the scope of protection and support to IP protection and commercialization. One of these laws include the RA 10055: Technology Transfer Act which promote the utilization of intellectual property for the national benefit and shall call upon all research and development institutes and/or institutions (RDIs) that perform government-funded research and development (R&D) to take on technology transfer as their strategic mission and to effectively translate results of government-funded R&D into useful products and services that will redound to the benefit of Filipinos, notwithstanding the income generated from intellectual property rights (IPRs) and technology transfer activities. RA 10372: Revised IP Code further

defines and strengthen the IP Code of the Philippines and the Intellectual Property Office of the Philippines to facilitate the protection of products and technologies produced in the Philippines. RA 11293: Innovation Act on the other hand aims to foster innovation as a vital component of national development and sustainable economic growth, while RA 11337: Innovative Start-up Act is to foster inclusive growth through an innovative economy by streamlining government and nongovernment initiatives, in both local and international spheres, to create new jobs and opportunities, improve production, and advance innovation and trade in the country.

DOST as one of the identified “start-up enablers” in the country has made significant contribution to this achievement though various initiatives. In 2016, PCAARRD launched the DOST-PCAARRD Innovation and Technology Center (DPITC) that caters to the technology commercialization initiatives of the agency. Under the initiatives of the DPITC, the Intellectual Property-Technology Business Management (IP-TBM) program was conceptualized and approved. For the batch 1 of the program 5 licensing agreements were executed against the target of 10. for Batch 2, exploratory meetings with potential investors are still on-going. To sustain and pursue the initial efforts in protecting the technologies generated by the participating HEIs in the Batch 1 and 2 of the IP-TBM program. The SUSTAIN IP-TBM Phase II was implemented using the mentor-mentee approach where there are five mentor agencies that taught and guided thirty mentor agencies on IP Protection and Commercialization.

In Bicol region, Partido State University (ParSU) integrated the Research and Development function since 1994. This integral component to be functional must conduct researches, projects and programs responsive and directed towards enhancement of the existing programs of the university and supportive to the country's development goals. Research management at ParSU must enunciate clearly its vision, mission goals and objectives, areas of concern, thrusts and priorities, organizational structure and functions, and implementing mechanisms. This is done to ensure an orderly manner and professional conduct of research in this academic community.

ParSU evolved and implemented an effective mechanism for forecasting, planning, policy making, financing managing, and assessing Research Activities designed to promote the institutions growth and development along the four goals of higher education: access and equity, quality and excellence, relevance and responsiveness, and efficiency and effectiveness, and along the priority areas of the local government and national government. It also want to gain recognition as a reputable Research unit with a track record of conducting Research activities that will contribute to the pool of knowledge, and solve the problem of the academe, community

ParsU is also conducting research and development studies in social sciences, business, science and technology, culture and arts, agriculture and fisheries. It will strengthen

the manpower and resource capabilities of the university. It will formulate and recommend research policies and guidelines conducive to and supportive of the research endeavor of the faculty and other members of the academe. It will establish linkage with government and non-government agencies, industry and business sectors, sister SUC's and other local and foreign institution for fund sourcing, capability building, and networking along the research and development endeavor. ParSU will also disseminate information and technologies responsive to the emerging needs of its clientele. It will also create mechanisms for monitoring and evaluating researches and research activities, and for dissemination, implementation and utilization of research outputs.

With the aforementioned vision, ParSU sees the need seminars and trainings on IP protection and Commercialization that will address the lacking avenues for technology partnerships and commercialization of AANR products of the institution. The RAISE Program can provide the capability training and building on technology transfer to R&D partners while developing ParSU's establishment of technology transfer office. This will also bring forth a maximized economic potential of science and technology innovations.

With the aforementioned vision, ParSU sees the need seminars and trainings on IP protection and Commercialization that will address the lacking avenues for technology partnerships and commercialization of AANR products of the institution. The RAISE Program can provide the capability training and building on technology transfer to R&D partners while developing ParSU's establishment of technology transfer office. This will also bring forth a maximized economic potential of science and technology innovations.

General Objectives:

To strengthen the capacities of intellectual property and technology business management (IP-TBM) operations of PARSU.

Specific Objectives:

1. Capacitate the technology transfer personnel of PARSU;
2. Enhance the technology promotion and commercialization activities of PARSU; and
3. Intensify linkages with various agencies to enhance activities on intellectual property protection and management and technology transfer and commercialization.

Expected Outputs:

The expected outputs of the project are the following:

PUBLICATION

5 Information, Education and Communication (IEC) Materials developed

PATENT

5 Intellectual Property (IP) Applications filed
5 Copyright of IECs filed

PRODUCT

5 Prior Art Search (PAS) Reports prepared
1 IP inventory
1 inventory of matured technologies
1 inventory of knowledge resources
1 communication plan
1 technology with pre-commercialization reports
1 product enhanced (prototyping, developed, packaging, branding)
1 product pre-commercialized manufactured
2 technologies pitched
1 Technology Commercialized

PEOPLE & SERVICES

2 CMI staff attended Prior Art Search and IP Audit Workshop
2 CMI staff attended Policy Webinar/Workshop
2 CMI staff trained in IP MasterClass
2 CMI staff trained in Agribusiness MasterClass
2 CMI staff trained in Technology Commercialization Mentorship Series (TCMS)
2 CMI staff trained in TechPromotion Mentorship
2 CMI staff attend CommPlan Workshop
Conducted re-echo seminars
Trained at least 20 CMI staff in re-echo seminars
Participate to the content build-up of RTMS

PLACES & PARTNERSHIPS

1 Commitment Letter
1 partnership agreement w/ Business/Trade Institutions
1 Commercialization Agreements

POLICY

Crafted/revised IP Policies and Technology Transfer Protocols

SOCIAL IMPACT

The IP-TBM program contributes to the SUC levelling among participating agencies.

The IP filings under this IP-TBM program will also influence a positive change in the Professorial Level Point System for the local inventor.

ECONOMIC IMPACT

The project will generate income from licensing fees, upfront fee, other commercialization agreements.

PART II. HIGHLIGHTS OF ACCOMPLISHMENTS

- **Products / Services / Innovations Developed**

Completed Prior Arts Search

The IP-TBM project in ParSU, through the Intellectual Property (IP) Unit headed by Mr. Michael C. Barbecho, the University IP and Technology Officer, under the Research and Development Office of University Research, Extension, and Knowledge Management (UREKM) conducted and completed five (5) Prior Arts Search (PAS) reports for the approved research proposals of faculty from year 2019 to 2022. The PAS for the proposed faculty researches were conducted to look for available publication and public knowledge relevant to the proposed technology of the faculty and to ensure that every proposed technology is novel, patentable, and not a duplication of existing prior arts. The following are the faculty research proposals with PAS report made:

1. Design and Development of Smart Solar/Grid Powered Fish Dryer

The prior arts searching for this proposal was conducted in the months of March to May 2022. The title of patentable IP for this technology is “Solar/Grid Powered Fish Dryer” with recommendation for IP protection under “Invention” Category. The research project is headed by Mr. Michael C, Barbecho, the project leader, with his team members Mr. Luven A. Haja, Mr. Jose S. Fernandez, Dr. Myrna C. Bigueja, Ms. Irene P. Daet, and Ms. Glenda S. Sales.

2. Designing and Development of Fish Vendor Cooler

In the month of June 2022, prior arts searching for this research proposal was conducted. The research project is headed by Mr. Jose S. Fernandez, the project leader with his members Mr. Leoben C. Formalejo, Mr. Alvin O. Primavera, and Dr. Gemmah T. Barcillano. The title of patentable IP for this technology is “Fish Vendor Cooler” and was recommended for IP protection under Utility Model category.

3. Development and Fabrication of 3 in 1 Knapsack Agricultural Sprayer

In the month of June 2022, prior arts searching for this research proposal was conducted. This research project was proposed by Mr. Jose S. Fernandez and Mr. Leoben C. Formalejo. The title of patentable IP for this technology is “Solar Powered Knapsack Agricultural Sprayer” and was recommended for IP protection under Utility Model category.

4. In-vitro Mass Propagation in Different Carbon Sources of Taro

In the month of June 2022, prior arts searching for this research proposal was conducted. This research project was proposed by Ms. Karen Eyre Moshie O. Artiaga. The title

of patentable IP for this technology is “Mass Propagation Method of Taro by In-Vitro Culture” and was recommended for IP protection under Utility Model category.

5. Development of Metal Foundry Furnace

In the month of September 2022, prior arts searching for this research proposal was conducted. This research project was proposed by Engr. Raymundo V. Romero. The title of patentable IP for this technology is “Metal Foundry Furnace” and was recommended for IP protection under Utility Model category.

Inventory of Potential IP and IP Assets

The IP-TBM project in ParSU, through the Intellectual Property (IP) Unit headed by Mr. Michael C. Barbecho, the University IP and Technology Officer, conducted inventory of potential IPs for the completed researches of PARSU Tinambac Campus students from year 2017 to 2019. Out of twenty-one (21) completed researches from the stated year, fifteen (15) researches falls under copyright, Four (4) researches fall under utility model, and two (2) researches fall under patent.

For the IP assets of Partido State University, the inventory was conducted from year 2014, wherein one (1) invention is filed and approved in 2021. In 2016, there were two (2) utility models and one (1) industrial design filed and registered while in 2017, there were five (5) utility models filed and registered. In 2021, there is one (1) invention, one (1) utility model, and one (1) industrial design filed and published. Currently, in 2022, there were three (3) utility models and two (2) industrial design filed and published.

