TERMS OF REFERENCE

Project Title: CATCHFISH: A Collaborative ICT-Based Tools for an Optimize Fishing Repository and Catch Efficiency Towards a Sustainable Use and Development

Study 1: **Implementation of RDBMS in Establishing a Digital Repository for Community Fisheries Information and Regional Knowledge**
Time Frame: January – June 2024

Study 2: **Design and Development of CATCHFISH Front-end Incorporating the Community Participation Modules**
Time Frame: April 2024 – September 2024

Study 3: **Empowering Communities through CATCHFISH Evaluation, Training and Technology Transfer**
Time Frame: October 2024 December 2024

Proponents:
Project Leader: **Hazel Jean C. Pesino**, MIT
Study 1: **Nicolas A. Pura** – Study Leader
Joni Neil B. Capucao, DIT – Member-Database Developer
Charles P. Jamer - *Member-Interface Designer*
Study 2: **Salvador V. Briones II** – Study Leader
Jollan S. Sabaria - *Co-Study Leader 2/Programmer*
Jomari S. Isorena - *Programmer*
Charles Jasthyn Dela Cueva - *Programmer*
Michael B. Amata - *Programmer*
Study 3: **Shane C. Briones** – Study Leader
Marieta P. Palmes - Co- Study Leader 3/ Trainor/Lecturer
Michael H. Indico - Trainor/Lecturer
Francia Theresa L. Oliver - Trainor/Lecturer
Froiland B. Peñalosa - Trainor/Lecturer
Luisa M. Lanciso - Trainor/Lecturer
Hazel Jean Pesino - Trainor/Lecturer

Implementing Agency: Partido State University, CAS-Institute of Information Technology
Cooperating Agency: World Wildlife Fund, Philippines
Project Site: Municipalities along Lagonoy Gulf

Project Leader

1. Lead in defining software development project plans and schedule
2. Spearhead the definition, development, and documentation of **CATCHFISH** system requirements, objectives, deliverables, and specifications
3. Coordinate project tasks with team members.
4. Track and monitor the progress of tasks.
5. Coordinate with WWF and other stakeholders.
6. Coordinate with PSU concerned offices for the implementation, monitoring, and submission of required reports.
7. Perform other tasks relative to the project implementation.

Study 1: **Implementation of RDBMS in Establishing a Digital Repository for Community Fisheries Information and Regional Knowledge**
Time Frame: January 2023 – June 2024

Study Leader:

1. Assist in defining software development project plans, including scoping, scheduling, and implementation.
2. Lead the team in designing, developing, and implementing database systems based on the requirements of the **CATCHFISH** Digital **Repository.**
3. Lead the development of a database as a Digital Repository of Fisheries data and information.
4. Develop security procedures to protect databases from unauthorized usage.
5. Administer the conduct of evaluation and unit testing **CATCHFISH** Information System.
6. Prepare required reports/documentation.
7. Assist the project leader in the related tasks.

Member-Database Developer:

1. Assist in defining software development project plans, including scoping, scheduling, and implementation.
2. Lead the team in designing, developing, and implementing database systems based on the requirements of the **CATCHFISH** Digital **Repository.**
3. Prepare design specifications and functional documentation for assigned database projects.
4. Develop databases, tables, and dictionaries.
5. Assist in the conduct of evaluation and unit testing **CATCHFISH** Information System.
6. Prepare required reports/documentation.
7. Assist the study leader in the related tasks.

As a study co-leader, you are entitled to an honorarium of six thousand pesos (6,000.00) per month, subject to existing relevant rules and regulations.

Member-Interface Designer

1. Assist the team in designing, developing, and implementing database systems based on the requirements of the **CATCHFISH** Digital **Repository.**
2. Participate in database design and architecture to support application development projects.
3. Assist in the preparation of design specifications and functional documentation.
4. Develop a prototype of database interfaces.
5. Assist in the conduct of evaluation and unit testing **CATCHFISH** Information System.
6. Prepare required reports/documentation.
7. Assist the study leader in the related tasks.

Study 2: **Design and Development of CATCHFISH Front-end Incorporating the Community Participation Modules**
Time Frame: April 2024 – September 2024

Study Leader:

1. Assist in defining software development project plans, including scoping, scheduling, and implementation.
2. Assist in the definition, development, and documentation of **CATCHFISH** system requirements, objectives, deliverables, and specifications on a module-by-module basis in collaboration with team members.
3. Lead the writing, translating, and coding of programs and modules according to specifications.
4. Administer the conduct of evaluation and unit testing **CATCHFISH** Information System.
5. Prepare required reports/documentation.
6. Assist the project leader in the related tasks.

Co-Study Leader 2/Programmer:

1. Assist in the definition, development, and documentation of **CATCHFISH** system requirements, objectives, deliverables, and specifications on a module-by-module basis in collaboration with team members.
2. Assist in interpreting specifications, technical designs, and flow charts,

3. Help build, maintain and modify the code for software applications, construct technical specifications from a business functional model, and test and write technical documentation
4. Assist the study leader in the related tasks.

Programmers:

1. Assist in the definition, development, and documentation of **CATCHFISH** system requirements, objectives, deliverables, and specifications on a module-by-module basis in collaboration with team members.
2. Assist in interpreting specifications, technical designs, and flow charts,
3. Help build, maintain and modify the code for software applications, construct technical specifications from a business functional model, and test and write technical documentation
4. Assist the study leader in the related tasks.

Study 3: **Empowering Communities through CATCHFISH Evaluation, Training and Technology Transfer**
Time Frame: October 2024-December 2024

Study Leader:

1. Lead the preparation of the **CATCHFISH** system evaluation tool.
2. Lead the conduct of training and evaluation of the implemented **CATCHFISH** System.
    a. Users from the LGUs, PLUs are acquainted and familiarized with the **CATCHFISH** system operational procedures, data entry, and report generation.
    b. Fisherfolks familiarized with the **CATCHFISH** system operational procedures.
    c. **CATCHFISH** system evaluated based on ISO 25010:2011 quality model.
3. Assist in the conduct of testing activities.
4. Assist the project leader in the related tasks.

Co- Study Leader 3/ Trainor/Lecturer :

1. Assist in the preparation of the **CATCHFISH** system evaluation tool.
2. Assist in the conduct of training and evaluation of the implemented **CATCHFISH** System.
    a. Users from the LGUs, and PLUs are acquainted and familiarized with the **CATCHFISH** system operational procedures, data entry, and report generation.
    b. Fisherfolks familiarized with the **CATCHFISH** system operational procedures.
    c. **CATCHFISH** system was evaluated based on ISO 25010:2011 quality model.
3. Assist in the conduct of testing activities.
4. Assist the Study leader in the related tasks.

Member Trainors/Lecturers:

1. Assist in the conduct of testing activities.
2. Prepare necessary training materials.
3. Conduct and deliver training on the technology developed and other topics, with various stakeholders and system entities.
4. Assist in the documentation and preparation of reports relevant to the training conducted.
5. Attend meetings and workshops relevant to the project.
6. Perform other tasks that may be assigned relevant to the project.

Prepared by:

HAZEL JEAN C. PESINO
Project Leader

Noted:

PROF. PATRICIA M. CANDELARIA
VP-Research, Extension & Knowledge Management
