Office of the University President

June 25, 2025

DEMETRIO P. ANDUYAN, JR. PhD., CESO III
Regional Director
Commission on Higher Education
Regional Office V
Legaspi City

Dear Dr. Anduyan,

The Commission on Higher Education (CHED) released CMO No. 4, Series of 2023, Updated Guidelines on Onsite Learning in Higher Education, stating that: "While the resumption of onsite learning is highly desirable, it must also be noted that hybrid learning is here to stay especially that higher education institutions (HEIs) have already made significant strides in upgrading facilities, learning tools, and materials" (Section 1. Rationale). Further, it states that "HEIs are enjoined to adopt the [following] guidelines in transitioning towards onsite learning within the context of sustaining flexible learning and safe and healthy learning and working spaces to ensure the efficient functioning of educational work." (Section 3. Implementing Guidelines). The CMO further stated that,

> "…public HEIs may deliver 25% of the total number of courses per degree program through appropriate off-site, online, or self-paced flexible learning provisions. At least 75% of the total number of courses per degree program should be conducted onsite" (Section 3.1).

As of January 16, 2023, Partido State University has implemented 100% onsite classes for the Second Semester of AY 2022-2023 (OP Memorandum No. 017, s. 2023). With the growing student population while at the same time as the university is preparing for its application for University Ranking, such as QS World University Rankings, Times Higher Education World University Rankings, and World University Rankings for Innovation (WURI), the university must intensify flexible learning modalities since university ranking assesses universities' ability to deliver them because students should be provided with flexibility of learning no matter what the future holds. Through flexible learning, students are enrolled in online classes wherein they are taught to learn anytime, anywhere, and at their own pace, which is now the new normal wherein professionals need to juggle multiple commitments, providing them with an inclusive environment whatever their learning style and gain the required tech-savvy edge in today's digital world.

Given the foregoing, Partido State University intends to offer Flexible Learning in all its undergraduate programs starting with the first semester of the 2025-2026 academic year, following CMO No. 4, Series of 2023, Updated Guidelines on Onsite Learning in Higher Education.

Office of the University President

For the smooth implementation of Flexible Learning at Partido State University, we have drafted the Implementing Rules & Regulations (IRR) of Academic Guidelines for the Implementation of Flexible Learning as the Mode of Instruction Delivery of Undergraduate Programs at Partido State University, Effective First Semester, AY 2025-2026. Herewith is the said document for your perusal.

Thank you very much.

Sincerely,

ARNEL B. ZARCEDO, EDEL
SUC President III

Implementing Rules & Regulations (IRR) of ACADEMIC GUIDELINES FOR THE IMPLEMENTATION OF FLEXIBLE LEARNING AS THE MODE OF INSTRUCTION DELIVERY OF UNDERGRADUATE PROGRAMS AT PARTIDO STATE UNIVERSITY Effective First Semester, AY 2025-2026

RULE I – General Provisions

Section 1. Short Title and Purpose

This Implementing Rules and Regulations, hereinafter called the IRR, is promulgated pursuant to Academic Guidelines for the Implementation of Flexible Learning as the Mode of Instruction Delivery of Undergraduate Programs at Partido State University, Effective First Semester, AY 2025-2026, which was endorsed by the Academic Council and, thereafter whenever applicable, to prescribe the necessary rules and regulations for the standardization, and proper implementation of the flexible learning general guidelines.

Section 2. Declaration of Policy

The provisions of this IRR align with the university's commitment to promoting good governance and its efforts to adhere to the principles of accountability and efficiency in implementing flexible learning.

Section 3. Guiding Principles on Flexible Learning

The following principles shall govern the implementation of the University's flexible learning:

3.1. Considering that a flexible teaching and learning design perspective is deeply rooted in the needs of students, the main objective should be to provide learners with the utmost flexibility in learning content, schedules, access, and innovative assessment, utilizing both digital and non-digital tools.