People Services

For the people services, ParSU through the IP-TBM project sent participants to the following trainings spearheaded by the Department of Science and Technology- Philippine Council for Agriculture, Aquatic and Natural Resources Research and Development (DOST-PCAARRD):

- *Intellectual Property (IP) Masterclass (IPMC) Webinar*

The IPMC Webinar was attended by Michael C. Barbecho, University IP and Technology Officer and Jose C. Tunay Jr. III, faculty of PARSU Tinambac Campus. This master class was conducted via Zoom from March 23, 2022 to May 27, 2022. This is a training series which goal is to capacitate the participants in IP concepts, patent searching and patent drafting.

- *Agribusiness Masterclass Mentorship Series (ABMC) Webinar*

The ABMC Webinar was attended by Jenny P. Lorio and Gina M. Villareal, both an affiliate faculty of PARSU Salogon Campus. This is a 10-day training series that is intended to improve the skills of the participants in market research, product branding and packaging as well as develop linkages to sustain the operations of the developed business enterprise by the University. This was conducted via Zoom on the months of October 2022 to November 2022.

- *Technology Commercialization Mentorship Series (TCMS) Webinar*

The TCMS Webinar was attended by Joel P. Sadol, Dean of PARSU Salogon Campus and Maria France Q. De Vergara, a faculty of PARSU Sagñay Campus. This is a 15-day training series that is intended to improve the skills of the participants in market identification, validation and technology valuation. This was conducted via Zoom on the months of July 2022 to September 2022.

- *Technology Promotion Mentorship Series (TPMS) Webinar*

The TPMS Webinar was attended by Joel P. Sadol, Dean of PARSU Salogon Campus and Kier P. Gasga, a faculty of PARSU San Jose Campus. This was conducted via Zoom on the months of September 2022 to November 2022.

For the attendees on the Communication Plan Workshop, Mr. Michael C. Barbecho attended the PAHATIRAN: Communication Plan Action Planning on June 14-15, 2022 which was organized by the DOST-PCAARRD. Likewise, a Regional Knowledge Inventory and Communication Planning Workshop organized by the RAISE Project 4, Regional Knowledge Management Hub through RAISE Bicol on October 24-25, 2022 and December 16, 2022. This workshop aims to build capacity for technology promotion and enable the program with effective communication with the stakeholders and to the public. This was attended by Michael C. Barbecho, PARSU IP and Technology Officer, Melody G. Perias, PARSU R&D Staff, and Jella Marie N. Oyales, Science Research Assistant of PARSU RAISE Project.

Re-echo Seminars

Seminar on Intellectual Property (IP) Awareness and IP Education

October 27, 2022 - PARSU Sagñay Campus | November 4, 2022 – PARSU Caramoan Campus
November 7, 2022 - PARSU Lagonoy Campus | November 14, 2022 - PARSU San Jose Campus

Partido State University is a Higher Education Institution wherein all teaching personnel are mandated to deliver the four-fold functions: instruction, research, extension, and production. It is during the delivery of these functions where any personnel may create Intellectual Property (IP) and disclose in the public without prior protection, may duplicate an existing IP, or may infringe IP rights without knowing about it.

In line with the implementation of the Regional Agri-Aqua Innovation System Enhancement (RAISE) Program in Bicol with project titled “Project 1F: Developing the Intellectual Property and Technology Business Management (IP-TBM) in Partido State University through RAISE”, and the implementation of the newly approved IP Policy of PARSU (BOR Resolution No. 46, s. 2022), this activity is intended to provide all teaching personnel to of Partido State University - Caramoan Campus, Lagonoy Campus, Sagñay Campus, and San Jose Campus with the necessary education and awareness pertaining to IP, related IP laws, and the highlights contained in IP Policy of the university.

The activity was attended by the faculty member of four (4) identified campuses of PARSU which is shown in the table below:

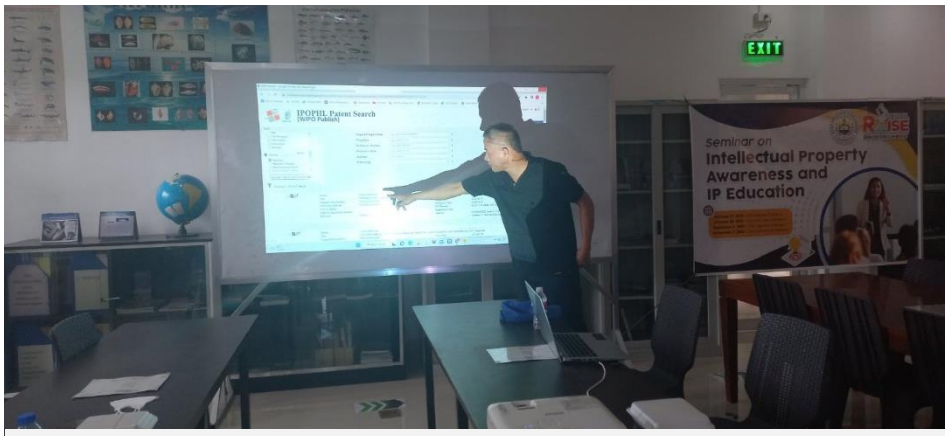

Campus	***No. of Faculty Participated***
PARSU Sagñay	12
PARSU Caramoan	13
PARSU Lagonoy	15
PARSU San Jose	20
Total faculty participated	**60**

The activity was participated by the sixty (60) faculty members of PARSU Sagñay Campus, PARSU Caramoan Canpus, PARSU Lagonoy Campus, and PARSU San Jose. The main purpose of the activity is to provide all teaching personnel of the University with the necessary education and awareness pertaining to IP. Specifically, to: a) conduct IP orientation to all teaching personnel of four (4) identified campuses of PARSU; b) provide the teaching personnel with information contained in the newly BOR approved PARSU IP Policy, more specifically on IP rights, IP creation and protection, IP ownership, and awards & incentives; c) conduct orientation on how to use the website of Intellectual Property Office of the Philippines (IPOPHL) in finding information relevant to IP; and d) encourage the teaching personnel to engage in research works having patentable and commerciable outputs.

Thus, this activity provided the participants necessary information about intellectual property. Also, they're properly guided to observe and follow the policies contained in the PARSU IP Policy more particularly on the creation, protection, and ownership of IP. Likewise, faculty researchers learned about how to use the website of Intellectual Property Office of the Philippines (IPOPhl) in finding information relevant to IP.

Day 1: October 27, 2022 | Old Library Building at PARSU Sagñay Campus

Mr. Michael C. Barbecho (PARSU IP & Technology Officer & RAISE IP-TBM Project Staff Level 3), discussing the demonstrating on how to navigate the IPOPHL website.

Some the faculty participants of the Seminar on IP Awareness and IP Education at PARSU Sagñay Campus held on October 27, 2022 at Old Library Building of the campus.

Day 2: November 4, 2022 | 2nd Floor of PARSU Caramoan Hostel at PARSU Caramoan Campus

Dr. Michael A. Clores, Dean of PARSU Caramoan Campus (right) awarded Mr. Barbecho the Certificate of Commendation as Resource Speaker of the seminar.

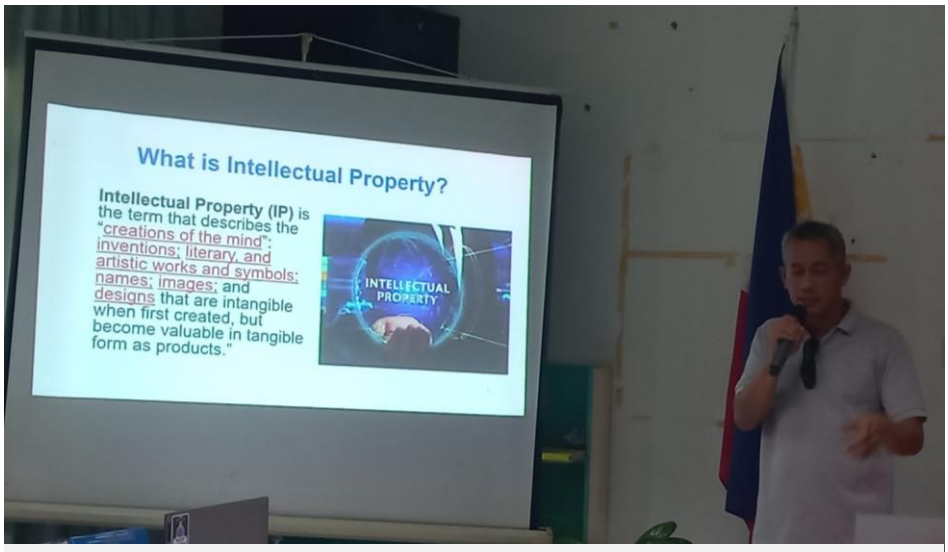

Mr. Barbecho, discussing the IP Cycle as part of the Topic 1: "Overview of Intellectual Property"

Day 3: November 7, 2022 | Faculty Room, Marine Food Science Building at PARSU Lagonoy Campus

Mr. Clarson V. De Vera, OIC-Dean of PARSU Lagonoy Campus graced the seminar with opening remarks and gave acknowledgment to the participants of the seminar.

Mr. Michael C. Barbecho discussing the overview of Intellectual Property.

