CONTRACT OF SERVICE AGREEMENT

ON

PHYTOCHEMICAL CHARACTERIZATION OF MACROALGAE FOR FOOD AND HIGH VALUE PRODUCTS (PhycoPRO)

KNOW ALL MEN BY THESE PRESENTS:

This Agreement is made and entered into by and between:

The **PARTIDO STATE UNIVERSITY,** hereinafter referred to as **"ParSU"**, with principal office at San Juan Bautista St., Goa, Camarines Sur represented herein by its SUC President III, **DR. RAUL G. BRADECINA**

And

MR. ELJENMER L. SINDO of Baganga, Davao Oriental herein designated as the **UNIVERSITY RESEARCH ASSOCIATE I.**

RAUL G. BRADECINA, PhD
SUC President III

WHEREAS, the abovementioned special collaborative project for research and Higher Education Institution (HEI) capacity building known as "Leading the Advancement of Knowledge in Agriculture and Sciences (LAKAS) Program" was funded by the Philippine Government's General Appropriations Act through Commission on Higher Education (CHED).

NOW THEREFORE, for and in consideration of the foregoing premises, the Parties hereby agree to the following terms and conditions:

I. Purpose

This agreement seeks to implement the project title: **"PHYTOCHEMICAL CHARACTERIZATION OF MACROALGAE FOR FOOD AND HIGH VALUE PRODUCTS (PhycoPRO)"**

II. Objectives

General

The goal of the project is to contribute towards poverty alleviation initiatives by providing additional or alternative sources of income for fishing families in coastal communities. Diversified income sources from the introduction of seaweed farming and trading will reduce the pressure on fisheries, which may lead to the replenishment of standing stocks of critical fish species.

ELJENMER L. SINDO
ParSU -PhycoPRO URA I

Specific Objectives:

1. To perform systematic phytochemical characterization (including lipid, fatty acid, amino acid, and total phenolic content; proximal analysis; B-carotene; fucoxanthin, fucosterol and iodine content) of at least 50 seaweed species from the Philippines;
2. To assess the potential anti-cancer activity of extracts and purified compounds from seaweeds and associated epiphytes; and
3. To conduct training workshops and seminars on seaweed farming techniques, seaweed collection and preservation methods, and seaweed propagation

III. Expected Outputs

The PhycoPRO project will contribute to knowledge generation and economic improvement in various aspects:

1. The handbook of seaweeds describing their phytochemical properties and potential commercial applications.
2. The standard methods that will be optimized and validated for the determination of various phytochemical properties of seaweeds;
3. The project will focus on the phytochemical characterization of at least 50 seaweed species from the country and this may lead to the identification of bioactive compounds with potential medical applications;
4. The PhycoPRO project will support the establishment of two core facilities at the UP-Marine Science Institute: the ICPMS facility and the Seaweed Chemistry laboratory, both of which will support not just the PhycoPRO project but also other related projects at the UP-MSI and collaborating institutions;
5. The partner HEIs will have a separate budget to support the procurement of equipment and materials that will kickstart research that will be led by faculty members of the respective institutions in collaboration with the proponents of the PhycoPRO project initially but will eventually lead to research projects that will be implemented by researchers/faculty members in the collaborating HEIs.

IV. Duration of the Project

The project shall be implemented for a period of two (2) years covering the period July 1, 2022 to June 30, 2024.

RAUL G. BRADECINA, PhD
SUC President III

V. TERMS OF REFERENCE

Being designated as the University Research Associate I for a period of six (6) months under this Contract of Service Agreements from 1 July 2022 to 31 December 2023 subject to availability of the CHED Fund, you will be receiving the sum amounting to **Thirty-Three Thousand One Hundred Thirty pesos (P33,130.00) monthly** and perform the following functions:

- Assist in the documentation and photo-documentation of samples;
- Assist the proponent in preparing the component technical and financial reports;
- Participate in all meetings called by the proponent;
- Participate in the orientation/training of the research assistants on selected survey methods and sampling techniques;
- Assist in obtaining the required collection and research permits;
- Assist in determining the exact sites to be surveyed prior to field investigation and specific; location coordinates, access routes and directions to the should be well understood before entering the field;
- Assist in contacting all appropriate authorities prior to the commencement of survey activities;
- Assist in ensuring that all field equipment needed to complete the survey are assembled;
- Secure and keep safe the collected data;
- Assist in preparing the final research project report;
- Assist in the drafting and finalization of the research paper manuscript and publication;
- Display good work ethics and resourcefulness;
- Conform with the administrative and procedures of the office;
- Display positive leadership;
- Perform other related functions.

ELJENMER L. SINDO
ParSU -PhycoPRO URA I

The University Research Associate I can claim travel expenses subject to the availability of funds from the CHED Fund.

VI Ownership and Utilization of Information, Technologies, Inventions, and Improvements

All equipment purchased for the project and funded by the CHED shall be reported to CHED. The CHED reserves the right to ownership over the purchased equipment and facilities upon submission of the required documents for the transfer of ownership as may be determined by CHED.

The equipment may be shared with other ongoing research programs/projects subject to the guidelines drawn up by the CHED for this purpose. The Property Officer of the CHED AFMS-GSD shall keep an official record of all equipment purchased. The University Project Leader shall primarily be responsible for the proper utilization and maintenance of the equipment for the project.

The employees of the Universities are required to assign IP rights to their respective institutions, in accordance with the applicable policies of each institution. Considering that the budget for the approved collaborative research project under the LAKAS Program shall be funded by the Philippine Government, through the CHED, the provisions of RA No. 8293, the Intellectual Property Code of the Philippines, as amended and RA No. 10055, the Philippine Technology Transfer Act of 2009, shall govern, where applicable, on the inventorship and ownership of intellectual properties (IP) and intellectual property rights (IPR) arising from and/or as a result of the implementation of the approved collaborative research project.

IN WITNESS WHEREOF, the parties hereto have hereunto set their hands, this OCT 18 2022 2022 at GOA, CAMARINES SUR.