3.2. The University shall continue to exercise academic freedom in deploying available flexible learning and alternative modes of delivery instead of the in-campus learning or face-to-face modality. The exercise of discretion by the HEIs, including ParSU, their faculty, must be reasonable, transparent, outcomes-based, and validated.

3.3. The University shall determine the most viable form of flexible learning and teaching that it will utilize, based on its capabilities, existing conditions, national government agency guidelines, or local government unit advisories.

3.4. Flexible Learning should complement the outcomes-based education approach, allowing the University to employ various means of delivery and assessment, as long as they demonstrate the achievement of the set learning outcomes for each course or subject within the program.

3.5. In terms of Learning Content, the University shall review and approve all curricular offerings, making the necessary adjustments or modifications to the course content and requirements. It shall also determine alternative options for the design, delivery, pedagogy, and assessment mechanisms that can be delivered to students through various modalities.

3.6. Regarding the management of learners, the University shall provide mechanisms to inform and orient learners about the learning system to be implemented, which may take the form of course packages accessible through both offline and online modes. Course packages may include course syllabi, study guides, learning activities, available repository of learning resources, schedule of lessons/ consultations, assessments, monitoring of student engagement, schedule and

mechanics of submission of requirements, grading system, feedback portals, student support systems, etc., to assist students in managing their study time and maximizing their learning.

3.7. The University should disseminate information on systems and procedures for the transition to Flexible Learning to all students, officials, teaching, and non-teaching staff. This information may be presented in a policy document, such as a guidebook, manual, or brief, or it may be incorporated into the institution's student handbook. The University should implement mechanisms for students to receive or access printed or digital course packages and instructional materials through a courier, designated pick-up points, or digital platforms.

3.8. The University shall explore partnerships with relevant agencies and organizations to strengthen and/or complement existing resources, infrastructure, and connectivity, ensuring uninterrupted learning for students.

- Determination of the level of technology to be used for the delivery of programs based on the connectivity of students.
- Establishment of a multi-media or learning resource center to provide technical support to faculty members in the development of IT-enabled and IT-mediated instructional materials.
- Access/utilization of electronic library and/or available Open Educational Resources (OER) as reference in various flexible learning pedagogies and disciplinary content.
- Utilization of a learning management system (LMS), either proprietary or non-proprietary

3.9. The University shall implement or explore grants and/or support capacity-building programs for administrators, faculty, and staff on the effective implementation of flexible learning. Trainings conducted through webinars will be facilitated by the Office of the Vice-President for Academic Affairs and selected colleges.

3.10. To the extent permitted, required by law, or by agreement with the concerned party, the university may share, disclose, or transfer personal data to other persons or organizations to pursue its legitimate interests as an educational institution, including a variety of academic, administrative, research, historical, and statistical purposes. Provided that faculty members shall not publicly share or post on social media such as Facebook, Twitter, Instagram, YouTube, and the like, the following:

a. Student personal data, personal information, or sensitive personal information;
b. Student photos or pictures, including those captured through screenshots, print screens, screen grabs, and the like, which in any manner relate to personal data, personal information, or sensitive personal information;
c. Student class standing and grades;
d. Class lists with the names of students, and
e. Specific evaluation results of student work

Section 4. Scope and Application of the IRR

This IRR shall apply to selected teaching and learning activities across all university campuses according to CHED Memorandum Order No. 04, Series of 2023 – "Updated Guidelines on Onsite Learning in Higher Education",

> "…public HEIs may deliver 25% of the total number of courses per degree program through appropriate off-site, online, or self-paced flexible learning provisions. At least 75% of the total number of courses per degree program should be conducted onsite" (Section 3.1).