Day 4: November 14, 2022 | 2nd Floor of PARSU San Jose Hostel at PARSU San Jose Campus

Some the faculty participants of the Seminar on IP Awareness and IP Education at PARSU San Jose Campus held on November 14, 2022 at 2nd Floor, Hostel of the campus.

Mr. Barbecho, discussing the Topic 2 of the seminar which is the "Information Dissemination of BOR Approved PARSU IP Policy" comprising the IP rights, IP creation and protection, IP ownership, and awards and incentives.

3-Day Re-Echo Seminar Workshop on Patent Searching and Patent Drafting

November 16-18, 2022 | College of Engineering and Technology Audio-Visual Room, PARSU Goa Campus

In line with the implementation of the Regional Agri-Aqua Innovation System Enhancement (RAISE) Program in Bicol with the project titled "Project 1F: Developing the Intellectual Property and Technology Business Management (IP-TBM) in Partido State University (ParSU) through RAISE", faculty participants from ParSU were sent to the Intellectual Property Master Class (IPMC) webinar workshop held last March 2022 to May 2022. The webinar workshop was part of the RAISE Program's capacity building sponsored by DOST-PCAARRD with the purpose of developing enhancing the IP management skills of IP offices in every State Universities and Colleges in the Bicol and other regions in the Philippines.

To transfer the knowledge and skills gained from the webinar workshop, and as part of the deliverables under the RAISE: ParSU IP-TBM project, the proponent conceptualized a re-echo seminar workshop that will be participa ted by faculty researchers/technology generators of this institution with proposed or completed research projects. This seminar workshop is intended to provide capacity building and enhancement training that will help them protect their patentable research outputs in the earliest possible time. Said seminar workshop will focus on the latest trends and methodologies in patent searching and patent drafting. Further, this will be conducted so that every faculty researcher/technology generator of this institution could practice early filing and protection of the IPs they created prior to any form of public disclosure.

Day 1: 16 November 2022, Wednesday

08:00 - 08:30 AM	-Registration/Attendance of Participants-
08:30 - 09:00 AM	-Preliminaries- -Welcome Remarks and Acknowledgement of Participants- **ERLINDA M. BASILLA, Ph.D.** Vice President for Academic Affairs
09:00 - 09:45 AM	Topic 1 ***"Overview of Intellectual Property"*** Resource Speaker **MICHAEL C. BARBECHO** PSU Intellectual Property & Technology Officer
10:00 AM - 12:00 NN	Topic 2 ***"Lecture on Patent Searching"*** Resource Speaker **MICHAEL C. BARBECHO** PSU Intellectual Property & Technology Officer
01:00 - 03:00 PM	Patent Searching Workshop
03:15 - 05:00 PM	Presentation of Outputs on Patent Searching

Day 2: 17 November 2022, Thursday

08:00 - 08:30 AM	-Registration/Attendance of Participants-
08:30 - 08:45 AM	-Recapitulation of Day 1 Activity-
08:45 - 09:45 AM	Topic 3 ***"Drafting the Patent Figures"*** *(Use of Simple CAD software)* Resource Speaker **MICHAEL C. BARBECHO** PSU Intellectual Property & Technology Officer
10:00 AM - 12:00 NN	Workshop on Drafting Patent Figures
01:00 - 02:00 PM	Presentation of Outputs on Drafting Patent Figures
02:00 - 03:00 PM	Topic 4 ***"Lecture on Claim Drafting"*** *-Invention and Utility Model* *-Industrial Design* Resource Speaker **MICHAEL C. BARBECHO** PSU Intellectual Property & Technology Officer
03:15 - 05:00 PM	Workshop on Claim Drafting

Day 3: 18 November 2022, Friday

08:00 - 08:30 AM	-Registration/Attendance of Participants-
08:30 - 08:45 AM	-Recapitulation of Day 2 Activity-
08:45 - 09:45 AM	Presentation of Outputs on Claim Drafting
10:00 AM - 12:00 NN	Topic 4 ***"Lecture on Drafting of the Specification"*** Resource Speaker **MICHAEL C. BARBECHO** PSU Intellectual Property & Technology Officer
01:00 - 03:00 PM	Workshop on Drafting of the Specification
03:15 - 04:00 PM	Presentation of Outputs on Drafting of the Specification
04:00 - 04:30 PM	Submission of Patent Documents
04:30 - 04:45 PM	Distribution and Awarding of Certificates
04:45 - 05:00 PM	-Closing Remarks- **LUISA M. LANCISO** Director, Research and Development

The activity was attended by the following faculty-researchers of the different campuses and colleges of PARSU which is shown in the table below:

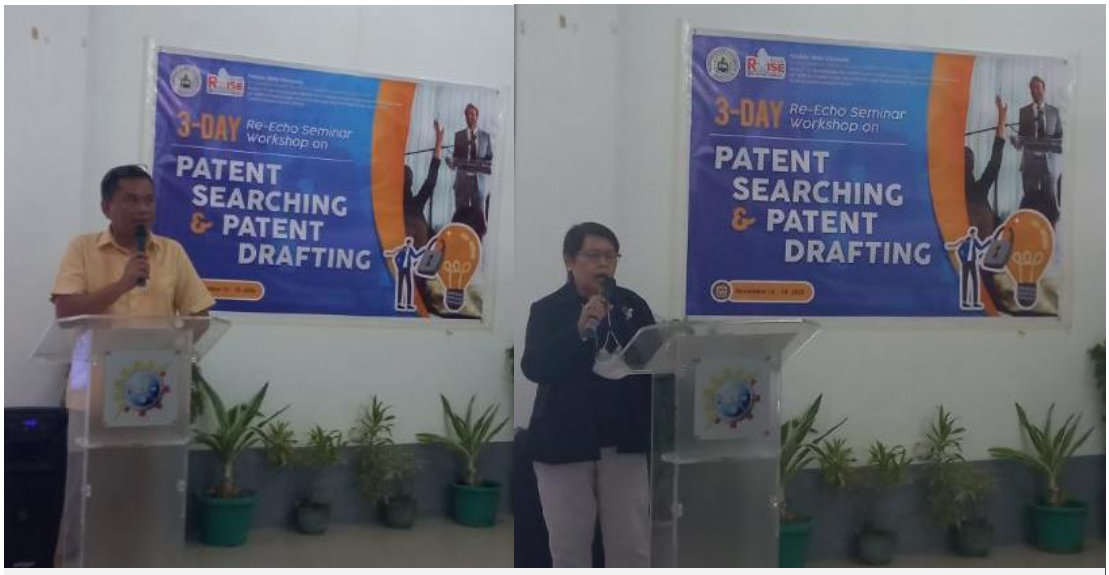

Campus/College	***No. of Faculty-Researchers Participated***
College of Engineering and Technology	7
College of Arts and Sciences	3
PARSU Sagñay	3
PARSU Caramoan	2
PARSU Lagonoy	4
PARSU San Jose	2
Total faculty-researchers participated	**21**

The activity was participated by the twenty-one (21) PARSU's faculty-researchers or technology generators with proposed or completed researches having patentable technology. This seminar-workshop was conducted at the PARSU College of Engineering and Technology Audio-Visual Room. This three-day activity was hosted by Mr. Jose S. Fernandez the Program Director of Automotive Technology. The Resource Speaker of the four topics is Mr. Michael C. Barbecho the PARSU IP and Technology Officer and an Intellectual Property Master Class

(IPMC) completer. The opening program was graced by Dr. Erlinda M. Basilla the Vice President of Academic Affairs of the University.

The goal of this activity is to be able the participants to acquire the patent searching and patent drafting skills and techniques as part of the human capacity building activities of PARSU IP Unit. Also, this workshop serves as participants' guide to carefully craft their patent application as their first effective step towards obtaining appropriate protection for their inventions and thus for making an effective use of the patent system. Specifically, to: a) capacitate the participants in patent searching and patent drafting; b) provide the participants with updates on the latest patent searching and patent drafting techniques and methodologies; c) increase the IP filings of PARSU particularly in the invention category; and d) determine the problems encountered by faculty researchers during drafting, filing, and prosecution phase of their IPs. Thus, this seminar workshop helps the participants acquire knowledge and skills in conducting patent search and patent drafting. They are also able to prepare patent application documents of their technologies and submitted for evaluation at the PARSU IP Office before filing at the Intellectual Property Office of the Philippines (IPOPHL).

Day 1: November 16, 2022
CET Audio-Visual Room at PARSU Goa Campus

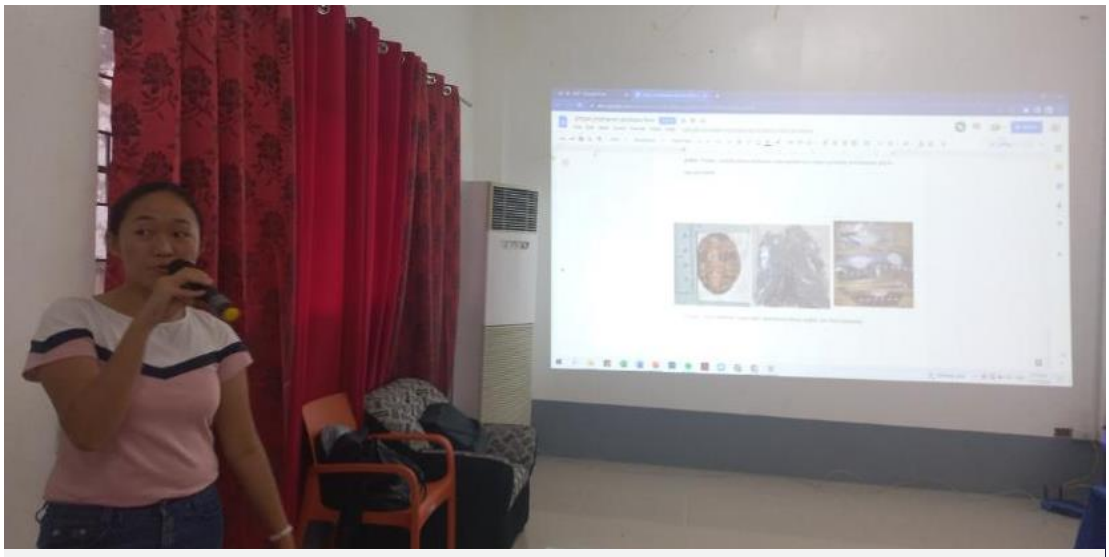

Mr. Jose S. Fernandez, Program Director-Automotive Technology (left) the Master of Ceremonies of the activity; and Dr. Erlinda M. Basilla, VPAA (right) who gave the opening remarks and acknowledgement to the participants.

