Republic of the Philippines
PARTIDO STATE UNIVERSITY
Camarines Sur

September 21, 2022

DR. RAUL G. BRADECINA, PhD
SUC President III
Partido State University

Dear Sir,

The Partido State University (PSU) is among the Higher Education Institutions (HEIs) in the country involved in the **"Phytochemical Characterization of Macroalgae for Food and High value Products" (PhycoPRO)** project as a collaborator under the supervision of Dr. Michael A. Clores. The collaborative research project is financed by the Leading Advancement of Knowledge in Agriculture and Sciences (LAKAS) Program of the Commission on Higher Education (CHED).

By providing crucial information through a phytochemical characterization of seaweeds, the project aims to improve the position of the seaweed business in the Philippines by identifying species with higher economic potential and areas where their growth will be most robust.

Among **the initial activity of the project in a site visit and biodiversity sampling in some islands in the Caramoan Island Group (CIG)** with experts and personnel from the University of the Philippines Marine Science Institute (UP MSI) and the Sorsogon State University (SorSU) on October 3-6, 2022.

We respectfully send our proposed research activity proposal for your approval to finalize the preparations for the above activities. The proposal highlights the activity's rationale, objectives, and expected outputs and the much-needed budget requirements with item-particulars also specified. We would like to note that **the ACTIVITY proposed is *NOT* a new research proposal as it is among the activities attached to the externally funded CHED-LAKAS program in that our humble institution is a collaborating HEI. Your approval is formally requested since the budget for the activity shall be covered by ParSU-Caramoan as counterpart of the University.**

We are hoping for your immediate and favorable response on this matter. Thank you very much.

Sincerely,

MICHAEL A. CLORES, PhD
Coordinator, PhycoPRO CHED LAKAS Project, and
Campus Dean, ParSU-Caramoan Campus

PARTIDO STATE UNIVERSITY

RESEARCH ACTIVITY PROPOSAL

Title: ***Initial Biodiversity Sampling for the Phytochemical Characterization of Macroalgae for Food and High-Value Products (PhycoPRO) with the Marine Scientists from UP-MSI***

Proponent and Implementing Department: Assoc. Prof. Dr. Michael A. Clores, Ph.D. | Caramoan Campus

Planned Date of Implementation: October 3-6, 2022

Planned Venue: Caramoan Campus, Caramoan Island Group (for field work)

Participants:

1. Dr. Michael Y. Roleda (UP MSI)
2. Dr. Irene B. Rodriguez (UP MSI)
3. Dr. Michael A. Clores (ParSU- Caramoan)
4. Dr. Richard Dumilag (SorSU)
5. Ms. Lourie Ann R. Hinaloc (UP MSI)
6. Mr. Bienson Ceasar V. Narvarte (UP MSI)
7. Mr. Emmanuel M. Mendoza (UP MSI)
8. Ms. Dolly C. Manic (UP MSI)
9. Mr. Ivan Michael B. Gabriel (UP MSI)
10. Mx. Joanne R. Constantino (UP MSI)
11. Mr. Eljenmer I. Sindo (ParSU- Caramoan)
12. Ms. Elluna J. Bigcas (ParSU- Caramoan)
13. Mr. Joel Ballasta (ParSU- Sangay)
14. Mr. Raul Burce (ParSU- Sangay)
15. Mr. Jomari Dig SorSU)
16. Mr. John Peter Himor (SorSU)
17. *Possible addition of a few people* (5-7)
    1. Banca driver and assistant (Day 2 and 3)
    2. Coaster Bus Driver (Day 1, 3)
    3. Dr. Raul Bradecina, Ph.D., PSU President (Day 1- Courtesy Call)
    4. Representatives from the Municipality of Caramoan (Day 1- Courtesy Call)

Rationale: The Partido State University (PSU) is among the Higher Education Institutions (HEIs) in the country involved in the PhycoPRO project as a collaborator under the supervision of Dr. Michael A. Clores, Ph.D. The project is funded by the Commission on Higher Education (CHED) through its Leading Advancement of Knowledge in Agriculture and Sciences (LAKAS) Program. The project is envisioned to enhance the status of the seaweed industry in the Philippines by providing critical knowledge through a comprehensive phytochemical characterization of seaweeds to identify species with higher economic potential and pinpoint locations where their growth will be maximal. Specifically,

1. The proposed research activity will allow for identifying key sites in the Caramoan Island Group (CIG) for seaweed sampling and collection.
2. These seaweed samples will be subjected to various phytochemical tests for possible high-value compounds of great utility in product development.
3. It will also allow for the identification of seaweed species that are more profitable for a specific location, guide seaweed farmers on what species they will prioritize for farming, and improve mariculture methods.

4. The sampling and the conduct thereof will also facilitate knowledge and skill transfer from experts to the parties involved in the research activity.

Objectives:

1. Identify potential sites in the Caramoan Island Group (CIG) for initial seaweed biodiversity sampling.
2. Determine and identify seaweed samples of maximal growth in the site.
3. Strengthen research collaboration and linkages of the Partido State University with other institutions in the country.
4. Establish involvement between the involved research institutions and local communities for socio-economic purposes.
5. Obtain, collect, and preserve seaweed samples at the mentioned above site.
6. Facilitate knowledge and skill transfer between the experts, research assistants, faculty, and interested parties on site selection, seaweed collection, identification, and preservation.

Expected Output:

1. Identification of sites in the CIG for seaweed collection.
2. Collection of seaweed samples from the selected sites.
3. Conduct initial seaweed biodiversity sampling.
4. Facilitation of knowledge and skills transfer from the experts to the other parties involved in the research activity.

Funding Requirement/Estimated Budget: **PHP 87,000.00**

Item	Quantity	Unit Cost (PHP)	Total Cost (PHP)
Food (3 Days)			
Breakfast	23 x 3 = 69	250	17,250.00
Morning snack	23 x 3 = 69	150	10,350.00
Lunch	23 x 3 = 69	250	17,250.00
Afternoon snack	23 x 3 = 69	150	10,350.00
Dinner	23 x 3 = 69	250	17,250.00
Supplies and Materials			
Publicity Material (promotion tarpaulin)	3	1500	4,500
Drinking water	5 liters	50	250
Personal hygiene (soap, shampoo, others)	18	100	1,800
Rental Expenses			
Boat Rentals (2 days, 1 night)	2	4000	8,000
		Total Cost:	**87,000.00**