In view of this, ParSU shall implement three (3) categories of learning modalities of instruction in all undergraduate programs, namely:

a. Full-Onsite Learning

- Full-on-site learning, also known as face-to-face classes, should offer the opportunity for students to interact with their peers and instructors in person, allowing for more immediate feedback and a sense of community.
- The Department/Program Chair, in consultation with the faculty, shall identify the courses that will be delivered as Full-on-Site (face-to-face) classes on campus.
- The number of classes identified to be delivered as onsite classes should be at least 75% of the total number of courses in the program.
- Professional Courses, particularly those with a laboratory component, should be delivered using this category.
- Whenever the province or municipality's chief executive issues a directive that all classes shall be held online (either asynchronously or synchronously), such a directive is automatically implemented for all full-on-site classes.

b. Full-Online Learning

- Full-online classes offer flexibility and convenience, allowing students to learn at their own pace and from the comfort of their own home or space of their choice.
- The Department/Program Chair, in consultation with the program faculty, shall identify the courses that will be delivered as Full-Online (virtual) classes.
- The number of classes identified for online delivery should not exceed 25% of the total number of courses in the program.
- The General Education Courses and selected Professional Courses without a laboratory component may be delivered using this learning modality.
- Courses in the full-online category shall have fifty percent (50%) of the scheduled class hours completed via **online synchronous** learning sessions on campus, and fifty percent (50%) delivered through **online asynchronous** learning mode.
- Whenever the province or municipality's chief executive issues a directive that all classes shall be suspended, such a directive is automatically implemented for all full-online classes.

c. **Blended Online Learning**

- Courses in this category will have at least fifty percent (50%) of the scheduled class hours completed via face-to-face sessions on campus, and at least fifty percent (50%) delivered through online synchronous and asynchronous learning modes.
- The schedule of class modality (i.e., face-to-face, synchronous, and asynchronous) should already be included in the course syllabus, which will be posted on Google Classroom during the first week of classes. Additionally, the schedule of face-to-face sessions for these courses must be distributed (or interspersed with online sessions) throughout the semester.

- Two blended online learning classes are equivalent to one full online class when counting the number of courses delivered online. To ensure that the number of classes identified for online delivery does not exceed 25% of the total number of courses in the program.
- Whenever the province or municipality's chief executive issues a directive that all classes shall be suspended, such a directive is automatically implemented for all blended online classes.

Section 5. Definition of Terms

The following operational definitions of terms are stated for the purpose of clarity and understanding:

- **Online learning** requires connectivity and full use of technology, particularly the Internet.
- **Flexible learning** is a broader term that focuses on the design and delivery of programs, courses, and learning interventions that address learners' unique needs in terms of pace, place, process, and products of learning. It does not necessarily require connectivity.
- **Blended learning** is a hybrid mode of learning that leverages the benefits of self-paced online learning and live interactive classrooms with faculty members. It is an approach to learning that combines face-to-face and online learning experiences.
- **Synchronous learning** is a type of learning that occurs in real-time. This means that the instructor and students interact in a specific virtual place, through a specific online medium, at a specific time. Methods of synchronous online learning include video conferencing, teleconferencing, live chatting, and livestreaming lectures.
- **Asynchronous learning** happens on the student's schedule. While the instructor provides materials for reading, lectures for viewing, assignments for completion, and exams for evaluation, students have the flexibility to access and fulfill these requirements within a specified timeframe. Methods of asynchronous online learning include self-guided lesson modules, streaming video content, virtual libraries, posted lecture notes, and exchanges across discussion boards or social media platforms.
- **Instructor, or course instructor,** shall mean the faculty member handling the class, regardless of academic rank, unless otherwise provided in this IRR.

RULE II – Flexible Learning Administration

Section 6. Delivery Platform

6.1. All faculty members handling Full Online and Blended Online classes are required to create a Google Classroom for each of their assigned courses. They shall use these classrooms to deliver the course and manage the class.

6.2. All course instructor and their students shall use their official university email account (@pbox.parsu.edu.ph and @parsu.edu.ph). Students are required to enroll in the assigned class. To enroll students in the class, the course instructor invites them or provides them with a specific Google Classroom code to join.