Day 2: November 17, 2022
CET Audio-Visual Room at PARSU Goa Campus

Dr. Teresa A. Mendoza, Faculty of Lagonoy Campus giving a recapitulation of the Day 1 activity of the seminar-workshop.

Ms. Maria France Q. De Vergara, participant from Sagñay Campus presenting her output on Drafting Patent Figures.

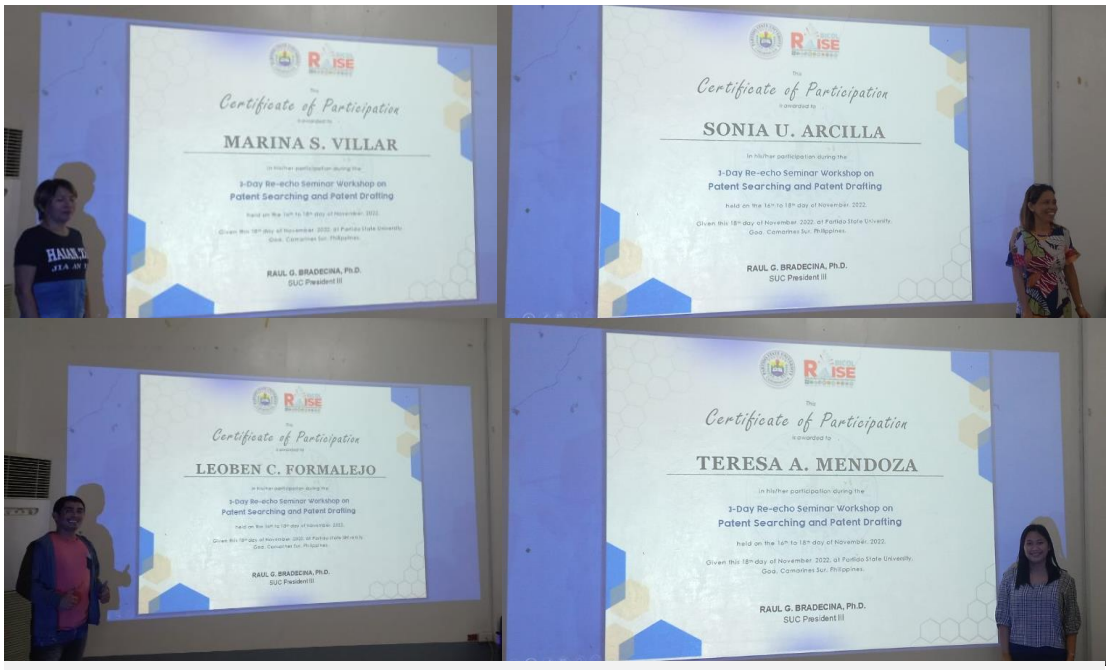

Participants from San Jose Campus working on Drafting Patent Figures Workshop.

Day 3: November 18, 2022
CET Audio-Visual Room at PARSU Goa Campus

Mr. Raymundo Romero, participant from CET presenting her output on Claim Drafting.

Some of the photo documentation during the awarding of Certificate of Participation.

- **Intellectual Properties Generated**

During the 3rd quarter of implementation of RAISE IP-TBM in ParSU, there were a total of eight (8) Intellectual Properties (IP) applications filed and supported by this project with one (1) invention, one (1) utility model, and six (6) industrial designs. The ParSU Intellectual Property Unit headed by Mr. Michael C. Barbecho submitted IP applications online at the Intellectual Property of The Philippines. The IP protection was made to protect the IP rights of the owner and IP creators who generated the technology. The IP could have registrable rights such as patents, trademarks, and design rights; and unregistered rights such as copyright. The IP filed for protection were the following:

1. Solar/Grid Powered Fish Dryer *(Invention and Industrial Design)*

This technology is a solar/grid powered fish dryer which could be a substitute for local drying methods during the hot and wet season improving sanitation and hygiene, preserving the fish economically with ease of operation, and maintaining product quality. Partido State University is the applicant and the owner of this IP. The IP protection was filed under the Invention category with application number **1-2022-050436** and Industrial Design category with application number **3-2022-050799**. The technology developers of this apparatus are Mr. Michael C. Barbecho, Mr. Luven A. Haja, Mr Jose S. Fernandez, Dr. Myrna C. Bigueja, Ms. Irene P. Daet, and Ms. Glenda S. Sales. The application was filed online on August 19, 2022 for invention and August 16, 2022 for industrial design.

2. **Fish Vendor Cooler *(Utility Model and Industrial Design)***

This technology is a fish vendor cooler that can be used by fish vendor in selling fish, maintaining proper sanitation while preserving the freshness and quality of the fish. Partido State University is the applicant and the owner of this IP. The IP protection was filed under the Utility Model category with application number **2-2022-050727** and Industrial Design category with application number **3-2022-050797**. The technology developers for this device are Mr. Jose S. Fernandez, Mr. Leoben C. Formalejo, Mr. Alvin O. Primavera, and Dr. Gemmah T. Barcillano. The two (2) IP applications was filed online on August 19, 2022.

3. Abalone Shell Christmas Decoration *(Industrial Design)*

This industrial design is an ornamental design titled “Abalone Shell Christmas Decoration” wherein the raw materials are made from abalone shell. Partido State University is the applicant and the owner of this IP. The IP protection was filed under Industrial Design category with application number **3-2022-050798**, the designer of this product is Ms. Rosemarie A. Tabardillo. The application was filed online on August 19, 2022.

4. Abalone Shell Candle Holder *(Industrial Design)*

This industrial design is an ornamental design titled “Abalone Shell Candle Holder” wherein the raw materials are made from Abalone-like shell clams and mussels are hard and durable and can be transformed into functional or decorative objects. The product is a candle holder made from trash abalone shell after the meat is extracted from it. Partido State University is the applicant and the owner of this IP. The IP protection was filed under Industrial Design category with application number **3-2022-050993**, the designers of this product are Ms. Rosemarie A. Tabardillo and Ms. Angeli Rose Rioja. The application was filed online on September 27, 2022.

5. Abalone Shell Table Lamp *(Industrial Design)*

This industrial design is an ornamental design titled “Abalone Shell Table” wherein the abalone shell is collected and thoroughly cleaned, polished. The table lamp combines abalone shell with other recyclable materials such as scrap plastic chicken wires, plastic sheets, etc. Partido State University is the applicant and the owner of this IP. The IP protection was filed under Industrial Design category with application number **3-2022-050994**, the designer of this product is Ms. Rosemarie A. Tabardillo. The application was filed online on September 27, 2022.

6. Molding Machine for Leaf Wrapper *(Industrial Design)*

This industrial design is an ornamental design titled “Molding Machine for Leaf Wrapper” this comprises: a body frame, a housing containing the AC to DC power supply, a control box containing the power switch, and driving DC motor that turns the molder pipe. It can be used as an instructional device for laboratory activities and simplifies the processes in molding ibos for mass production of suman. Partido State University is the applicant and the owner of this IP. The IP protection was filed under Industrial Design category with application number **3-2022-050992**, the designers of this product are Mr. Jose S. Fernandez, Mr. Leoben C. Formalejo, Mr. Alvin O. Primavera, and Dr. Gemmah T. Barcillano. The application was filed online on September 27, 2022.

- **Technology Promotion and Commercialization Activities**

The Department of Science and Technology (DOST) V Fairness Opinion Board (FOB) Secretariat conducted pre-formality examination for the twelve (12) submitted technologies of ParSU last September 28, 2022 at DOST V Regional Office, Rawis, Legazpi City. The purpose of the assessment are the following:

(1) present the developed technologies of ParSU; (2) evaluate the Technology Readiness Level (TRL) of ParSU's developed technologies; and (3) be guided on how to proceed with IP commercialization.

The following technologies are shown in table below.

Title	Technology Developer	Type of IP	Application No.	Date Filed	Status
1. Coconut Leaf Molding Machine for Ibos (Suman)	Alvin O. Primavera | Jose S. Fernandez | Gemmah T. Barcillano | Leoben C. Formalejo	Industrial Design	3-2022-050992	27 September 2022	Applied
2. Front Drive Power Train and Suspension Mechanism of Three-Wheeled Electric Vehicle	Michael C. Barbecho | Romeo B. Morcilla | Neonita B. Palmaria	Invention	1-2014-000203	July 28, 2014	Registered
3. Fish Vendor Cooler	Alvin O. Primavera | Jose S. Fernandez | Gemmah T. Barcillano | Leoben C. Formalejo	Utility Model	2-2022-050727	19 August 2022	Applied
		Industrial Design	3-2022-050797	19 August 2022	Applied
4. Hydraulic Leaf Spring Suspension Brushing Remover/Installer	Jose C. Tunay Jr. III | Michael C. Barbecho	Industrial Design	3-2016-000331	June 15, 2016	Registered
5. Multi-Purpose Marking Device	Soledad P. Galang | Krispin P. Galang	Utility Model	2-2017-000742	October 9, 2017	Registered
6. Process of Producing Butter Cookie Enriched with Native Bicol Pili (*Canarium ovatum*) and Sili Labuyo (*Capsicum frustescens*)	Mericia Mila A. Amador	Utility Model	2-2016-001038	December 21, 2016	Registered
7. Portable Rice-Cake Making Machine	Alvin O. Primaver | Jose S. Fernandez | Gemmah T. Barcillano | Leoben C. Formalejo	Industrial Design	3-2022-050209	March 10, 2022	Published
8. Portable Shortbread Cookie Device	Alvin O. Primavera | Marilou U. Israel | Krispin P. Galang	Industrial Design	3-2022-050196	March 7, 2022	Registered

12. Dye Sensitized Solar Cell Using Pili (*Canarium ovatum*) Dye and Activated Carbon as Sensitizer and Counter Electrode	Kier P. Gasga	Industrial Design	3/2021/050062		Registered

The Partido State University Technology Generators together with the DOST V FOB Secretariat during the Pre-Formality Exam of the PARSU IPs on September 28, 2022 at DOST V Regional Office, Legazpi City, Albay.

Mr. Michael C. Barbecho during the evaluation of his technology "Front Drive Power Train and Suspension Mechanism for Three-wheeled Electric Vehicle".

On October 3, 2022, the PARSU Research and Development Office received an email from the DOST V FOB Secretariat sent by Engr. Jeremiah Burac, DOST V FOB and SciTech Superhighway Staff the summary of assessment of the twelve (12) PARSU technologies presented last September 28, 2022 during the Pre-Formality Examination Consultation Meeting.

The following result are as follows:

- **IPs for Commercialization *(thru for transaction)*:**
  1. Coconut Leaf Molding Machine for Ibos (Suman)
     a. Valuation
     b. Market Viability
     c. Potential Licensee

  2. Front Drive Power Train and Suspension Mechanism of Three-Wheeled Electric Vehicle
     a. Valuation
     b. Market Viability
     c. Potential Licensee

- **IPs for Pre-Commercialization:**
  1. Fish Vendor Cooler
     a. Scalability
     b. Consider suggestions to improve prototype
     c. May consider applying for Technicom
     d. Commercialize

  2. Hydraulic Leaf Spring Suspension Brushing Remover/Installer
     a. Apply for renewal of ID (provide DAU – demonstration of actual use)
     b. Apply for Technicom (for further improvement of prototype)
     c. Commercialize

  3. Multi-Purpose Marking Device
     a. Market viability
     b. Consider suggestions to improve prototype
     c. Apply for another IP protection (with new features)
     d. Commercialize

  4. Process of Producing Butter Cookie Enriched with Native Bicol Pili (*Canarium ovatum*) and Sili Labuyo (*Capsicum frustescens*)
     a. Apply to Produkto Mercado of BRFICC (for market study)
     b. Apply to Technicom (for further improvement)
     c. Commercialize

- **IPs for other Commercialization Track:**
  1. Portable Rice-Cake Making Machine
     a. For extension. Can still commercialize but not thru FOR. Explore other possible venues for commercialization (based on PARSU's IP Policy).

- **Other IPs:**
  1. Portable Shortbread Cookie Device
     a. More revisions. Consider suggestions by panel.
     b. Not yet ready for commercialization

  2. Abalone Shell Christmas Decoration
     a. Check sustainability
     b. Market viability. Check for demand in market.
     c. Not yet ready for commercialization

  3. A Process of Producing Sweet Pickled Green Papaya (*Carica papaya*) and the Product Produce Thereof
     a. Wait for result of IPOPHL Assessment
     b. Not yet ready for commercialization

On October 12, 2022, Mr. Michael C. Barbecho, PARSU IP and Technology Officer presiding the meeting with technology generators discussing the following agenda of the meeting: a) Result of the Preliminary Formality Examination (PFE) of the DOST V Fairness Opinion Board (FOB) for the twelve (12) ParSU Intellectual Properties (IPs) held last September 28, 2022 at DOST V-Regional Office; and b) Requirements and Guidelines for the Technology Innovation for Commercialization (TECHNICOM) 3rd Wave of Call for Proposals.

Mr. Michael C. Barbecho, PARSU IP and Technology Officer presiding the meeting with technology generators on October 12, 2022.

The Regional Agri-Aqua Innovation System Enhancement (RAISE) Bicol Program in collaboration with Bicol Consortium for Agriculture, Aquatic and Natural Resources Research and Development (BCAARRD) and Bicol University Center for Technology Commercialization and Enterprise Development (BUCTCED) organized the Regional Agri-Aqua Technology Pitching Competition.T his activity specifically aims to: a) intensify the promotion and commercialization of technologies of the innovators and entrepreneurs within Bicol Region; b) identify and intensify linkages with various agencies and technology takers/adaptors for technology transfer and commercialization; and c) promote technologies developed under the agriculture, aquatic, and natural resources sector.

The invited contestants were innovators and entrepreneurs can be an individual or group of individuals from the SUCs, CMIs and RDIs under BCAARRD.

Mr Jose S. Fernandez, a faculty from College of Engineering and Technology, submitted two entries for this Technology Pitching Competition with the following title:

1. Molding Machine for Coconut Leaf (Ibos) Suman Wrapper
2. Portable Rice Cake-Making Device

Mr. Jose S. Fernandez presenting his first entry "Coconut Leaf Molding Machine" for the Regional Agri-Aqua TechPitch Competition.

Mr. Jose S. Fernandez presenting his second entry "3-in1 Rica Cake Making Machine" for the Regional Agri-Aqua TechPitch Competition.

- **Partnerships established**

Partner Institutions and Collaborating Partners Supported

The Regional Agri-Aqua Innovation System Enhancement (RAISE) Program with project entitled Developing the Intellectual Property and Technology Business Management (IP-TBM) in Partido State University (ParSU) through Regional Agri-Aqua Innovation System Enhancement (RAISE) Program in Bicol is non-research program funded by the Department of Science and Technology- Philippine Council for Agriculture, Aquatic and Natural Resources Research and Development (DOST-PCAARRD) with its cooperating agencies: Camarines Norte State College (CNSC); Camarines Sur Polytechnic Colleges (CSPC); Sorsogon State University (SorSU); Catanduanes State University (CatSU); Central Bicol State University for Agriculture (CBSUA); Bicol University (BU); and Dr. Emilio B. Espinosa, Sr. Memorial State College of Agriculture and Technology (DEBESMSCAT). The main objective of the program is to strengthen the capacities of Intellectual Property and Technology Business Management (IP-TBM) of ParSU.

Project Sites

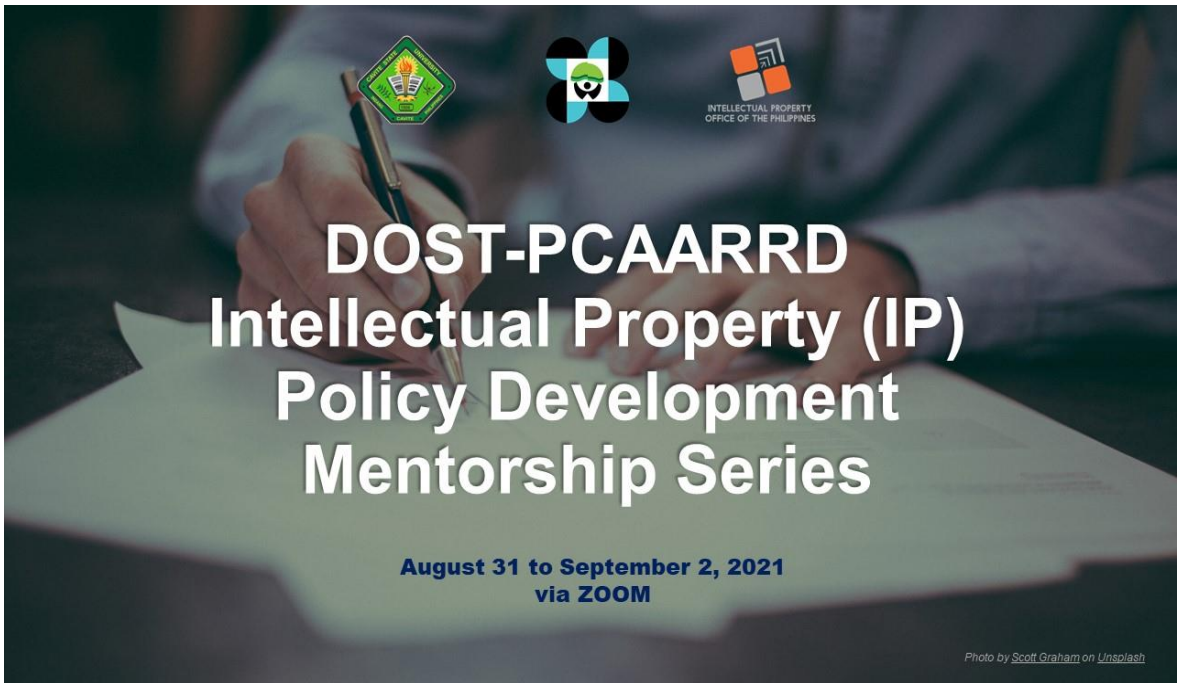

The Regional Agri-Aqua Innovation System Enhancement (RAISE) Program has project sites of implementation located at Bicol University College of Agriculture and Forestry/ Morera/ Guinobatan/ 2nd District /Albay/ Region V; ACAD 3 / CoE Room No. 8 Ground Floor Academic Building, F. Pimentel Ave., Barangay II Daet, Camarines Norte; IP-TBM Office, Center for Research and Development, Nabua, Camarines Sur; Office of Research, Development, and Extension Services, Magsaysay St., Sorsogon City, Sorsogon; Catanduanes State University, Calatagan, Virac, Catanduanes 4800; San Jose, Pili, Camarines Sur; San Juan Evangelista St., Goa, Camarines Sur; and Cabitan, Mandaon, Masbate.