6.3. Two weeks before the start of the class, the faculty must create a Google Classroom and invite students to join using their official university email account provided by the ICTU Office. The lists of students will be provided by the Department/Program Chair, who has the authority to schedule classes.

6.4. The faculty may opt to create a "group" of all students' email accounts, which can

be used to communicate with the students without having to enter their email addresses repeatedly.

Section 7. Faculty Work Arrangement During Flexible Learning Implementation

7.1 All faculty are required to report physically to their respective campuses during the implementation of flexible learning.

7.2 If the faculty member's workload on certain days is all full online or online in blended learning classes, he/she may opt for a Work-From-Home arrangement. This provided that:

- The documentary requirements outlined in the Annex, such as Accomplishment Report for Work-From-Home Arrangement and Accomplishment Report for Online Classes, are complied with.
- All course requirements are delivered on time.
- Virtual class sessions and asynchronous content are accessible and regularly updated.
- Attendance at required meetings, monitoring, and administrative directives is complied with virtually or physically as needed.
- Proper coordination with the Department/Program Chair is maintained.
- Availability for in-person consultation, academic coordination, and institutional support;
- Participation in regular meetings, mentoring, and monitoring processes;
- Support program and college-level operations during the semester.

7.3 If the faculty member's workload on certain days involves a combination of online and onsite classes, the faculty member should report to their respective campuses.

7.4 Exceptions to the above reporting requirements for health, emergency, or special cases must be endorsed by the Department/Program Chair and approved by the Office of the Dean and the Office of the Vice President for Academic Affairs.

Section 8. Managing the Google Classroom

8.1 Once the Google Classrooms are created and students have been invited, the course instructor shall determine which students have not responded to the invitation to join the class or have responded late. The course instructor shall survey the students to determine the means of communication available to them. Based on data on available means of communication, the course instructor shall develop or adjust the learning plans and strategies.

8.2 The concerned course instructor shall submit to the Department Chair the proposed customized teaching and learning activities, based on the type of communication media available to the students and the intended learning outcomes per subject.

8.3 The concerned course instructor must submit the completed Accomplishment Report for Online Classes, PSU-F-VPA-06, *see Annex C*, to the Department Chair, one per subject. The Dean shall approve the Plans before the start of classes.

8.4 The content of the Accomplishment Report for Online Classes should be consistent with the lectures and activities posted in Google Classroom. Information from the flexible teaching and learning plan shall be made available to the students.

8.5 The Department and Program Chairs shall serve as co-teachers in all classrooms established by the faculty.

8.6 The Department/Program Chairs shall submit to the Office of the Dean and the Office of the Vice President for Academic Affairs a list of all the classes delivered on Full Online and Blended Online Learning.

8.7 The concerned course instructor must monitor class attendance and engagement

of students and use the data for student guidance and counseling. Attendance can be viewed in the Google Sheet and recorded accordingly.

8.8 The class schedule indicated in the class list provided by the department shall be the schedule reflected in Google Classroom. No synchronous activities shall be done outside of the class schedule.

8.9 The first topic in Google Classroom should include the syllabus, prepared modules, and reading materials, such as videos, PowerPoint presentations, and other carefully selected electronic resources, designed to facilitate and enhance learning. Modules to be uploaded must have the following content:

- *Module Introduction.* It is a concise statement about the module, including the concept background, which provides interest and motivation to the students.
- *Intended Learning Outcome (ILO).* It refers to what students should attain after completing the module and how it will be presented to learners. It shall be aligned with the approved syllabus of a particular course.
- *Module Content.*
- *End of Module Test.* This refers to the examination that serves as the assessment at the end of the module. Each module test shall measure ILO, and the evaluation shall be based on the purpose of the topic modules, whether it is to introduce (I), reinforce (R), or demonstrate (D) knowledge. This end-of-module test may be applied asynchronously.

Section 9. Class Monitoring

9.1 The College Deans and Department/Program Chairs shall monitor the delivery of flexible learning based on the approved Course Content, Class Administration, Assessment Methods, and Grading Systems submitted by the faculty member or course instructor before the start of the semester.