- **Policies Developed**

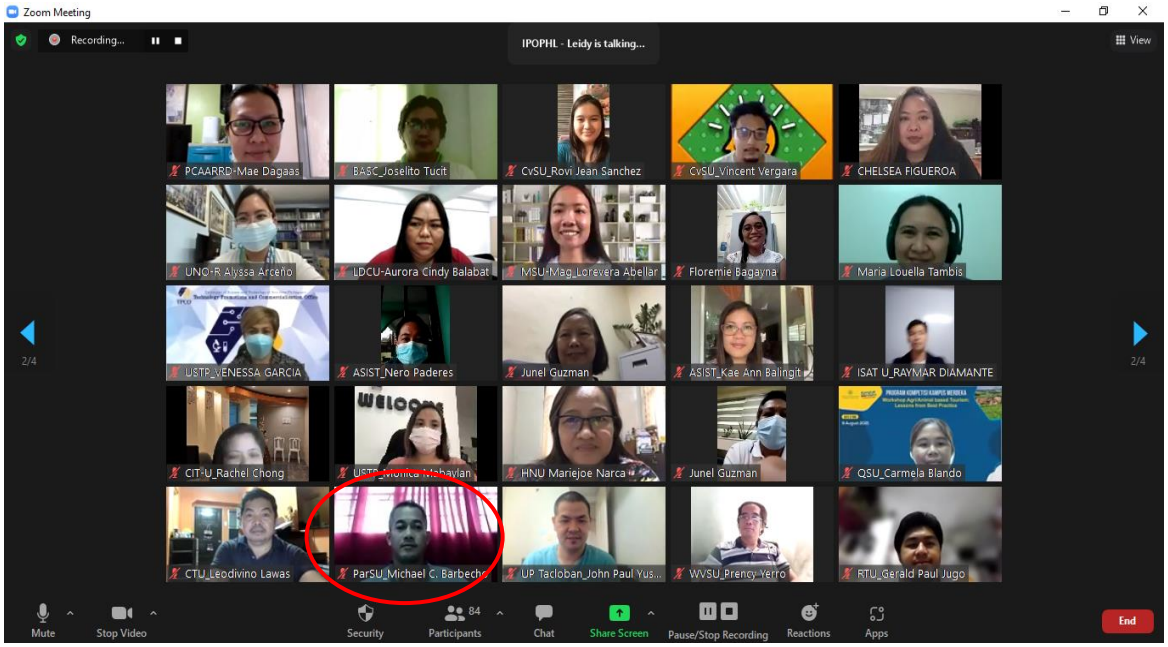

Development of ParSU Intellectual Property (IP) Policy

The development of ParSU Intellectual Property was started last August 31, 2021 to September 2, 2021. It was in these months were the ParSU sent two (2) participants namely Mr. Michael C. Barbecho, the ParSU IP and Technology Officer, and Engr. Kier P. Gasga Pfaculty and researcher in a 3-Day Webinar on Intellectual Property (IP) Policy Development Mentorship Series sponsored by DOST-PCAARRD. After the training, a tentative version of Intellectual Property (IP) Policy for Partido State University was crafted on September 3, 2021 by Mr. Michael C. Barbecho. The tentative draft of PARSU IP Policy

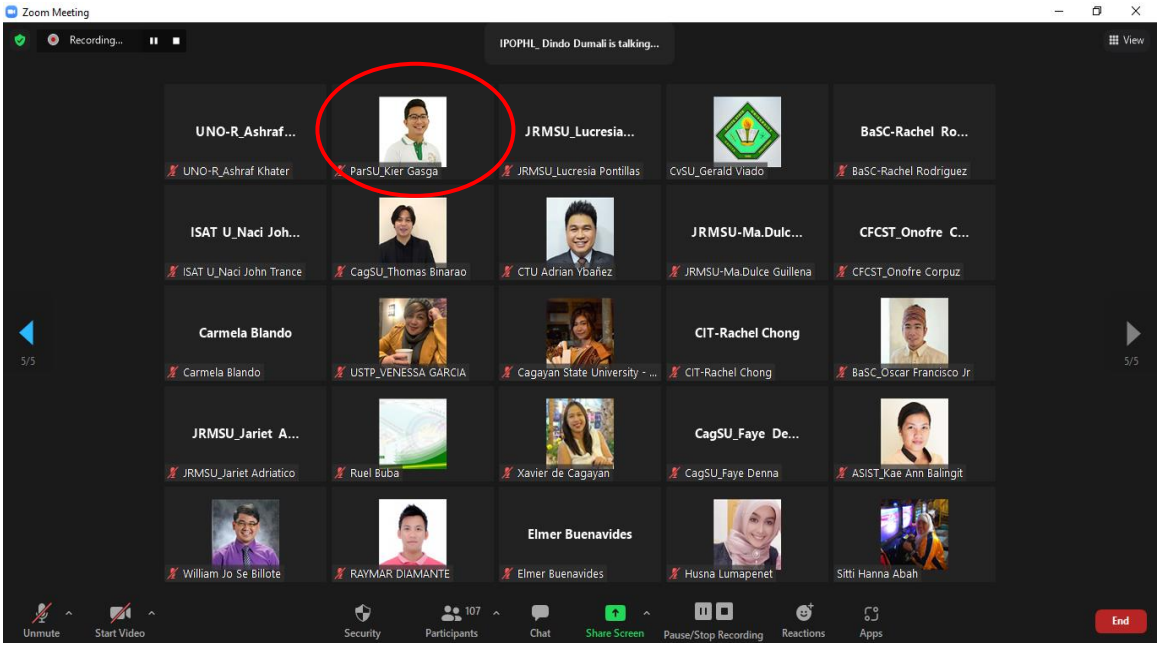

was presented by Mr. Michael C. Barbecho for critiquing of the University Research, Extension, and Knowledge Management (UREKM) personnel headed by Prof. Patricia M. Candelaria, the Vice President for REKM, Ms. Luisa M. Lanciso, the Research and Development Director, and other staffs of the University on September 9, 2021. The first revision was made immediately after the critiquing. On September 17, 2021, the revised draft of IP Policy was presented for critiquing of the facilitators/resource speakers from IPOPHL and DOST-PCAARRD, the presentation was headed by Michael C. Barbecho. The final version of the IP Policy was drafted incorporating the comments, recommendations, and inputs of the facilitators/resource speakers from the Intellectual Property Office of the Philippines (IPOPHL) on September 19, 2021. On November 11, 2021, the final version of the IP Policy was presented for final critiquing of UREKM personnel and Mr. Charlie Balagtas, the University Planning Officer. The polished version of the IP Policy was drafted incorporating further comments, recommendations, and inputs from UREKM personnel on November 15, 2021. On January 10, 2022, the IP Policy was submitted to UREKM office and recommended for final editing and on February 24, 2022, the IP Policy was presented by Mr. Michael C. Barbecho to the UREKM Committee Meeting and was endorsed for presentation in the UREKM Council Meeting. On March 7, 2022, the IP Policy was presented by Mr. Michael C. Barbecho to the UREKM Council Meeting and was approved and endorsed for presentation in the Board of Regents (BOR). Finally, the IP Policy was presented by Dr. Raul G. Bradecina, ParSU President and was approved by the BOR with Resolution No. 46 s. 2022 during the 85th Regular Board of Regents Meeting on July 21, 2022

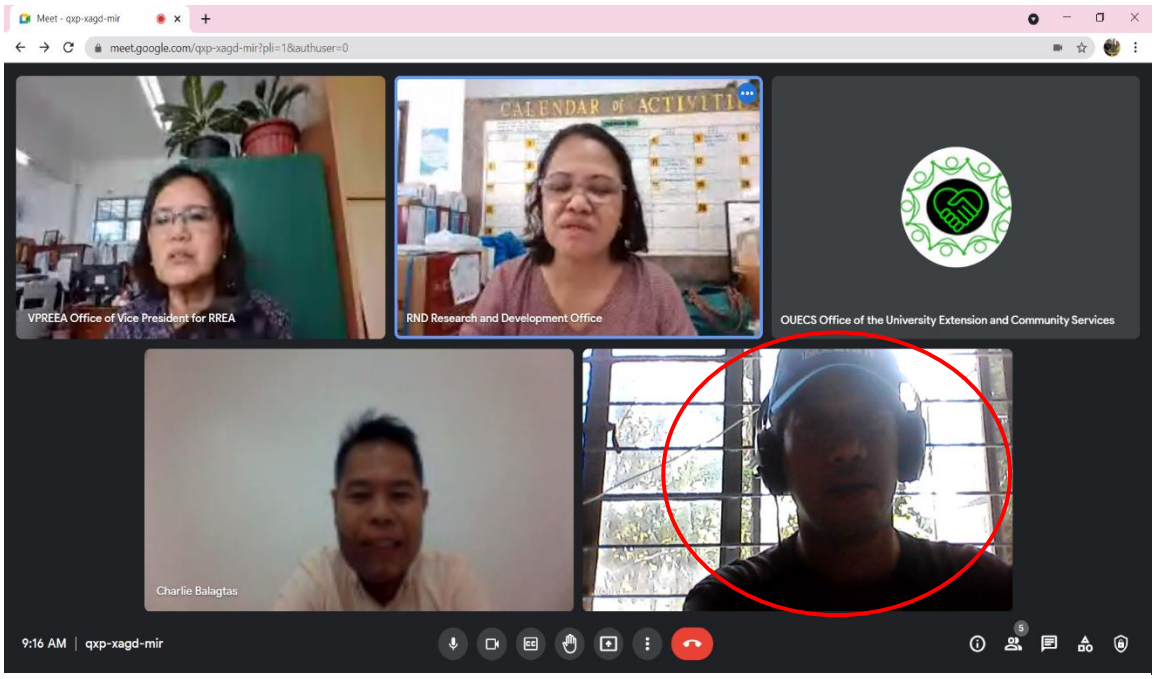

The 3-Day Webinar on Intellectual Property (IP) Policy Development Mentorship Series sponsored by DOST-PCAARRD.

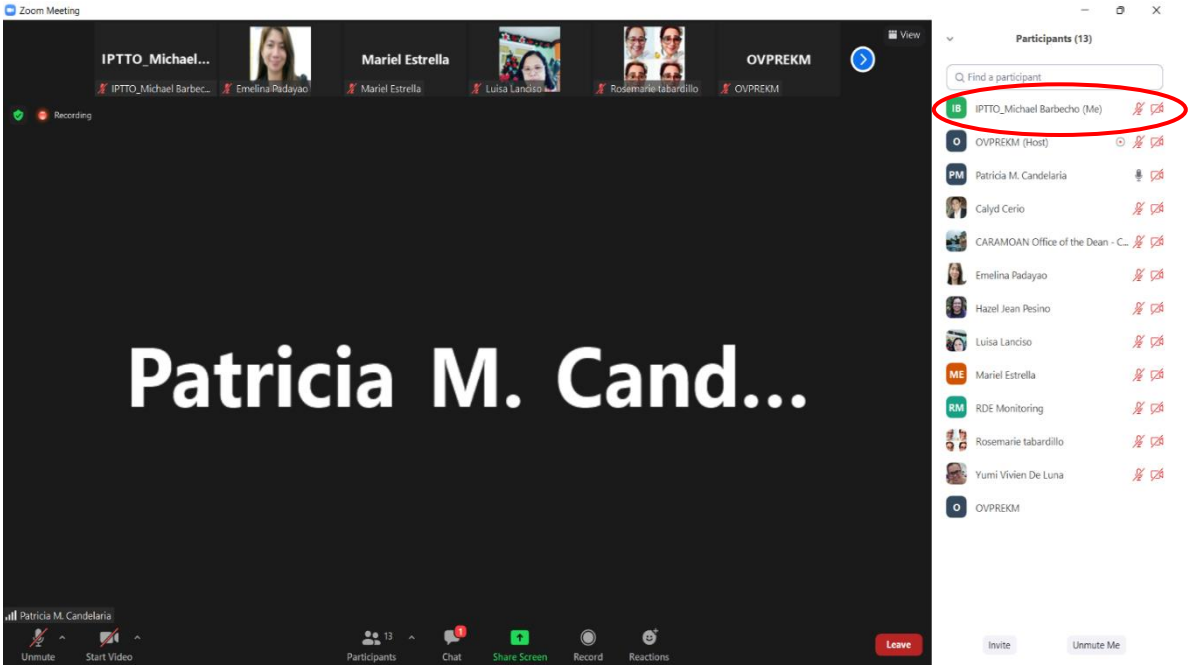

Mr. Michael C. Barbecho, the ParSU IP and Technology Transfer Officer attended the webinar on Intellectual Property (IP) Policy Development Mentorship Series via Zoom Meeting

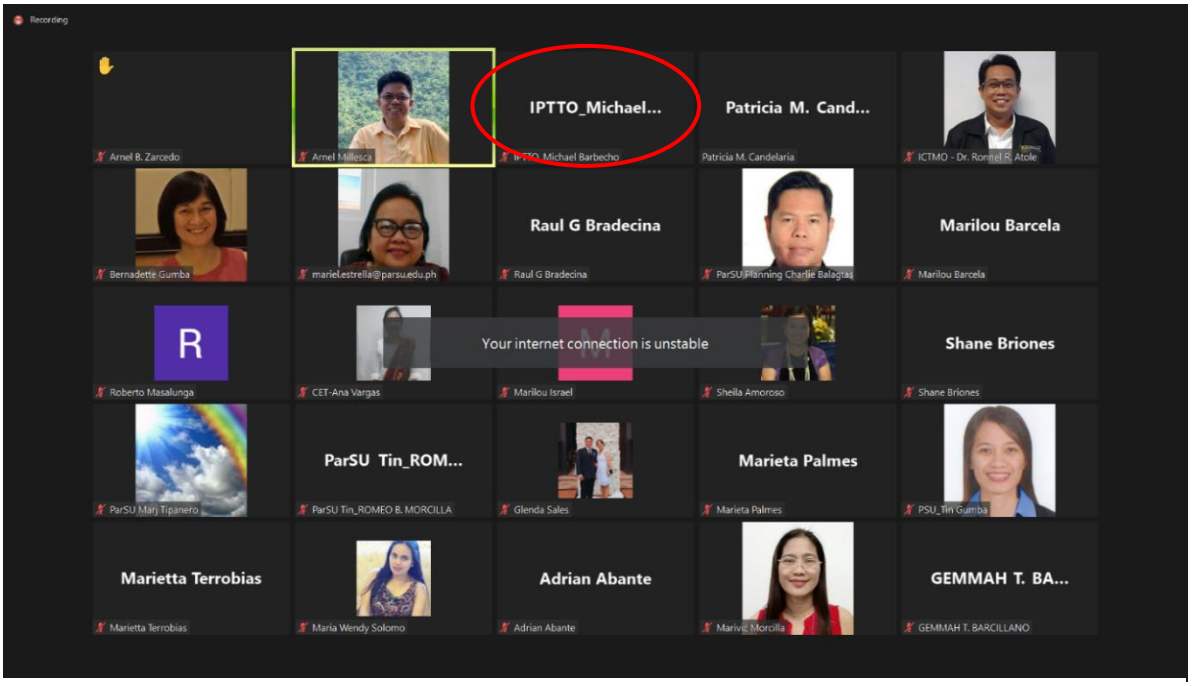

Engr. Kier P. Gasga, ParSU faculty and researcher attended the webinar on Intellectual Property (IP) Policy Development Mentorship Series via Zoom Meeting

Mr. Michael C. Barbecho presented the final version of IP Policy for critiquing with the VPREKM, R&D Director, Extension Director, and Planning Director via Google Meeting

Mr. Michael C. Barbecho presented the final version of IP Policy for critiquing in the UREKM Committee Meeting via Zoom Meeting

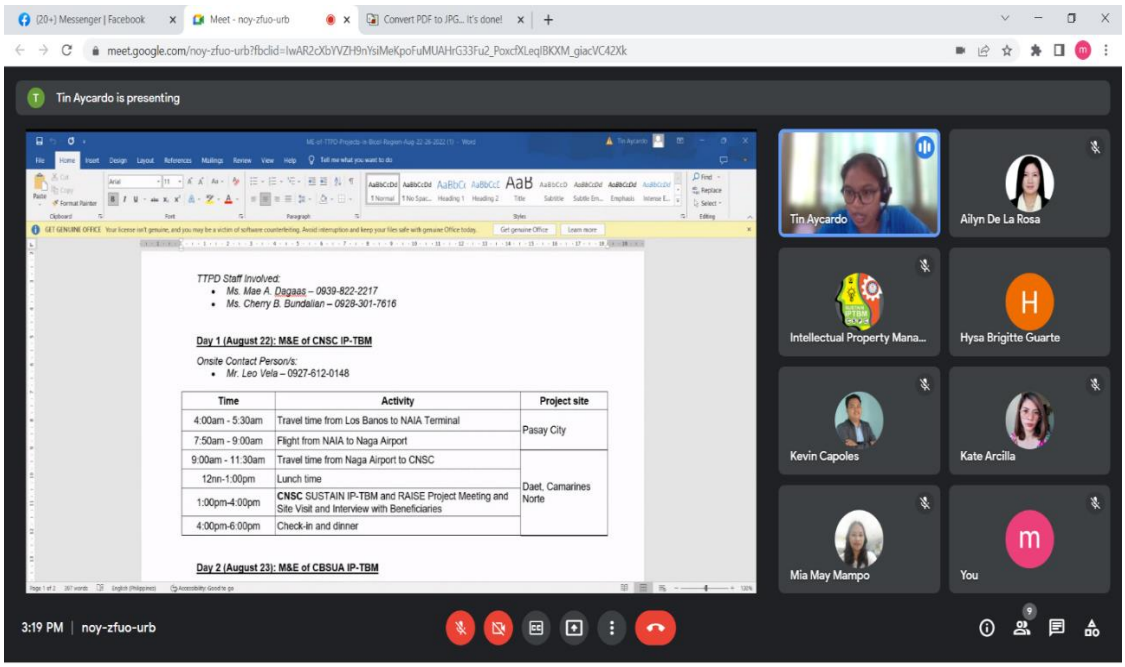

Mr. Michael C. Barbecho presented the proposed PARSU Intellectual Property (IP) Policy during the 1st University UREKM Council Meeting via Zoom Meeting