9.2 The Department/Program Chair, which act as a co-teacher in Google Classroom, shall observe the conduct of class activities once every semester using the prescribed classroom observation form.

9.3 Prior to the observation, the Department/Program Chair and the faculty member concerned agree on the class module(s) to be observed and the schedule for the observation.

9.4 The Department/Program Chair should review the module(s) agreed upon for observation and all course overview materials before conducting the actual observation.

9.5 Observations should be conducted within the first ten weeks of the semester.

RULE III – Assessment Method, Expected Students' Outputs, and Tools

Section 10. Assessment Method

10.1 The University will utilize the approved Grading System to respond to the guiding principles of flexible learning. The following assessment should be followed:

Grading System for Lecture Classes (Full Online and Blended Online Learning):

Class Standing (Quizzes & Recitation)	40%
Major Examinations	30%
Major Outputs	20%
Attendance	10%
	100%

Computation for Final Grades (approved by the Board):
FINAL GRADE = Midterm Grades (50%) + Final Grade (50%)

Equivalent Grade:

99 = 1.0	94 = 1.4	89 = 1.8	84 = 2.25	79 = 2.7	74 and below = 5.0
98 = 1.1	93 = 1.5	88 = 1.9	83 = 2.3	78 = 2.75	INC = Incomplete
97 = 1.2	92 = 1.6	87 = 2.0	82 = 2.4	77 = 2.8	
96 = 1.25	91 = 1.7	86 = 2.1	81 = 2.5	76 = 2.9	
95 = 1.3	90 = 1.75	85 = 2.2	80 = 2.6	75 = 3.0	

10.2 If the assessment requires teamwork, allow them to open Google Docs for collaboration and feedback.

10.3 If the assessment requires an oral presentation of the output, the relevant faculty member shall conduct it online using Google Meet.

RULE IV - Intellectual Property Rights on the Use of Downloaded Materials

Section 11. Attribution

11.1 Academic integrity must be observed at all times in using downloaded materials in the development of the module and other teaching materials. Fair use shall be observed in accordance with the Intellectual Property Code of the Philippines (RA 8293) and its IRR.

11.2 Colleges must ensure that faculty members have checked and properly cited all sources of content in the materials they prepare, and that the attribution and acknowledgments of third-party materials are up to date. The concerned Department/Program Chair should monitor this.

11.3 When using or reposting software materials, faculty members must provide proper attribution to the original author(s). Faculty shall utilize the following citation format: [Name], *[Course Title], [Term]*. (Open Courseware: Publisher), [URL] (Accessed [Date]). License: Creative Commons

11.4 On other sites that do not require a Creative Commons License, all downloaded materials included in the modules should be properly cited in accordance with APA, MLA, AMA, Chicago, or Harvard Referencing Style, whichever is applicable.

RULE V - Monitoring and Evaluation

Section 12. Monitoring the Effectiveness of this IRR

12.1 The Office of the Vice President for Academic Affairs, the Office of Student Affairs and Services, and the concerned College Deans and Department/Program Chairs shall monitor and gather feedback on the implementation of these guidelines from students, faculty, and other stakeholders. The results of the monitoring and evaluation will be used to further enhance the effectiveness of this IRR.

12.2 The Office of Student Affairs and Services shall establish a mechanism to closely monitor the academic performance, mental health, and psycho-social well-being of students during the implementation of flexible learning.

12.3 The monitoring mechanism shall be included in the Flexible Learning Primer, which will be developed and published for dissemination to students and faculty.

12.4 The Office of the VPAA shall ensure compliance with this IRR by all concerned parties.

Section 13. In implementing these IRR, the University may introduce modifications through the amendment of its provisions as needed.

Section 14. This IRR shall take effect immediately upon approval by the University President. Any provision hereof that may conflict with any existing laws, rules, or regulations promulgated by higher authorities shall be deemed inoperative.