- **Implementing Mechanisms Adopted**

Planning Meeting/Inception Meeting

On August 2, 2022, the RAISE Bicol team conducted online meeting via Google Meet regarding the upcoming Monitoring and Evaluation of Technology Transfer and Promotion Division (TTPD) staff from the DOST-PCAARRD scheduled last August 22 and 26, 2022. The meeting was initiated by Engr. Christine P. Aycardo, the focal person in the Region V. The meeting was participated by Science Research Assistants (SRAs) from Bicol University (BU), Camarines Norte State College (CNSC), Camarines Sur Polytechnic Colleges (CSPC, Sorsogon State University (SorSU), Catanduanes State University (CatSU), Central Bicol State University for Agriculture (CBSUA), Partido State University, and Dr. Emilio B. Espinosa, Sr. Memorial State College of Agriculture and Technology (DEBESMSCAT). During the meeting the following agenda were tackled: (1) the schedule and date of the activity; (2) the itinerary of the TPPD staff; (3) the persons involve in the activity; (4) foods, accommodation, service vehicles, and presentations; and (5) the documents to be prepared during the activity.

Engr. Christine P. Aycardo with RAISE Bicol Project SRAs from the different SUCs during the online Google meeting on the scheduled Monitoring and Evaluation of Technology Transfer and Promotion Division (TTPD) projects in Bicol Region

Mobilization Activities

After the conduct of meeting on Monitoring and Evaluation of Technology Transfer and Promotion Division (TTPD) projects in Bicol, an official letter about the activity was sent by TPPD to all State Universities and Colleges (SUCs) concerned in the Bicol Region on August 8, 2022. Upon the receipt of the communication letter, Mr. Michael C. Barbecho, the Project Staff Level 3 of RAISE IP-TBM in ParsU initiated a face to face meeting about the activity at Research and Development Office. The meeting was participated by Prof. Patricia M. Candelaria, the Vice President for Research, Extension, and Knowledge Management (VPREKM); Ms. Luisa M. Lanciso, the Research and Development Director; Engr. Kier P. Gasga, faculty researcher and TPMS participant; Ms. Mary France De Vergara, faculty researcher, and TCMS participant; and Engr Joel P. Sadol, Dean of PARSU Salogon Campus, TPMS and TCMS participant. During the meeting, Mr. Michael C. Barbecho discussed the following agenda: (1) the schedule and date of the activity; (2) the itinerary of the TPPD staff; and (3) the persons involve in the activity, foods and accommodation, and the service vehicles to be used during the activity.

Mr. Michael C. Barbecho with Prof. Patricia M. Candelaria, Ms. Luisa M. Lanciso, Engr. Kier P. Gasga, and Ms. Mary France De Vergara during the meeting on the Monitoring and Evaluation activity of TTPD projects in Bicol held at the PARSU R&D Office.

Monitoring and Evaluation Activities

On August 24, 2022, Ms. Cherry B. Bundalian and Ms. Mae A. Dagaas, staff from Technology Transfer and Promotion Division (TTPD) of DOST-PCAARRD conducted the Monitoring and Evaluation (M&E) of RAISE-IPTBM project in Partido State University. The activity was conducted to monitor the progress and accomplishments during the 1st to 3rd quarter of Year 1 implementation of the project. The two staff from TTPD were assisted by RAISE Bicol project staff headed by Engr. Christoper O. Pacardo, and his members Engr. Christine P. Aycardo, Mr. Jomar E. Tuazon, Mr. Jeremiah G. Magallanes, Mr. Luis Fidel B. Rodriguez, and Ms. Rostlyn B. Octavo. The activity was started at 9:00 in the morning at the ParSU College of Education (COED) Modern Classroom, 2nd Floor COED Building. The M&E activity was participated by Dr. Raul G. Bradecina, President of ParSU; Prof. Patricia M. Candelaria, the Vice President for Research, Extension, and Knowledge Management (VPREKM); Ms. Luisa M. Lanciso, Research and Development Director; Mr. Michael C. Barbecho, ParSU IP and Technology Officer and RAISE IP-TBM Project Staff Level 3; Engr. Kier P. Gasga, faculty researcher and TPMS participant; Ms. Mary France De Vergara, faculty researcher, and TCMS participant; and Engr. Joel P. Sadol, Dean of PARSU Salogon Campus, TPMS and TCMS participant; Personnel from Accounting department; and staff from R&D office. Said activity was started through a short program which includes the message given by Dr. Raul G. Bradecina; introduction about the RAISE Program discussed by Engr. Christoper O. Pacardo, the Program Leader of RAISE Bicol; discussion regarding financial aspects of the project was given by Ms. Mae Dagaas; presentation conducted by Mr. Michael C. Barbecho on RAISE IP-TBM ParSU accomplishment for Year 1 1st to 3rd Quarter; questions and answers regarding the project; awarding of certificates of appreciation to the monitoring staff; and lastly the closing remarks given by Prof. Patricia M. Candelaria.

Dr. Raul G. Bradecina delivering his message during the M&E activity at ParSU.

Engr. Christoper O. Pacardo, RAISE Bicol Program Leader discussing about RAISE project.

Mr. Michael C. Barbecho presenting accomplishment for Year 1 1st to 3rd quarter implementation of RAISE IP-TBM in ParSU

Awarding of certificates of appreciation to the TTPD M&E monitoring staff for the accomplishment for Year 1 1st to 3rd quarter implementation of RAISE IP-TBM in ParSU

Prof. Patricia M. Candelaria delivering her closing remarks during the M&E Activity

- **Problems Encountered**

During the 1st and 2nd quarter of the implementation of the project, several problems were encountered. Some of the major problems and concerns encountered are: Time constraints of the personnel involved in the project specifically the project leader/project staff level 3 was academically loaded during the 1st and 2nd quarter of the implementation of the project, affecting the close monitoring of the project; the Project Leader/Project Staff Level 3 was overloaded with work due to the absence of Science Research Assistant (SRA) resulting to multitasking during the implementation of the project**;** some of the activities planned such as re-echo trainings, IP filings, and purchase of supplies and equipment were not carried-out on specific schedule due to delayed fund download; and COVID-19 restrictions prevents the personnel involved in this project from reporting for onsite work to access better internet connection, as a result some of the important meetings and updates regarding the project were missed out.

PART III. ANALYSIS/CONCLUSION/RECOMMENDATIONS

- **Analysis of Accomplishments**

From the above narrative report discussed, during the 1st to 3rd quarter of implementation of the Intellectual Property and Technology Business Management (IP-TBM) in Partido State University (ParSU) through Regional Agri-Aqua Innovation System Enhancement (RAISE) Program in Bicol, the following analysis are given:

1. Partido State University IP Unit through the IP-TBM project was able to successfully conduct four (4) prior arts search (PAS) reports for the research proposals of faculty from year 2019 to 2022. One (1) PAS report needs to be conducted hit the target for this expected output. The target output was not able to hit since mostly of the faculty proposal focused on basic research;

2. For the patent and IP filings, ParSU IP Unit through the IP-TBM project was able to file five (5) IP application in Agri-aqua technology online at the Intellectual property Office of the Philippines. The target output was successfully accomplished despite delay in the fund download;

3. ParSU through IP-TBM also developed and established linkages with collaborative partners and other cooperating institutions and agencies;

4. A comprehensive IP policy for ParSU was developed and approved by ParSU community and the Board of Regents (BOR). With this accomplishment, the IP-TBM personnel will be able to manage the project effectively in accordance with the existing laws on IP; and

5. The previously conducted monitoring and evaluation activity provides clear insight and information on the effective management of a government project, specifically the RAISE IP-TBM.

- **Lessons Learned**

During the 1st up to 3rd quarter of RAISE IP-TBM implementation in ParSU, several lessons were learned:

1. Implementing government funded projects needs focus on monitoring of the progress and accomplishments; and

2. The expected outputs and deliverables of the project could be successfully delivered by collaborative efforts among the members of the implementing agency.

- **Recommendations/Conclusions**

From the analysis of accomplishment discussed, the following recommendation are hereby given:

1. Encourage faculty researchers specifically those aligned in agri-aqua area to conduct research with patentable technologies;

2. ParSU should maintain the number of IP filings in agri-aqua technology;

3. ParSU should maintain linkages with collaborative partners and other cooperating institutions and agencies;

4. All research activities of ParSU should be guided by the approved IP policy;

5. Comply with the comments, suggestions, and recommendations during the monitoring and evaluation activity of the project; and

6. For the future plan, ParSU will sustain the IP-TBM, improve its office facilities, send its personnel to capacity building trainings, encourage faculty researchers to do patentable researches, increase IP filings, and engage in commercialization activities.
